- **Not dimmable**

F   A↑G

This TRIO LED filament light source with a retro look provides a real eye-catcher and a radiant finish. As a filament light source, it is particularly suitable for minimalist luminaires where a full view of the light source is required. The transparent glass has a light brown tint and creates a pleasant ambience in the room. The special surface structure and shape of the light source emphasise the decorative effect of the light source, which can be used and combined in a variety of ways. Modern LED technology is characterised by high light quality and energy efficiency. Compared to conventional halogen light sources, up to 80% of energy costs can be saved. In addition, LED light sources have a long service life, produce less heat and protect the environment.
