Human and Responsible Light

Light is a constant feature of our life. The vision of Artemide is traditionally focused on the relation between man, light, and the environment, which developed in time in view of ensuring a person's wellbeing and space perception, and confronted with environmental sustainability issues, also with a focus on nature and all living beings.
The Human Light is a light that follows the pace, behaviour, and emotions of individuals, a light designed for man's psychological wellbeing, capable to bring new quality, emotions, and consciousness into our life and to open up an innovative, responsible overview of the planet's future.
With The Human Light, light becomes a shapeable raw material, an active instrument supporting the Self, a means to regain stimuli and sensations.
Self-determination in the relation established between man and light should be interpreted as a right to flexible management available to all, as well as, in particular, a duty aimed at appropriate energy balance.
Designing light means reaching beyond the purely functional role of lighting and embracing a broader dimension that leads to a new focus on the perceptive experience, on psychological and physiological needs. At Artemide, the knowledge and awareness of this theme, combined with the research carried out from the 1990s to this day in cooperation with universities, think-tanks, and experts in a variety of scientific subjects (medicine, life sciences, psychology, anthropology), have resulted into the development of innovative lighting systems.
Throughout its development process, Artemide designed products, as well as instruments to create variable luminous scenarios to interact with and to offer a new, more straightforward and conscious way to experience the relation with light: Metamorfosi, A.l.s.o. ,Tunable White, and down to Spectral Light.

ADV Campaign, 1998

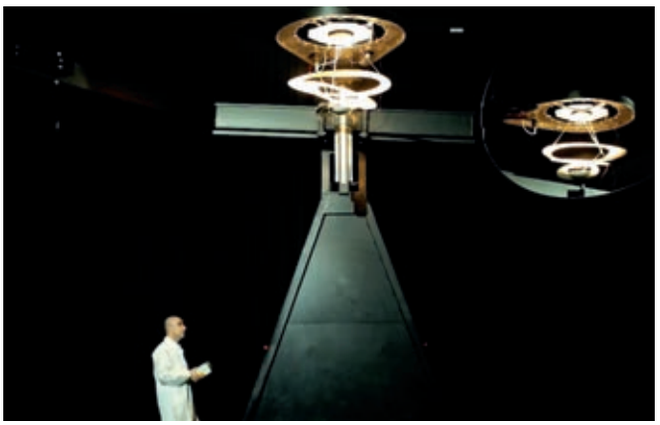

High Manufacturing

Today Artemide epitomizes design, lighting design competence, and innovation, with products that convey research and, particularly, the Made-in-Italy concept and high-quality manufacturing. The Artemide collections are a unique blend of values and competences: the company's approach to human and responsible light is combined with design and material savoir faire to create a mix of next-generation technology and ancient wisdoms – a perfect expression of sustainable design. Artemide holds the wisdom of the present and of the future, while valorizing the know-how of the past, such as craft glass processing, with a contemporary approach. Each new product is developed and fine-tuned – from its concept to industrial manufacturing – at the headquarters in Pregnana Milanese, thus ensuring the best results in terms of quality and compliance with international standards.
Certified laboratories support all the phases of product development, from early studies to market release.
Ongoing research expands the manufacturing know-how developed in time, which is constantly updated in the light of new technologies, both at the manufacturing unit in Pregnana Milanese and in the other European facilities of the group (Telgate, BG, and Venice in Italy, St .Florent in France, Paks in Hungary). Within the framework of a thorough environmental policy, quality is seen as a fundamental right for a long-lasting relation with the product; careful design of the entire lifecycle is a prerequisite for a long life and for true environmental innovation. Maximum care is given to the design and production process with a focus on a responsible use of resources and an accurate choice of processes and technologies in view of energy balance.

Light in 5 Years Time

LiFi

Artemide opens up important research issues connected with photonics and new technologies to outline a future vision, a new way to interpret and experience light. The company is moving towards the new frontiers of design – from the atom to the bit – where the core is no longer just the product as such. A review of the role and potentials of light, which starts from its dual connotation as both an undulating and a corpuscular phenomenon, passes through ideas that reach beyond the product, towards a new management and information intelligence. Design today should provide a better alternative to existing items, an interactive design half-way between technological frontiers and the contemporary human culture, capable to promote experiences and to capture the behaviours and emotions of people. The Internet of Things provides an opportunity to generate new relations and new forms of environmental awareness and control, and allows to develop projects for a dynamic and interactive experience with light in a digital dialogue aimed at social lighting. This technological acceleration provides multiple opportunities. The time for technological transfer – from research to implementation – is gradually shrinking. This has opened up new real frontiers for design at Artemide: LiFi, smart and digital management systems, as well as the design of true software applications, like LoT.

ANDROID APP ON Google play

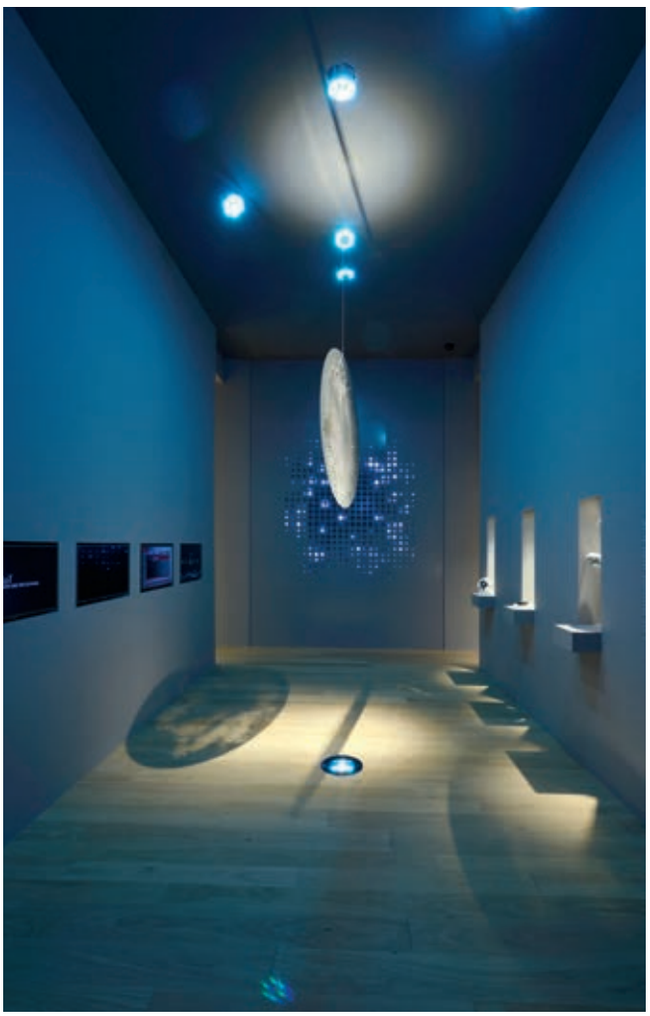

Target Point

LightCube

Natural and environmental phenomena can interact with artificial light according to measured parameters. The IoT enables a two-way dialogue between lighting appliances, sensors, and control systems, capable to record and integrate ambient variations to preserve a dynamic balance with respect to pre-set target values.

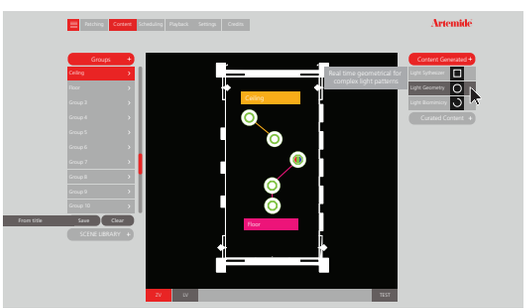

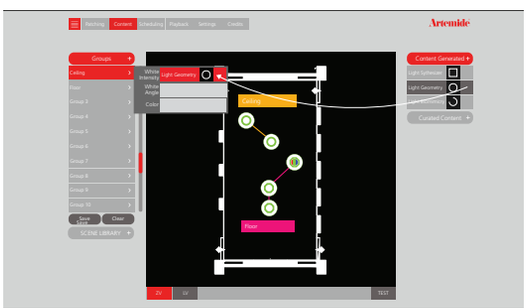

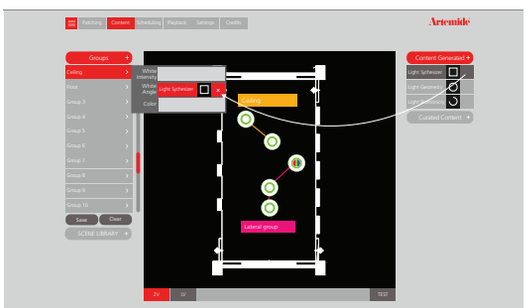

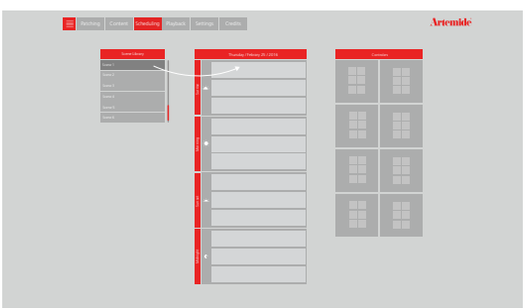

Lot Software

An innovative operating intelligence for the LoT family of projectors. Software-product interaction occurs in real time, either through Scheduling or with respect to external variables. The unique nuances of natural light are reproduced in real time by means of algorithms for instant calculation of schemes, patterns, and lighting effects. The system is programmed by means of a simple and user-friendly drag&drop interface.

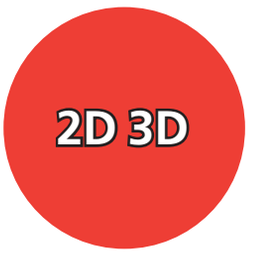

Web 2.0 services

Artemide® cloud

cloud.artemide.com
artemide.com

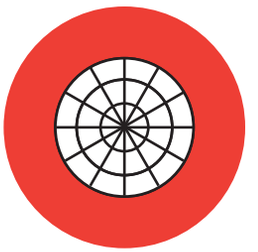

The 2D-3D files of our products are available for your lighting project and are compatible with the most popular CAD software applications (.dwg, .dxf, .3Ds, .stp).

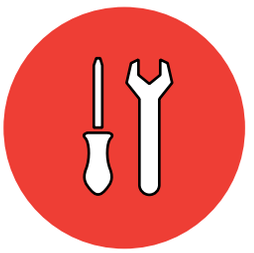

CAD files

The photometric data of our products can be downloaded from our website in the .ldt, .ies (EU), .ies (US), .uld formats.

Photometric data

Mounting instruction

Artemide provides step-by-step support for product installation – from simple table appliances to more complex and intricate lighting systems.

Certifications

Certifications for the different markets are available to support international sales.

5 YEARS WARRANTY

Artemide

Artemide has always provided high quality products. As a result, we are glad to inform you that from April 1st 2015 we will offer to all our end users worldwide (private consumers only) a free 5-year extended warranty, valid only if the product is successfully registered online within two months from the date of purchase.

Conditions for the 5-year extended warranty are as follows:

- Being an end user (private consumer);
- Purchasing the ARTEMIDE product after April 1st 2015;
- Registering the product online within 2 months from the date of purchase;
- The product must be new (not second-hand);
- Being the first owner of the product (the warranty is not transferable).

Following successful online activation and claim, the extended warranty will entitle the private customer to a free repair or replacement when the product is determined to be faulty due to manufacturing defect, as stated on its terms and conditions.

cloud.artemide.com/5-years-warranty

Artemide TCO®

Artemide TCO is a professional tool for the implementation of energy performance and economic evaluations of your lighting projects.

1_Project
Enter general information (town, building type, etc.) adding qualitative details such as how the area is occupied and the supply of natural daylight.

2_Solution
Create two or more simple alternative project solutions while defining suitable manual or automatic control systems, such as presence detectors and light sensors, for each fixture.

3_Energy
Artemide TCO compares alternative solutions, clearly displaying thorough energy results compliant to EN 15193 standards, CO2 emissions and energy saving percentages.

4_TCO
Artemide TCO compares alternative lighting solutions also through intuitive charts and graphs, displaying TCO details and ROI spread over time.

5_Report
Finally, you can generate and export a .pdf recap project report which can be customized with your logo, details and a selection of the energy performance and economic information you would like to highlight.

$$TCO = €_{system} + €_{maintenance} + (W_{l,t} + W_{p,t}) \cdot €_{kWh}$$

TCO: Total Cost Ownership
$W_{l,t}$: absorbed energy with lamps on $P_N \cdot t_d \cdot (F_d \cdot F_o \cdot F_c) + P_n \cdot t_n \cdot (F_o \cdot F_c)$ [kWh]
$W_{p,t}$: absorbed parasitic energy with lamps off $P_{pc} \cdot [t - (t_d + t_n)] + P_{em} \cdot t_e$ [kWh]

tco.artemide.com

Bespoke products

Artemide offers comprehensive service for contract projects, developed on multiple levels.
The company can design customized solutions starting from existing products, as well as design and manufacture bespoke solutions.
A dedicated in-house department takes care of custom-designed projects and develops individual solutions in cooperation with the staff in charge of research, development, and innovation.
The optoelectronic innovation skills, the technological know-how, and the high-quality manufacturing of Artemide are available for customers and designers to implement 360° projects, to help design products, as well as the behaviour of light in space.
Custom-designed solutions may involve existing products in new versions, forms, dimensions, control modes, lighting performances, technical specifications, or installation features.
In particular, the Artemide collections include a variety of products that are conceived to act as open and modular platforms, in order to meet the requirements of individual architectural and functional spaces with utmost flexibility.
Artemide traditionally establishes important partnerships with international architecture or lighting design firms and with top brands, which result into unique solutions, often interesting from the cultural viewpoint and for the research they stimulate. Many of these have triggered the process for development of some of the existing products.

LoT

Tapio Rosenius
2016

Patent Pending N° MI102016000026002

LoT

- max peak power 85 W
  max continous power 60 W
- max luminous flux 2500 lumen
- MacAdam 2SDCM
- Beam: S / F / WF / XF
- CCT 2700K
- CRI 90 (typ.)
- Life L70 (9K) 50000h
- Control DMX/RDM
- DMX 6 footprint
- **IP**20

- LoT is a universal projector that changes the beam angles of emissions and flows dynamically, and produces coloured ambient light.
- It is a multi-focal projector that ensures utmost flexibility with minimal dimensions.
- Its dynamic luminous beam does not imply any mechanical movements, but is rather the result of innovative optoelectronic design. Seven lenses define four base beam angles and, when combined, can modulate countless beam angles and intensities through current change.
- Each base beam angle has 4 different optical unit types: 1 for the narrow beam, 2 for the flood beam, 2 for the wide flood beam and 2 for the extra flood beam.

- A well-calibrated mix of currents on the 4 different channels allows to adjust the beam angles of the emissions and to manage all intermediate angles with a very high resolution. Fluid and gradual changes are thus perceived.
  Footprint 1: white emission beam angle
  Footprint 2: white emission intensity
  Footprint 3: red emission intensity
  Footprint 4: green emission intensity
  Footprint 5: blue emission intensity
  Footprint 6: white emission intensity
- In addition to the white light projector function, LoT can produce coloured ambient light in the RGBW mode through 4 additional dedicated channels.
- Uses TIR lenses.
- The special heat sink allows to adjust the lighting power to ensure excellent illumination up to a 5 m distance.
- Specifications and details can be obtained from the Artemide sales office.

LoT Reflector

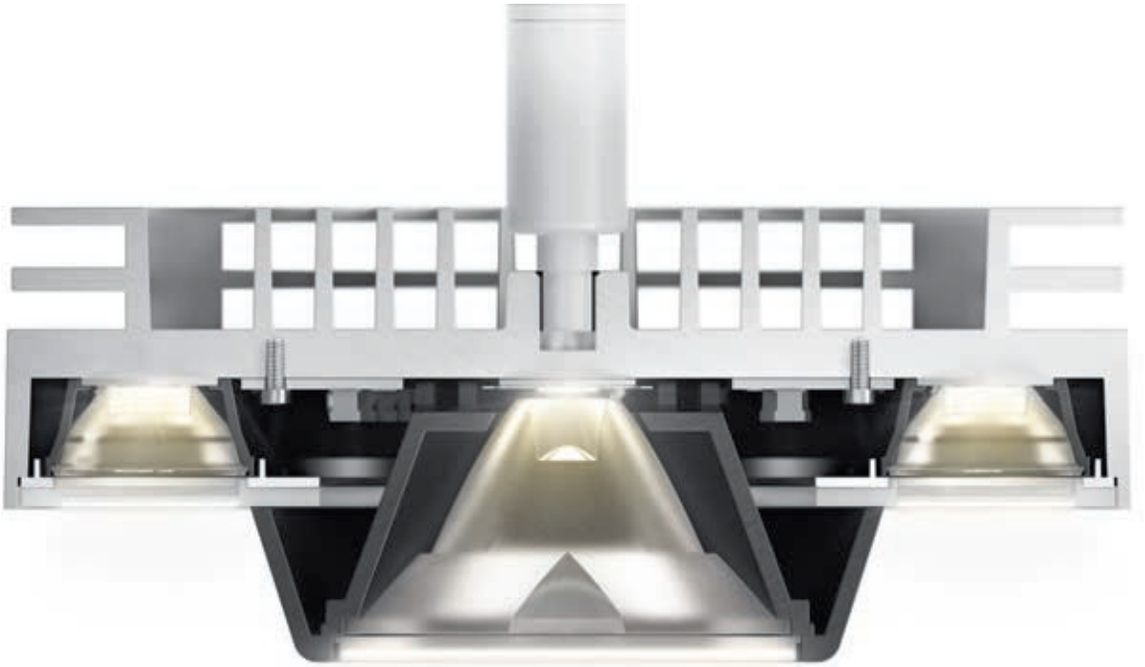

- max power 70 W
- max luminous flux 5600 lumen
- MacAdam 2SDCM
- Beam: S / F / WF
- CCT 3000K
- CRI 90 (typ.)
- Life L70 (9K) 50000h
- Control DMX/RDM
- DMX 2 footprint
- IP20 ⏚

- LoT Reflector is a universal projector that changes the beam angles of emissions and flows dynamically.
- It is a multi-focal projector that ensures utmost flexibility with minimal dimensions.
- Its dynamic luminous beam does not imply any mechanical movements, but is rather the result of innovative optoelectronic design. Seven lenses define 3 base beam angles and, when combined, can modulate countless beam angles and intensities through current change.
- Each base beam angle has 3 different optical unit types: 3 for the narrow beam, 2 for the flood beam, and 2 for the extra flood beam.
- A well-calibrated mix of currents on the 3 different channels allows to adjust the beam angles of the emissions and to manage all intermediate angles with a very high resolution. Fluid and gradual changes are thus perceived.
  Footprint 1: white emission beam angle
  Footprint 2: white emission intensity
- Uses reflective optical units.
- The special heat sink allows to adjust the lighting power to ensure excellent illumination up to a 12 m installation height.
- Specifications and details can be obtained from the Artemide sales office.

Cata Optical System

Cata

Catadioptric

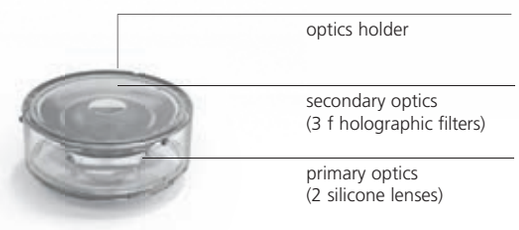

- High axial intensities with considerable beam collimation.
- High-precision accent lighting.
- Well defined narrow beams.
- Excellent light blending.

Cata TIR

Total Internal Reflection

- Extremely compact dimensions.
- High efficiency.
- Wide availability of beam angles.
- Maximum control of light emission.
- Wide range of optical accessories.

Cata Wide

Reflective & Refractive

- Soft, homogenous light.
- High efficiency.
- Diffused light effect produced by transparent material.

internal microlenses

external prisms at 90°

Cata

- Interchangeable optical unit a ‘twist & lock’ mechanism.
- Defined, concentrated light beams thanks to an innovative collimation system.
- 3 beam angles: narrow (24°), spot (12°), flood (64°).
- Excellent quality of light.
- Cata Tuneable White: adjustable colour temperature from 2700K to 5700K CRI >93 (min.).
- Cata Stable White: available as warm white (3000K) and neutral white (4000K) – CRI=80 (min.).
- Rotation of 360°, tilt angle of +90°/-90°.
- 4 installation options: with adaptor for 3-circuit track (ceiling only as envisaged by legislation), with power unit for ceiling installation in the adjustable and fixed version, with power unit for suspension installation in the adjustable version.
- Ultra-flat power source (8mm height): DALI dimmable as standard, DALI8 interface hub for Tunable White version.
- If mounting on a track, it can be used with button on board unit with memory function.
- In all the other mounting modes, optional SwitchDimm operation and resident button with memory function.
- Materials: optic in transparent and metallic polycarbonate, heat sink in die-cast polished aluminium, feeder/power supply in transparent polycarbonate, arm in die-cast polished aluminium.
- Complies with EN60598-1 standard and other specific standards.

Optical unit
Cata is equipped with a system of interchangeable optics via a ‘twist and lock’ mechanism.

Cata Tunable White

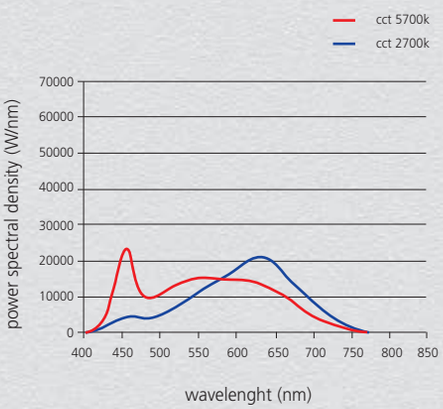

TW®

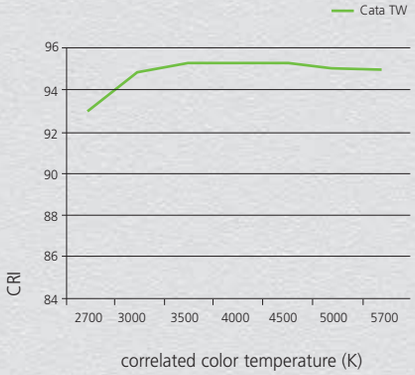

Artemide Tunable White

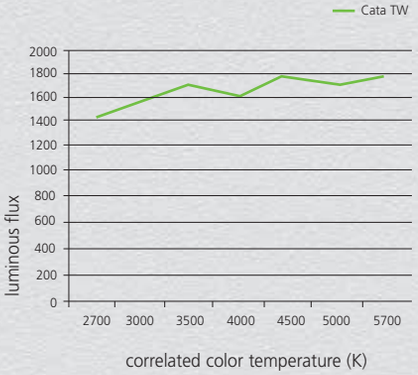

- Cata projector in its Tunable White version is equipped with an innovative COB with adjustable colour temperature. The white colour temperature can be adjusted from 2700K to 5700K,
  with an impressive CRI >93 (min.)
- Its lighting performance looks to reproduce the best professional halogen sources in terms the quality of light, with the added benefit of non-existent ultraviolet and infrared emissions.
- Cata projector is equipped with custom electronics, specifically designed to interface with different control devices through the DALI8 protocol.

Cata TIR

- Interchangeable optical unit a ‘twist & lock’ mechanism.
- 5 avaible beams: narrow (8°), spot (16°), flood (28°), wide flood (48°), wall washer.
- 2 color temperatures: warm white (3000K) CRI=93 (min.), neutral white (4000K) CRI=90 (min.)
- Rotation of 360°, tilt angle of +90°/-90°.
- 4 installation options: with adaptor for 3-circuit track (ceiling only as envisaged by legislation), with power unit for ceiling installation in the adjustable and fixed version, with power unit for suspension installation in the adjustable version.
- Ultra-flat power source (8mm height): DALI dimmable as standard.
- If mounting on a track, it can be used with button on board unit with memory function.
- If using a ceiling and suspension mount, it can be used in SwitchDimm option and with button on board unit with memory function.
- Materials: optic in transparent polycarbonate and silicone, heat sink in die-cast polished aluminium, feeder/power supply body in transparent polycarbonate, arm in die-cast polished aluminium.
- Complies with EN60598-1 standard and other specific standards.

Studio Artemide
2013 (LED)

- LED COB
- 20W, 35W, 46W, 68W
- 1443 / 5411 lumen
- MacAdam 3SDC
- Beam: F / WF / XF
- CCT: 3000K / 4000K
- CRI=90 (min.)
- Life=L70 (6K)=50000
- IP 20

Picto Tunable White

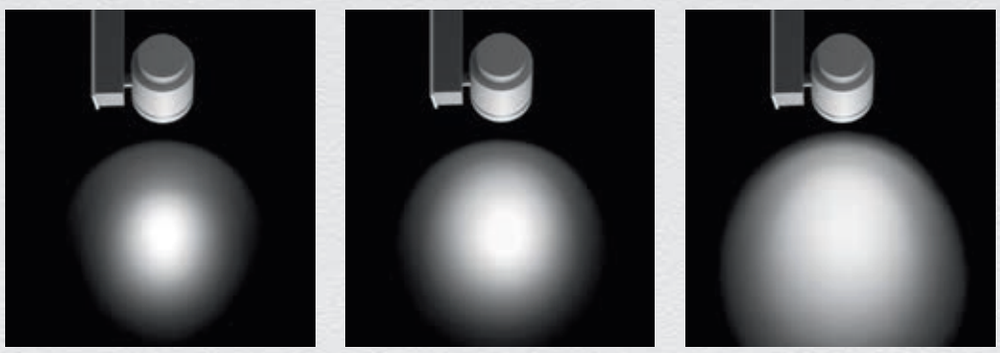

- CCT: 2.900K / 5.500K
- CRI >91 (min.)

- Series of high-output LED adjustable projectors.
- 2 colours available.
- Optical units available in 3 sizes, depending on the light source: 70 mm, 100 mm, 125 mm.
- Defined narrow beams in the LED version, thanks to the hybrid optical system (Picto 125).
- Picto 125 High Flux uses a high-yield reflective optical unit.
- The new Picto High Flux improves the performance thanks to the high installed power and its high efficiency.
- Picto 125 Tuneable White (LED): colour temperature can be adjusted from 2,900K to 5,500K – CRI>91 (min).
- Adjustability: -90°/+90°, rotation up to 355°.
- Precise aiming of the projectors, thanks to advanced locking system.

- Wide range of accessories: UV filters, chromatic filters, louvres, asymmetric diffuser, adjustable dowsers, Gobo to project images or control shape of beam.
- 2 installation options: with 3-circuit track adapter (available for ceiling mounted option), or base plate for ceiling mounting.
- Electronic power supply: with DALI dimmable, or non-dimmable options.
- Materials: injection-moulded aluminium head, aluminium or polymer body, pure aluminium reflectors.
- Compliant to EN60598-1 standard and other specific regulations.

Artemide Tunable White

Vector

Carlotta de Bevilacqua
2017

- LED COB
- 2,2W / 8,7W, 12,6 / 13 W
- 193 / 1350 lumen
- MacAdam 3SDC
- Beam: S / F / WF
- CCT: 3000K / 4000K
- CRI=90 (min.)
- IP 20

S = Spot
(8°- 15°)

F = Flood
(15°-30°)

WF = Wide flood
(30°-45°)

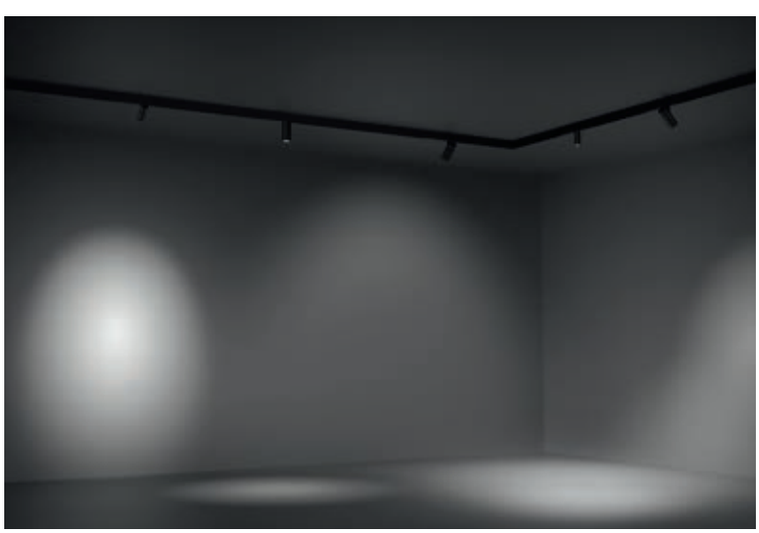

- Two sizes with four different beam angles each (spot, flood, wide flood) obtained by means of refractive or hybrid optical units.
- Two track adapter options (d40 narrow spot version available with magnetic adapter only).
- Junction arm integrated in the spotlight's body to keep the barycentre aligned with the track and prevent any imbalance in possible suspension versions of the frame.
- The junction allows 360° rotation and 90° tilting for maximum emission adjustment freedom.
- Version with Dali adjustable magnetic track adapter ensuring utmost flexibility in the operation of the individual light sources.
- Version with compact 4-conductor (3p+n) adapter with hidden LED driver and non-dimmerable phase selector.

Dali - SELV dimmable

Dimming conductors on track are accessible to fingers, so it is mandatory to carry SELV voltages (< 60VDC). Dali is not SELV, Artemide has developed an interface (located into the canopy) that transform Dali (not SELV) into a "SELV DALI".

Olmo

Olmo is a system based on a combination of plain optical and mechanical elements: a linear track module, a magnetic junction and three luminous heads that offer different performances. The track's structure has a C-section to ensure appropriate structural properties and accommodate an innovative printed circuit board within for power supply. Underneath is a thin iron edge that supports the luminous bodies with a magnetic joint. The suspension tracks ensure maximum mounting flexibility, in that they can be either connected with each other or installed vertically or horizontally, as are connected via an element that ensures power and mechanical connection. Olmo is therefore a system that grows freely and unpredictably to adjust its geometry, look, and lighting performance to space.

- Caelum is designed to provide a versatile lighting solution for the retail sector. It is a highly flexible, multi-functional system, with a high aesthetic and exceptionally high performance.
- Caelum is a modular lighting system with an open recessed profile channel, which integrates perfectly with the architectural design.
- Optional covers to delineate the channel.
- The spotlight kits are available in 2 sizes: Ø 90 mm and Ø 120 mm (diameter of the optical assembly) and are provided with a swivel arm which allows total concealment of the spotlight or, if open, allows the partial or total extraction of the spotlight from the channel.
- A double hinge system provides a high degree of regulation of the beam direction.
- The spotlights are provided with an electronic power supply.
- The extruded elements are installed along both edges of the ceiling cut, creating a channel that can be finished with an optional top cover.

Airlite

Carlotta de Bevilacqua
Paola di Arianello
2012

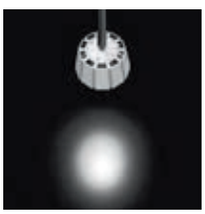

- LED COB
- 35W / 31W
- 1188/2709 lumen
- MacAdam 3SDC
- Beam: S / F
- CCT: 3000K / 4000K
- CRI=80 (min.)
- Airlite Tunable White 2.900K / 5.500K
- CRI >91 (min.)
- IP 20 ⏚

- Unique minimal dimensions and virtually weightless: max diameter 139mm x height 85mm. Weight of the die-cast head is 450g.
- High energy efficiency: between 71 and 81 lumens per watt in the spotlight version.
- Innovative LED thermal management: passive heat dissipation system based on a chimney effect.
- Thin, extremely defined beams, thanks to the hybrid optical system.
- Available accessories include: elliptical refractor, soft and coloured filters, asymmetric tube, anti-dazzle louvre, adjustable dowsers.
- In addition to adjustable dowsers or asymmetric tube, it is possible to install up to 3 filters / refractors at the same time, or one filter plus the anti-dazzle louvre.

- 3 installation options: with adaptor for 3-circuit track (ceiling mounted version only), with base plate for semi-recessed mounting, or suspension.
- Standard version: DALI dimmable. Tuneable White version: DALI8.
- Materials: body in die-cast aluminium, reflector in optical aluminium, lens in polycarbonate.
- Complies with standard EN60598-1 and other specific regulations.

Spot (S)
8°-15°

Flood (F)
15°- 30°

Innovative thermal management

The die-cast aluminium body has a distinctive design, increasing thermal dissipation.
Air is circulated through open gaps, allowing heat to travel out of the fitting, ensuring efficiency and long life of the LED module.
This solution enables the integration of considerable power into an extremely
compact and virtually weightless design.

Dimensions: max diameter 139mm x height 85mm

Weight die-cast head: 450g

Hybrid optical system lens/reflector

Airlite uses high power LED modules within a hybrid optical system (lens and reflector) producing defined narrow beams.
The Airlite 'hybrid' optic technology provides indirect light via a compact reflector adjusted and redirected through the lens.
An innovative solution allowing considerably reduced product dimensions.

LED

TW®

Artemide Tunable White

Airlite Tuneable White projector is equipped with an innovative LED ARRAY of varying colour temperatures: The LED diodes combine to achieve efficient, chromatic uniformity, allowing users to adjust the colour temperature via an electronic control device.

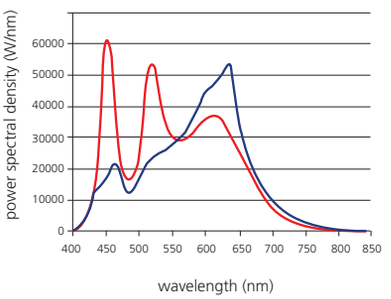

The Airlite Tuneable White projector is a perfect fixture for the retail environment. The ability to adjust colour temperatures from 2900K to 5500K allows for variations in light and atmosphere, giving users the opportunity to highlight different colours, while guaranteeing a high colour rendering indexing (CRI >91 (min.)) with an efficient product (above 85 Lm/W) across the entire spectrum.

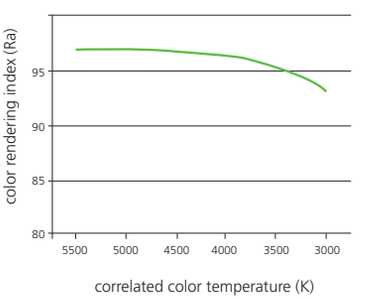

The unique mix of LEDs has been selected to ensure perfect positioning of this light source on the black body locus.

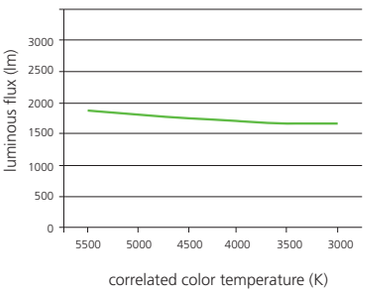

Airlight Tuneable White projector is equipped with custom electronics, specifically designed to interface with different control devices via the DALI8 protocol.

External three-circuit track

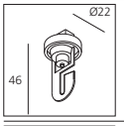

White ○ Black ● Aluminium ●

- Three-circuit track for surface mounting.
- Extruded aluminium profile in white, black or aluminium finish.
- Supplied in lengths of up to 4m, cut to measure.
- 2 versions: standard version with 5 conductors (1 earth, 1 neutral, 3 phases) each with a 2.5mm² section, or DALI version with 2 additional conductors allowing dimming of lights fitted with DALI dimmable control gear.
- Maximum intensity: 16a across the 3 circuits.
- Track is pre-cut every 33cm for fixing.
- Wide range of accessories, power supply components and electrical and mechanical connectors.

- Life = L70(10K)=50000h
- IP20 ⧈

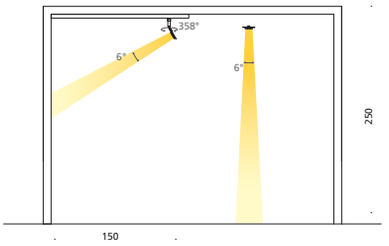

- High-power LED lighting appliance mounted on a thin (3 mm) flat aluminium sheet with improved heat dissipation.
- The patented dissipation system allows to touch the lighting body at all times for adjusting in space, thus establishing a new relation with light.
- The heads can accommodate 9, 12, or 16-LED circuits.
- Available with three different emissions: 6°, 20°, 38°.
- The junction virtually allows 360° rotation on two axes and 180° rotation on the third one.

Beam Angle

6° - Extra Spot

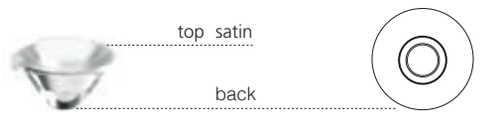

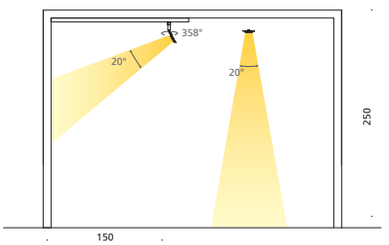

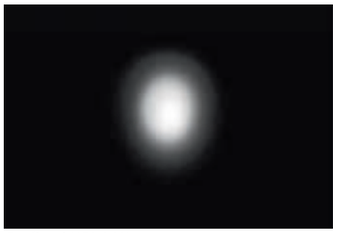

XS = extra spot (<8°)

20° - Flood

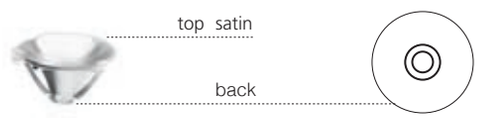

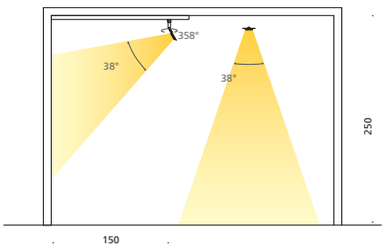

F = flood (15°-30°)

38° - Wide Flood

WF = wide flood (30°-45°)

Una Pro Joint

The utmost flexibility of UNA PRO is ensured by a small junction that virtually allows 360° rotation on two axes and 180° rotation on the third one, thus providing full freedom of movement of the three heads in space. Adjustment is easy; based on the study of heat dissipation, the sheet constituting the lamp's body can be freely touched for easy and intuitive adjustment of the light beam.

Flexibility also helps ensure perfect integration with any space and architectural approach. Una Pro can be concealed and even disappears in the built-in version - an unobtrusive entity that stresses the importance of the emitted light, rather than of the appliance.

- LED 8W
- 1x 463 / 501 lumen
- MacAdam 4SDC
- Beam: S / F / WF
- CCT: 3000K / 4000K
- CRI=80 (min.)
- Life=L70 (6K)>50000h
- IP 20

- Minimal dimensions, material and energy consumption: 37mmx37mmx37mm.
- Effective and precise accent lighting with only 8W of total power consumption.
- Maximum flexibility: rotation 360°, tilt angle +90°/-90°.
- 2 installation options available: with control gear for mounting within Algoritmo product range or base plate for semi-recessed installation.

- Option of installation inside Algoritmo modules.
- Materials: body in anodised aluminium, translucent cover in polycarbonate.
- Complies with EN60598-1 standard and other specific standards.

SOL

Marco Zanuso Jr, Christophe Mathieu
2013

- LED 13 W
- 678 / 700 / 710 lumen
- Beam: F / WF / XF
- CCT: 3000K
- CRI=80
- Life=L70 (6K)=50000h
- IP20 ⧈

- Varying compositions of the optical unit result into three emissions: 30° / 45° / 90°.
- No shadows and high-definition projection.
- The spot version allows beam adjustment by 90° on the horizontal axis and by 358° on the vertical one.
- Aluminium body.
- PMMA lens.

SHARP

Carlotta de Bevilacqua
2016

Patent Pending N° MI102016000031730

Sharp

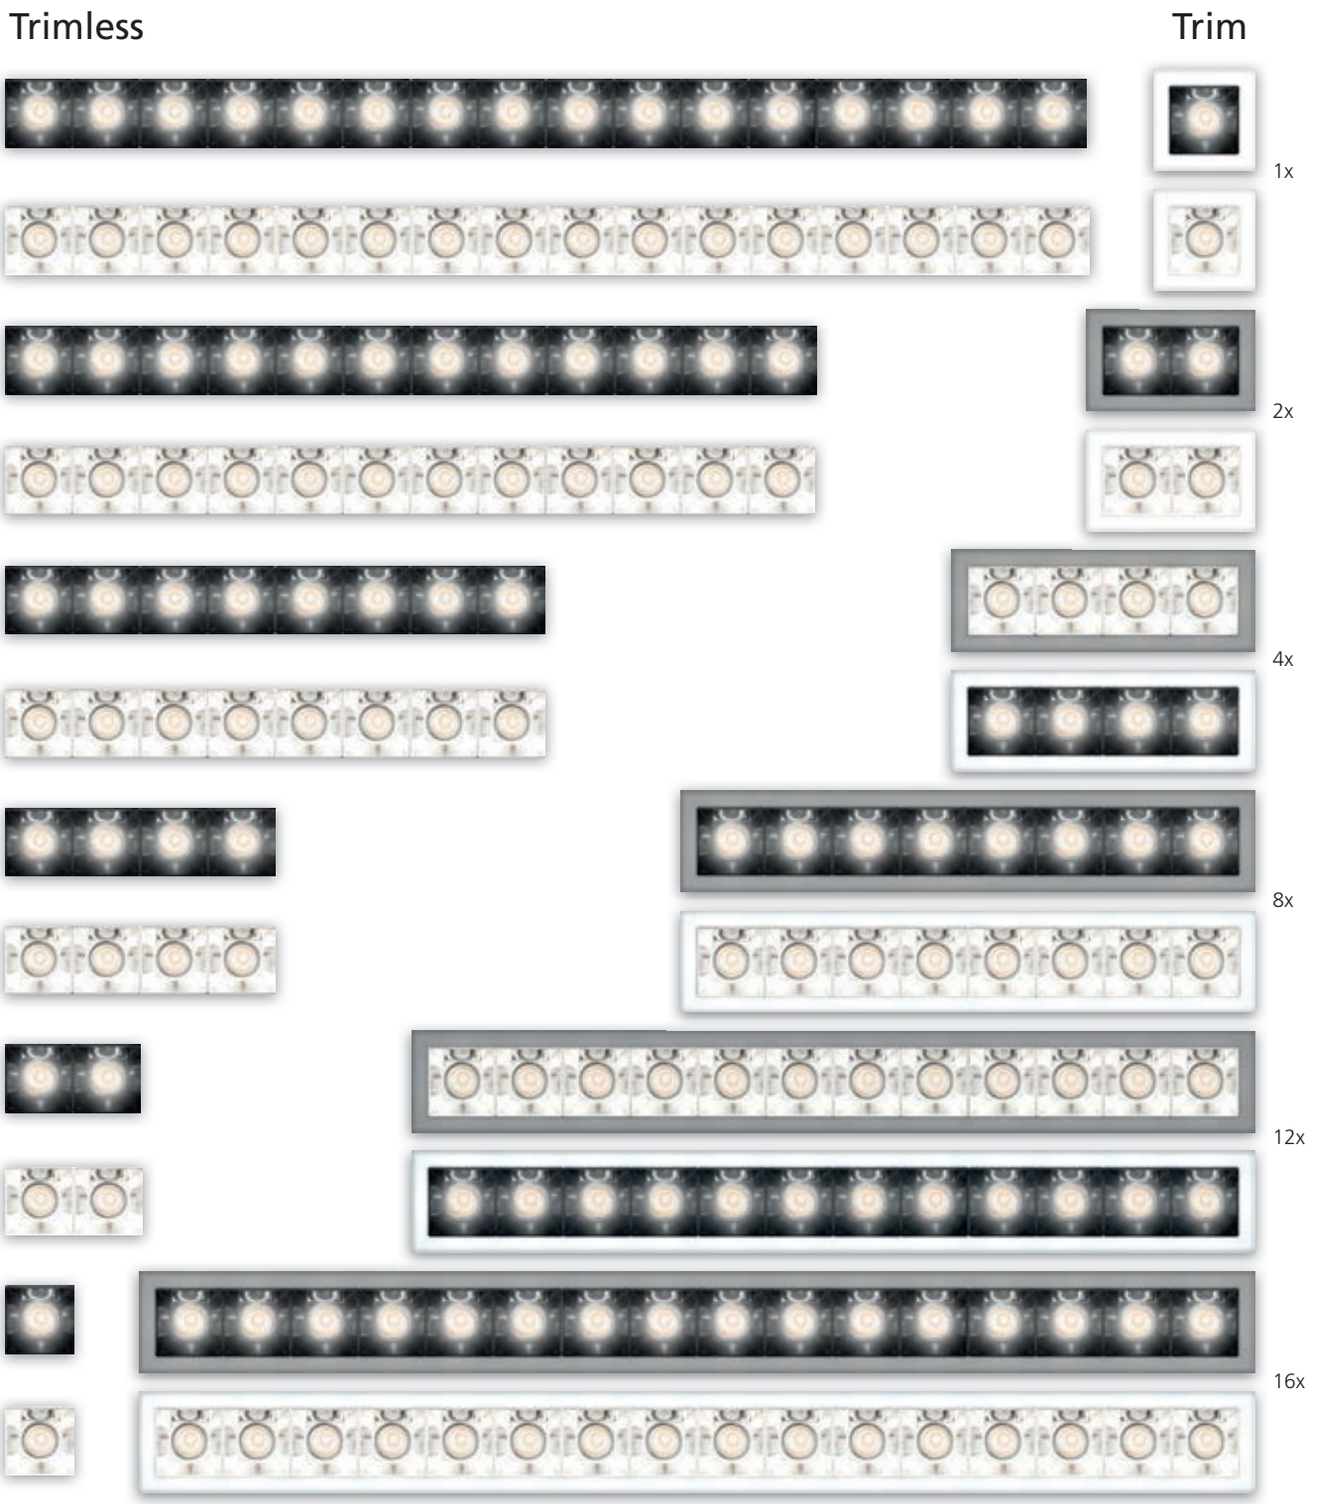

- LED 3 / 44 W
- 200 / 3597 lumen
- Beam: 17° / 34° / 54°
- CCT 2700K / 3000K / 4000K
- CRI=90 (min.)
- IP20

- A patented high-efficiency optical system combining a polynomial optical unit with geometric screening of the beam's viewing angle.
- Highly uniform lighting and full emission control.
- Total absence of any lighting defects, such as spots or multiple shadows.
- Recess depth 60 mm.
- Suited for 1 to 25 mm ceilings.
- Available in the trim, trimless and SMD versions.

- LED COB
- 1,4W / 6,4W / 13W / 24,4W
- 70 / 1957 lumen
- MacAdam 3SDC
- Beam: S / F / WF
- CCT: 2700K / 3000K
- CRI=80 (min.) / =90 (min.)
- Life=L70 (6K)=50000h
- IP20 / IP44

30° 360°

- 5 dimensions: 35 mm, 55 mm, 80 mm, 105 mm, 150 mm.
- Different options available: fixed or adjustable (excluding Everything 35), round or square, trim or trimless.
- LED versions use an optical system based on a hybrid technology (lens and reflector) producing defined beams with high-power LEDs.
- The extruded aluminium heat sink guarantees great thermal management, long life and high efficiency, while providing maximum luminous flux.

- Adjustable versions (excluding Everything 80 option) are equipped with a blocking system to guarantee perfect framing.
- Rotation up to 360°, beam angle +30°/-30°.
- Separate electronic driver: non-dimmable or DALI dimmable options for LED products.
- Compliant with standard EN60598-1 and other specific regulations.

PAD 80

Carlotta de Bevilacqua
2012

- 9 LED 9,5W
- 710 - 810 lumen
- MacAdam 4SDC
- Beam: S / F / WF
- CCT: 3000K / 4000K
- CRI=80 (min.)
- Life L70(4K) 60500h
- IP20 / IP40

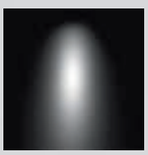

- Efficient, clear accent lighting, fixed and adjustable.
- Excellent lighting efficiency > 70lm/W.
- High adjustability: 360° rotation, +90°/-90° tilt angle.
- Fixed version available as IP44.
- Easy installation of light modules, no tools required.
- Lighting units available in 3 finishes: gloss aluminium, painted white, painted black.
- Structural elements of recessed-mounted version available in 3 sizes, for use with 1, 2, 3 and 2x2 modules. 3 compatible finishes (polished aluminium, white, and black).
- Housing of ceiling-mounted version available in 3 sizes (1, 2, 3 lighting units), and 3 compatible finishes (polished aluminium, white and black).
- Recessed-mounted version available as trimless or framed.
- Materials: body in anodised extruded aluminium, diffuser in opal polycarbonate.
- Complies with standard EN60598-1 and other specific standards.

S = spot
(8°-15°)

F = flood
(15°-30°)

WF = wide flood
(30°-45°)

Una Pro 75

Carlotta de Bevilacqua
2010 - 2011

Una Pro 75

- 4 LED 6W / 2x4 LED 14 W
- 297 / 680 lumen
- MacAdam 4SDCM
- Beam: XS - F - WF
- CCT 3000K / 3700K
- CRI = 80 / 85
- Life = L70(10K)=50000h
- IP20 (IP44)
- Una Pro 75 ADJ recessed ⊡, Una Pro 75 SMD ⏚

- High-power LED lighting appliance mounted on a thin (3 mm) flat aluminium sheet with improved heat dissipation.
- Each head accommodates 4-LED circuits.
- Available with three different emissions: 6°, 20°, 38°.
- The different versions feature 1 or 2 heads.
- The junction allows 360° rotation and 30° tilting in all directions.
- The addition of a clear cap with magnetic joint allows to reach protection rating IP44.

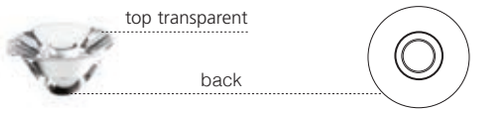

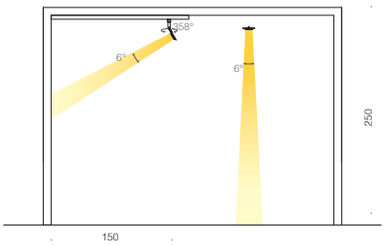

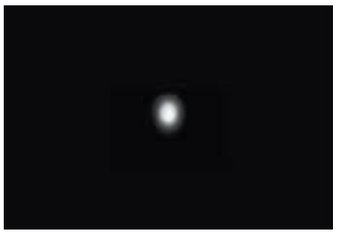

Beam Angle

6° - Extra Spot

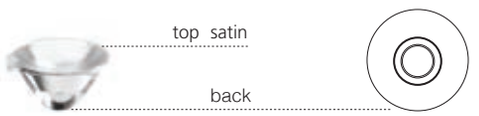

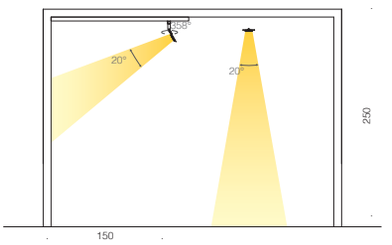

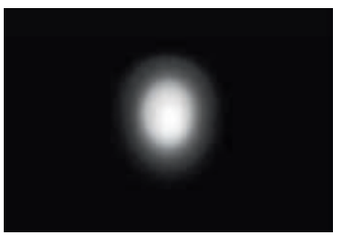

XS = extra spot (<8°)

20° - Flood

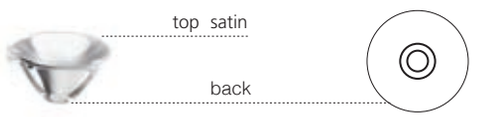

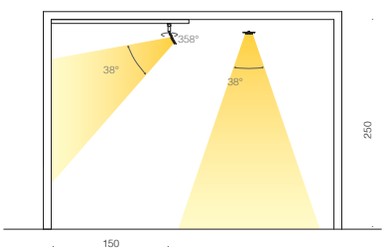

F = flood (15°-30°)

38° - Wide Flood

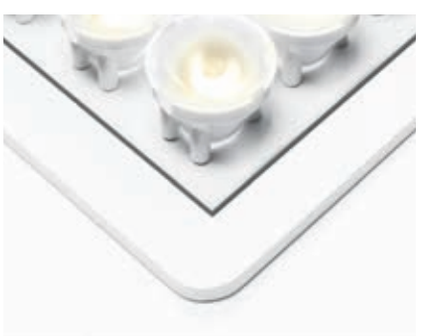

WF = wide flood (30°-45°)

Black

White

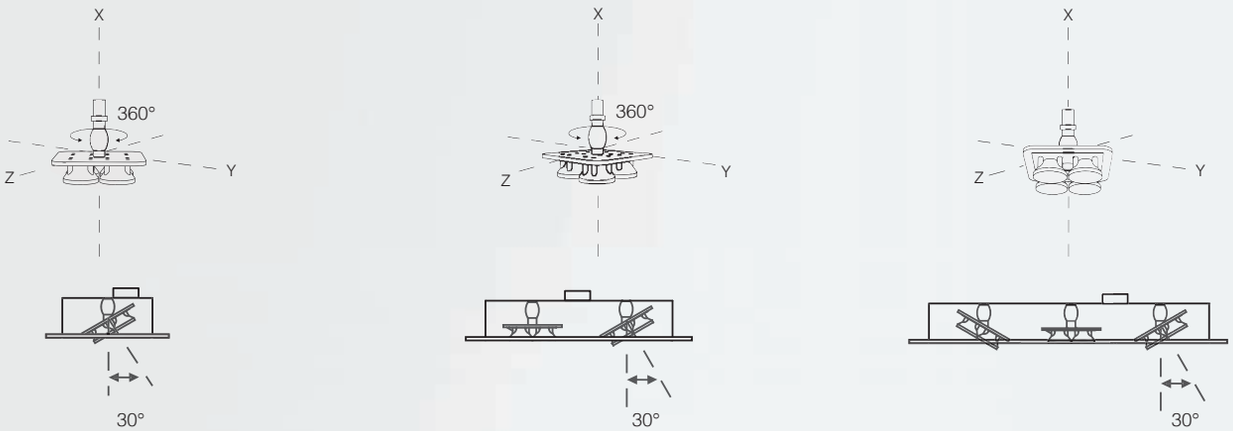

Black

Una Pro 75 Joint

The junction allows 360° rotation and 30° tilting in all directions. This movement is suited either to reach any individual points on horizontal or vertical surfaces requiring accent light or to evenly distribute the emitted light through space.

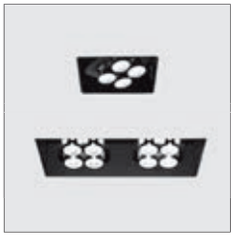

Each 4-LED head in the multiple compositions can be adjusted individually, so that each light beam can be directed independently of the others to stress different points in space by installing one appliance.

Luceri LED

Studio Artemide
2011 (Luceri LED)
2013 (Luceri Kadro LED)

- LED COB
- 19 W - 29 W
- 1581 - 2682 lumen
- MacAdam 3SDCM / 2SDCM (High-Performance versions)
- Beam: XF
- CCT: 3000K / 4000K
- CRI = 80 / 90
- Life=L70 (6K)=36000h
- UGR < 19
- IP44 / IP54 ⧈

XF= Extra Flood
(>45°)

- Recessed fixed downlighters using high-output LEDs.
- Two versions: trim (with bezel) and Trimless (recessed ceiling mounted without bezel)
- Available in 2 versions, each with 2 levels of power:
  Standard version non dimmable, CRI=80 (min)
  High-performance version with net efficiency up to 94lm/W, DALI, CRI=90 (min), with Cree True White (R) technology. Colour temperature and colour rendering index constant throughout the product lifespan.
- Materials: bezel, white reflector and screens in polycarbonate, reflectors in vacuum-metalled polycarbonate with anti-scratch surface treatment.

- Standard version IP44.
  IP54 with the addition of an optional screen.
- Compliant to standard EN60598-1, EN62471 and other specific standards.

Luceri LED

Luceri LED trim

Grey frame

Luceri LED trim

- Complete with optic housing and trim.
- Trim available in white or grey.
- Professional mirror optic with UGR Luminance Control <19 for office spaces with computer screens.
- Installation brackets for an easy, tool-free installation on false ceilings of thicknesses between 1 and 25 mm.
- Optional screens in transparent polycarbonate, easy to install, opal and prismoptic diffuser, with a 90 degree turn.
- Integral power supply.
- Wide beam symmetrical distribution.

Luceri LED trimless

Sharp edge trim

Rounded edge trim

Luceri LED trimless

- 2 available trims:
  Sharp edge
  Rounded edge
- 2 available optic housings.
- Professional mirror optic with UGR Luminance Control <19 for office spaces with computer screens.
- Comfort white optics
- Optics housings and trim to be ordered separately.
- Optional screens in transparent polycarbonate, easy to install, opal and prismoptic diffuser, with a 90 degree turn.
- Integral power supply
- Wide beam symmetrical distribution.

Luceri Fluo

Studio Artemide
1998

- Fluo 2x18 W, 2x26 W
- 914 / 920 / 938 / 1213 / 1708 lumen
- Beam: XF
- IP23 / IP29

XF = Extra flood
(>45°)

- A range of recessed downlights fluorescent lamps.
- Body made from technopolymers. Reflector in vacuum-metallised polycarbonate with anti-scratch surface treatment.
- Decorative ring made from aluminium or injection moulded plastic, available in 2 colour options, with or without screen Fitting is made by one quarter turn rotation.
- The Luceri screen dark light optic ensures a controlled luminance level of less than 200 cd/m² for an observation angle of 65° or above with respect to the vertical axis, well within the limits set by standard EN12464-1.
- Low recess depth for ceilings of 1mm to 35mm thick.
- Electronic ballast and emergency lighting.
- Electrical connection by means of quick connectors.
- Bridging connection possible.
- Complies with standard EN60598-1 and other specific standards.

- Light fixture with high-performance LED light sources.
- Low recessed depth.
- Consists of: body, frame, black silkscreened tempered glass, fixing springs.
- Body in EN AB44100 aluminium, silicone gaskets.
- Frame in aluminium.
- Black silkscreened tempered glass, 4mm-thick.
- Fixing springs in harmonic steel.
- Power connection to the mains by means of a H05RN-r cable and IP68 electrical terminal board, supplied with the fixture.
- Glass surface temperature lower than 40°C.
- Fixed optics. PMMA lenses in 2 different versions of beams.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxydant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.

Structural module Trim

Structural module suspension, ceiling, wall

- Algoritmo system is particularly flexible; it allows different lighting solutions to be coupLED through the same shared electrical system. Fluorescent diffused or dark light version, LED diffused or wall washer in warm (3000 K) or neutral white (4000 K), RGB LED, LED controlLED and prismoptic, accent lighting.
- Installation in line or at a 90° angle.
- Algoritmo system is composed of:
- Structural modules in extruded aluminium, available in different lengths depending on the installation option and 3 finishes, white, black and silver.
- Gear plates with through-wiring and rapid connectors.
- Supplementary through-wiring with rapid connection.
- Optical systems: diffusers, dark light optics for fluorescent version, controlled optics for LED, wall washer optics for LED, 3 white LED monochromatic projectors (pad, pad square and 37 cube).
- End caps and joints.
- Supplying cables.
- Pre-cabLED white LED (MV) plates equipped with electronic or electronic dimmerable driver (DALI). Pre-cabLED RGB LED (LV) plates.
- Fluorescent gear plates with electronic or 'multiwatt' dimmable electronic supplyer 28/54w (DALI). T16 seamless tubes to be ordered separately.
- Power supply and LED management systems (LV) to be ordered separately.
- Compliant with standard EN60598-1 and other specific standards.

SUSPENSION, CEILING, WALL

RECESSED

Fixing components +	**Junction components +**	**Junction components +**	**Pre-wired gear plates +**
			
Wall bracket to connect a suspended module to the wall.	End caps. (set of 2)	End caps.	Pre-wired gear tray for white LED diffused, prismotic, controlled and wall washer. MV through-wiring included.
			
Wall / ceiling fixing bracket.	Linear connector.	Vertical joint to connect two recessed modules on the same plane.	Pre-wired gear tray for RGB LED diffused. LV through-wiring included.
			
Suspension cable (no supply).	90° angle for the mechanical connection of two recessed modules on one same plane.	End caps.	Pre- wired gear tray for track.
			
Suspension kit with supply.	90° angle. For the mechanical connection of 2 modules on two perpendicular planes.	Vertical joint to connect two recessed modules on the same plane.	Pre-wired gear tray for accent lighting unit. PAD, PAD square and 37 Cube to be ordered separately. MV through-wiring included.
			
		Horizontal joint to mechanically connect two recessed modules on the same plane.	Pre-wired gear tray for fluorescent tubes T16-SLS. MV through-wiring included.

Electrical Components +

Optional through-wiring. To be used with mixed installations combining LV and MV pre-wired gear trays.

Power supply kit.

Electrical connector* to couple Algoritmo LED System (LV) with wall- and floor- recessed modules of Algoritmo Floor (LV), powered through the same shared electrical circuit.

*Only for RGB LED

Optical systems +

Opal polycarbonate diffuser for white LED and diffused RGB versions.

ControlLED Optics for white LED version.

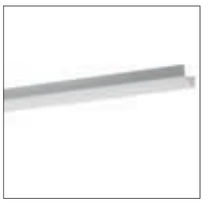

Prismoptics optics for white LED versions.

Polycarbonate optics for white LED wall washer versions.

Dark Light optics for fluorescent versions.

PMAA opal diffuser for fluorescent versions.

Junction components +

Junction to be fitted to the module on the same plane.
Compatible with the junction for the same plane.

Spotlights +

37 Cube for Algoritmo System.

PAD for Algoritmo System.

PAD Square for Algoritmo System.

Power supplies and control systems

Electronic power supply IP67.

Control interface: IP20 and IP67. Allows management of multiple (LV) Algoritmo System and/or Algoritmo Floor.

Algoritmo Controlled - Prismoptic Emission

Algoritmo Controlled Emission

Patent pending (IT) n° MI2013A001711

Controlled emission LED optic System
UGR index control and 65° luminance (EN 12464)

Patent-pending proprietary optic system made by a thin black square-meshed grid and by a system of square plano-convex lenses of appropriate beam angle. The internal part of the grid is white painted and has a high reflection coefficient, so that the light incident on the grid is retrieved within the Algoritmo body.

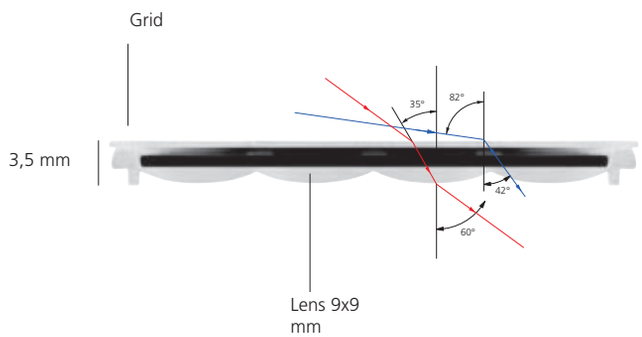

A net 'cut off' at the required angle is obtained through this system.
The convex profile of the lens is designed with images optic techniques, so that the emission is limited within the 65° required by standard EN 12464.

UGR<19
Angle luminance equals to 65° and beyond:
<3,000 cd/m2.

Operating diagram of the optical device used on Algoritmo:

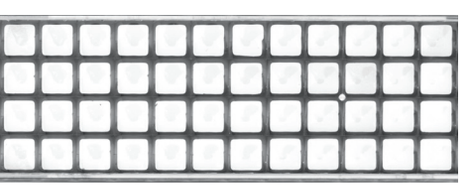

The grid positioned over the lenses allows only the rays falling into the required output angular limits to be incident to the lenses.
The rays beyond these limits are recovered and redirected inside the light box (if the ray is incident to the white surface) or cancelled (if the ray is incident to the black edge).

Functioning scheme

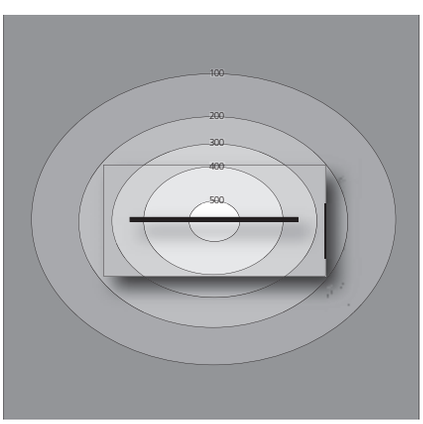

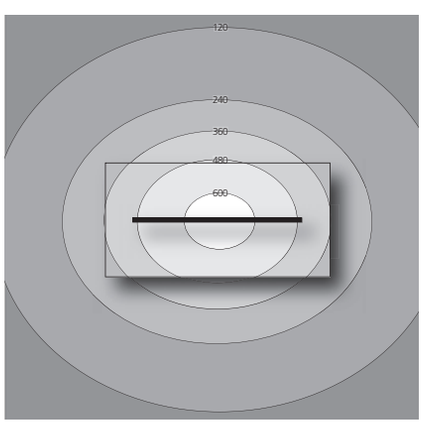

light ON

light OFF

Direct emission

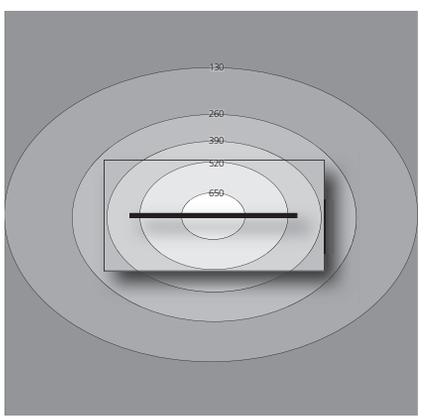

Direct emission + indirect

Algoritmo Prismoptic Emission

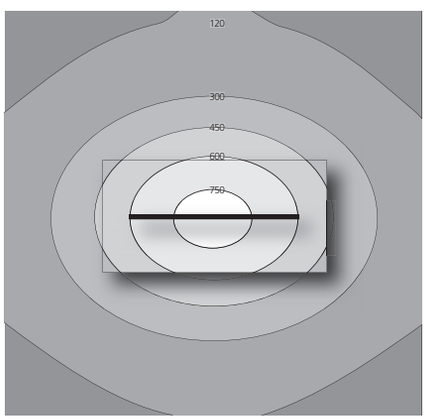

Comfort emission

The appliance is fitted with a clear plastic screen featuring an outer micro-prism pattern designed in order to obtain a focused luminous emission mostly within a 2x60° cone.
With this technology, Algoritmo Prismoptic provides comfort lighting even when the appliance falls within the observer's visual cone.

A.Sharping

Patent Pending N° MI102016000031730

- Algoritmo Sharping is very flexible and it allows to combine in continuity Sharp light modules, with indirect and diffused LED lighting in warm white (3000K) and neutral white (4000K).
- Structural modules are in extruded aluminum, available in different lengths depending on the installation option, three finishes (white, black, silver or gloss anodized), two optic finishes (black and white) and three beams (17°, 34° and 54°).

Algoritmo LED management

Steelcase Headquarters and showroom Madrid. Arch.: John Small, architect and director of design for Steelcase International. Photo: Juanjo Fernández

Power supply/light management system for LED*

Electronic power supply
IP67. Input voltage range: 90-264VAC / 47-63 VDC.
Output voltage: 48 VDC. Protection against overcurrent, overvoltage, short-circuit and overtemperature, with automatic restart.

	Code
100 W For voltage up to a total 90 W. 220x68x38 mm.	M075000
240 W For voltage up to a total 225 W. 244x68x39 mm.	M075100
320 W For voltage up to a total 300 W. 252x90x44 mm.	M076100

IP67

Control interface
Control interface
For managing groups of Algoritmo System LED RGB and/or white LED/RGB Algoritmo Floor lighting units.
Integrated sequencer for stand-alone operation with predefined colour sequence. Possibilty of master-slave configuration.
DALI or DMX light management systems are not included.

IP20

	Code
IP67. Compatible DALI-Switch Dimm 310x168x90 mm.	M077000
IP67. Compatible DALI-Switch Dimm or DMX. 310x168x90 mm.	M077100
IP20. Compatible DALI-Switch Dimm Suitable for DIN rail mounting. 106x90x70 mm.	M077200
IP20. Compatible DALI-Switch Dimm or DMX. Suitable for DIN rail mounting. 106x90x70 mm.	M077300

For electrical diagram, please see page 346

Closure screens for 90° angles

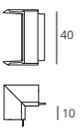

Junction to be fitted to the module on the same plane
Compatible with the junction for the same plane.

	Code
For continuity between LED diffused emission modules.	M198100
For continuity between dark light fluo emission, LED emission modules and spot modules.	M198000
For continuity between wall-washer LED emission modules.	M198200
For continuity between Fluo diffused emission modules.	M197900

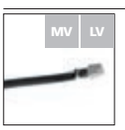

2-plane joint
To be clipped to the module.
Compatible with connectors for 2 modules on perpendicular planes.

	Code
For continuity between LED diffused emission modules.	M198500
For continuity between dark light fluo emission, LED emission modules and spot modules.	M198400
For continuity between wall-washer LED emission modules.	M198600
For continuity between Fluo diffused emission modules.	M198300

Electrical components

Supplementary through-wiring (optional).
To be used in mixed configuration with LV and MV pre-cabLED gear trays.

		Code
LV	1184 mm	M198800
LV	2368 mm	M199000
MV	1184 mm	M198700
MV	2368 mm	M198900

Electrical connector *
To couple wall-surface or floor-recessed LED Algoritmo System modules, powered through the same electrical circuit.
* Only for RGB LED

Code: M221900

Supply Kit
Allows for connection of the mains to the first pre-wired gear plate of the initial module.To be used only with recessed and surface installation.

	Code
LV (3xmax 1,5 mm²) To power LED RGB trays.	M073230
MV (7xmax 1,5 mm²) To power fluorescent modules, white LED plates and accent modules.	M073240

Algoritmo Floor

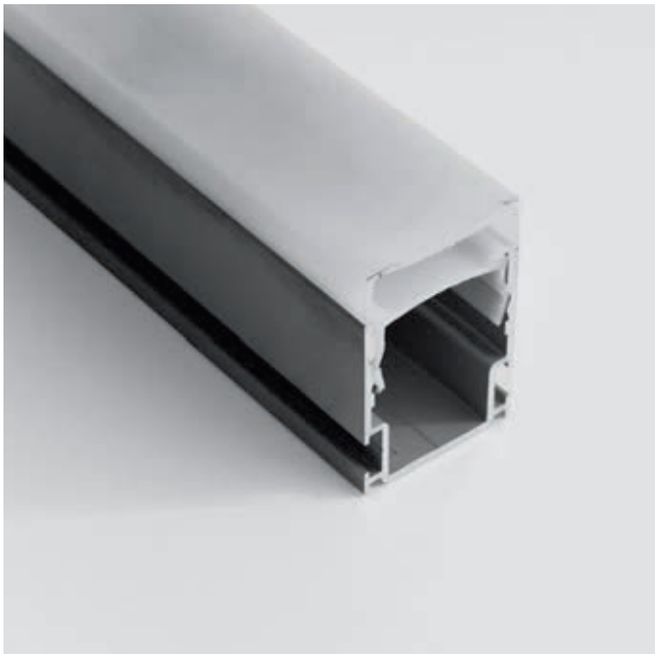

Algoritmo Floor Components

- Algoritmo floor is a floor recessed-mounted LED lighting system designed to create narrow, light lines.
- Ideal to structure spaces, draw borders within architecture or create orientation lighting.
- IP67. Available only for indoor use.
- System including RGB LED body lamps, available as monochromatic warm or neutral white, and a recessing profile.
- The extremely compact dimensions allow a minimal visual impact on the architecture.
- Light fitting in extruded aluminium with anodised finish, seaLED by an 8-mm thick diffuser in tempered glass.
- Available in 3 lengths: 600 mm, 900 mm, 1200 mm.
- Power supply and light management system to be ordered separately.
- Recessing profile in extruded aluminium to be ordered separately.
- Available in two lengths (1300 and 4900 mm), to be cut on site to the required configuration.
- Static load resistance: 5000 n.
- Lighting unit provided with quick-connector system for easy bridging connection.
- A proprietary low tension bus enables long distances to be covered without additional electrical supply.
- Not suitable for wall or ceiling installation.
- Complies with standard EN60598-1 and other specific standards.

Recessing profile **+**

Recessing profile
in extruded aluminium.
To be cut on site
to the required dimension.
Length 1300 mm
Length 4900 mm

Recessing components +

End caps (set of 2).

Fixing brackets (set of 4).

Straight mechanical connector (set of 2).

Body lamps +

White LED body lamp.
LV integrated through-wiring.

RGB LED body lamp.
LV integrated through-wiring.

Cables + Electrical components

Power supply cable set.
Consists of one power supply cable (3x0.75mm^2) + 1 blanking plug for sealing the last luminaire of the row.

Extension cable
3x 0.75 mm^2.

Electrical connector*
for coupling wall-surface mounted LED modules of ALGORITMO SYSTEM LED RGB with floor-recessed modules of ALGORITMO FLOOR, powered through the same shared electrical circuit*
Only for RGB LED.

Power supplies and control systems

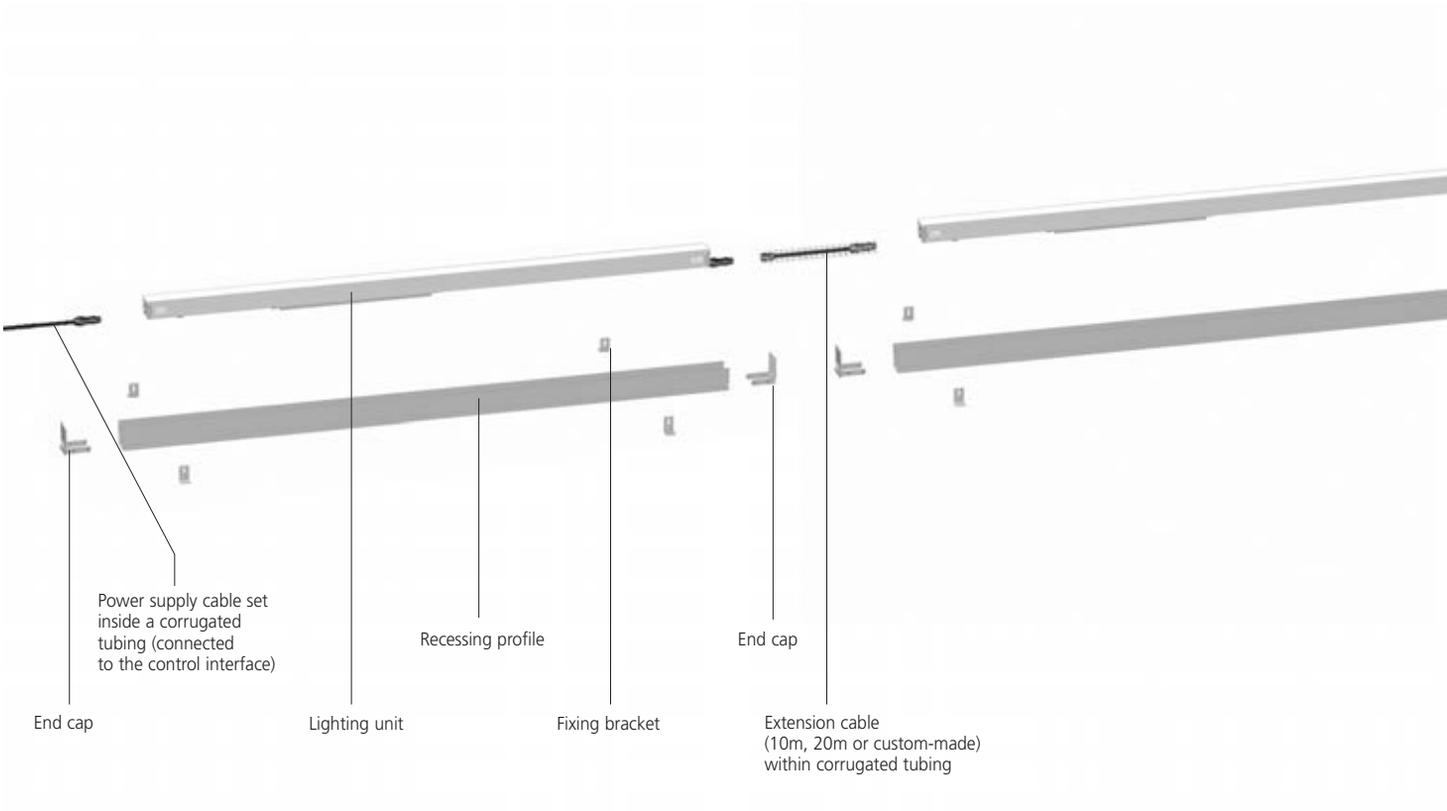

Electronic power supply IP67.

Control interface:
IP20 and IP67.
Allows management of multiple RGB (LV) Algoritmo System and/or Algoritmo Floor.

Algoritmo Floor Installation

Single lighting units, or the lighting units starting and ending a row can be 900 or 1200 mm, but never 600 mm.

Nothing 86 System Recessed ceiling Components

Structural modules +

Structural module
for recessed wall installation.
Trimless ring,
needs plaster finish.
End caps, angles,
intermediate connectors
and optics to be ordered
separately.

- Recessed ceiling and suspension modular system.
- Components: structural modules in extruded aluminium, pre-wired gear trays and optics.
- Structural modules available in 10 lengths (from 237 to 2340 mm) and, thanks to their flexibility, can house and freely alternate light sources.
- The original sequence can be modified over time, provided the total length of the system is kept the same.
- Linear fluorescent sources with diffused or dark light emissions, white or RGB LEDs with diffused emission, spot modules for accent lighting can be alternated to customize the sequence, with or without fluorescent indirect emission.
- Feeding plates with through-cabling and rapid connectors.
- To remove shadows in the joining area between 2 fluorescent lights, T16-Seamless lamps or traditional T16 fluorescent tubes with overlapping arrangements for uninterrupted light lines.
- 2 LED versions: with monochromatic warm white emissions (3000K), neutral white emission (4000K) and RGB emission.
- Same-plane angular configurations available, perpendicular angular configurations available on request.
- Compliant with standard EN60598-1 and other specific standards.

Junction components +

End caps.
(set of 2)

Intermediate connector.
(to be used for combining
spotlighting modules
with dark light or diffusing
emission).

90° angle.
(to mechanically connect 2
recessed modules on the
same plane).

Pre-wired gear trays +

Pre-wired gear tray
for white LED direct
diffused emission
prismoptic.
Integrated
MV through-wiring.

Pre-wired gear tray
for white RGB LED direct
diffused emission.
Integrated
LV through-wiring.

Pre-wired gear tray
for fluorescent T16 tubes.
Diffused direct emission.
Integrated
MV through-wiring.

Pre-wired gear tray
for fluorescent T16 tubes.
Dark light diffused
direct emission.
Integrated
MV through-wiring.

Pre-wired gear tray for
fluorescent T16-SLS tubes.
Diffused direct emission.
Integrated
MV through-wiring.

Accent modules.

Electrical components +

Supplementary
through-wiring (Optional).
To be used in configuration
with LV and MV pre-cabled
gear trays.

Power supply kit.

Optical system +

Opal diffuser in polycarbonate
for LED diffused versions.

Opal PMMA diffuser
for fluorescent versions.

Dark light optics
for fluorescent versions.

Prismoptics optics for white
LED versions.

Closing / joining screens +

Junction to be fitted
to the module on the same
plane.
Compatible with the junction
for the same plane.

LED power supplies and control systems

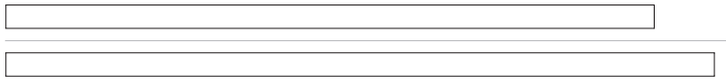

Electronic power supply
unit. IP67.

Control interface:
IP20 and IP67.
Allows management
of groups of LV fittings.

Nothing 86 System Ceiling/Suspension Components

Structural modules +

Structural module
for ceiling-
or suspended-mounting.
End caps, angles, fixing
components, plates
and optics to be ordered
separately.

- Ceiling-mounted and suspended modular system.
- Components: structural modules in extruded aluminium, pre-wired gear trays and optics.
- Structural modules available in 12 lengths (from 237 to 4680 mm) and, thanks to their flexibility, can house and freely alternate luminaires.
- The original sequence can be modified over time, provided the total length of the system is kept the same.
- Linear fluorescent sources with diffused or dark light emissions, white or RB LEDs with diffused emission and prismoptic, spot modules for accent lighting can be alternated to customize the sequence, with or without fluorescent indirect emission.
- Supply plates with through-wiring and rapid connectors.
- To remove shadows in the joining area between 2 fluorescent lights, T16-Seamless lamps or traditional T16 fluorescent tubes with overlapping arrangements for uninterrupted light lines.
- 2 LED versions: with monochromatic warm white emissions (3000K), neutral white emission (4000K) and RGB emission.
- Same-plane angular configurations available, perpendicular angular configurations available on request.
- Compliant with standard EN60598-1 and other specific standards.

Installation components +

Ceiling fixing bracket
(1 piece)

Steel suspension cable
(1 piece)

Suspension set with steel
cable and power supply
cable (1 piece)
Length 2000mm

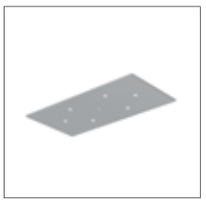

Junction components +

End caps
(set of 2)

Intermediate joint
(to be used for combining
spotlighting modules with
fluorescent modules with
dark light or diffusing
emission)

Linear connector

90° joint
(to connect two modules
on one same plane).

Pre-wired gear trays +

Pre-wired gear tray
for white LED direct
diffused emission and
prismoptic.
Integrated
MV through-wiring.

Pre-wired gear tray
for white RGB LED direct
diffused emission.
Integrated
LV through-wiring.

Pre-wired gear tray
for fluorescent T16 tubes.
Diffused direct emission.
Integrated
MV through-wiring.

Pre-wired gear tray
for fluorescent T16 tubes.
Indirect emission.

Pre-wired gear tray for
fluorescent T16-SLS tubes.
Diffused direct emission.
Integrated
MV through-wiring.

Pre-wired gear tray
for fluorescent T16 tubes.
Dark light direct emission.
Integrated
MV through-wiring.

Accent modules.

Electrical components +

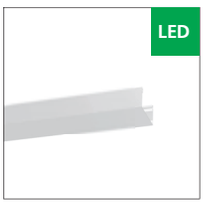

Supplementary through-wiring
(Optional).
To be used in configuration
with LV and MV pre-cabled
gear trays.

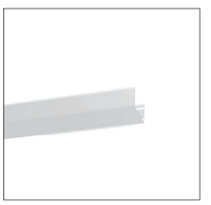

Power supply kit.

Optical system +

Opal diffuser in polycarbonate
for LED diffused versions.

Opal PMMA diffuser
for fluorescent versions.

Dark light optics
for fluorescent versions.

PMMA prismoptics optics.

Closing / joining screens +

Joints between each two
modules on the same level.
Compatible with joints for
connection on the same
level.

LED power supplies and control systems

Electronic power supply
unit. IP67.

Control interface:
IP20 and IP67.
Allows management
of groups of LV fittings.

Power supply/light management system for LED*

Electronic power supply
IP67. Input voltage range: 90-264VAC / 47-63 VDC.
Output voltage: 48 VDC. Protection against overcurrent, overvoltage, short-circuit and overtemperature, with automatic reactivation.

	Code
100 W For feeding up to a total 90 W. 220x68x38 mm.	M075000
240 W For feeding up to a total 225 W. 244x68x39 mm.	M075100
320 W For feeding up to a total 300 W. 252x90x44 mm.	M076100

Control interface
It allows the management of LED rgb groups of Nothing 86 System devices through Dali or Dmx light management systems (not included).

IP67

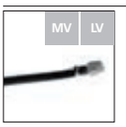

Integrated sequencer for stand-alone operation with predefined colour sequence. Possibilty of master-slave configuration.

IP20

	Code
IP67. Compactible DALI-Switch Dimm 310x168x90 mm.	M077000

Smart Office

Design Office
2016

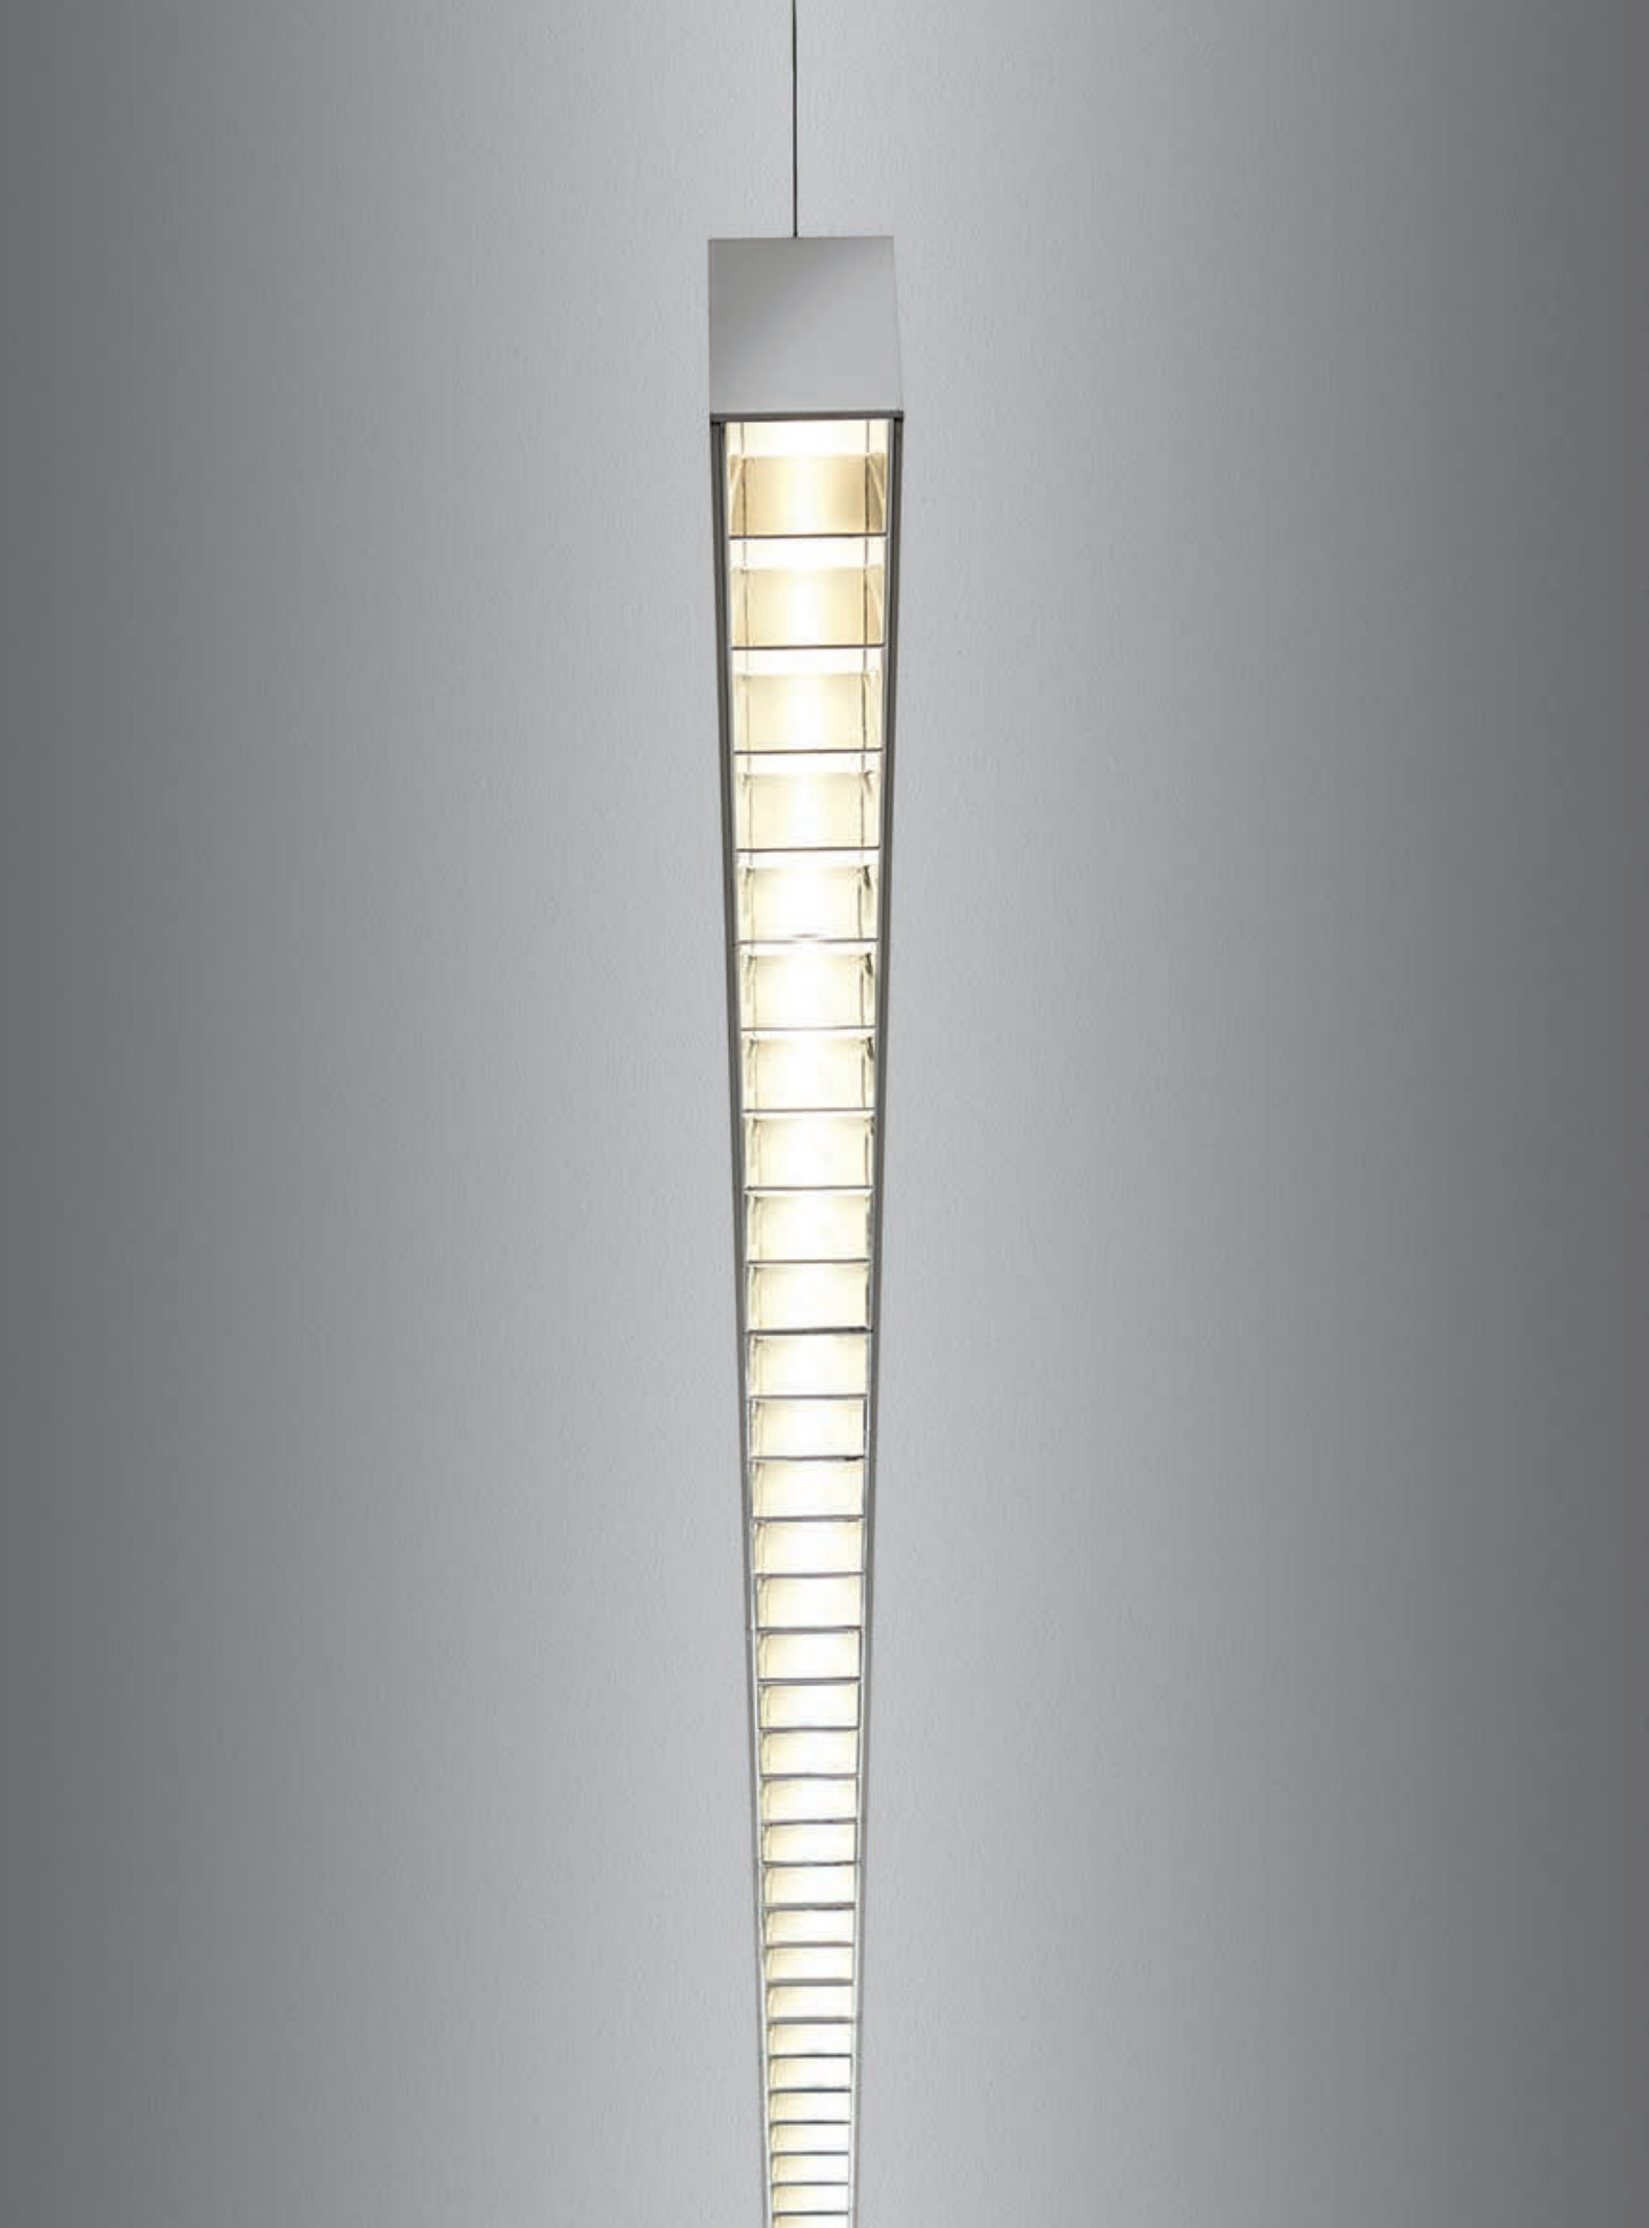

- LED 37 / 81 W
- 3842 / 7685 lumen
- CCT: 3000 /4000
- Beam: XF
- CRI= 80
- UGR < 19
- IP20 ⏚

- Dedicated office suspension ensuring top performance with utmost formal simplicity.
- Highly uniform emission, without multiple shadows or spots.
- Innovative optical system: the light emitted by a LED strip is controlled by a mixing chamber before emission through a traditional lamellar optical unit.
- Electronic and electronic dimmerable (DALI) powering.
- Two sizes and two power options.

XF = Extra flood
(>45°)

- A system of direct-emission panels with two mounting options – ceiling or wall – in individual or multiple configurations.
- High-efficiency LED Edge Backlighting technology.
- The outer frame consists of a set of protruding wings that collect the emitted light, thus ensuring maximum visual comfort with limited contrast between the appliance and its background.
- Extruded aluminium frame available in 4 colours: white, grey, red and blue.
- Complies with the EN12464 norm, UGR<19.

- Uglare is 600x600 and 300x1200 recessed ceiling light, suited to illuminate working areas with video-terminals.
- Its strong steel and aluminium mechanical construction and high performance (over 100lm/W for the 4000K version), as well as the possibility to adjust the luminous flow, make this appliance ideal to illuminate work areas that require minimum incidence in terms of actual and perceived volumes of lighting systems.

- UGR<19 L< 3000 cd/m²
- IP20

Darklight
(>45°)

- Pendant system with direct-indirect lighting using 28 W and 54 W T16 fluorescent lamps.
- Available as a single pendant light or as a modular system.
- Steel body with a white or grey paint finish, available in lengths of 1234mm and 2416mm.
- Dark light optic made from super pure aluminium.
- Dark light emission is in compliance with EN12464-1 standard, with average luminance levels lower than the 1000 cd/m² limit for an observation angle of 65° or above with respect to the vertical axis.
- Light output ratio: 91% (1xT16) and 87% (2xT16).
- Light distribution: 65% indirect and 35% direct (1xT16), 63% indirect and 37% direct (2xT16).
- Electronic ballast or DALI dimmable electronic ballast.
- The system consists of power supply units with ceiling plate and power supply cable, and continuity modules.
- Intermodule mechanical connection by linear or 90° connectors.
- Electrical connection via quick connectors.
- Quick adjustment steel suspension cables.
- Complies with standard EN60598-1 and other specific standards.

- An aluminium body, featuring alternating vertical and horizontal elements, accommodates the LED.
- The horizontal bands work as optical sectors, appropriately calibrated vs. each other.
- The intertwined vertical and horizontal elements are the result of accurate optical and technological feasibility research for die casting production. They also promote air circulation when the appliance is arranged both vertically and horizontally, and allow natural ventilation by convection in all possible usage configurations.
- Calibration of this structure, in both the small and large version, results in optimal optical darklighting and downlighting performance, thus ensuring high visual comfort.
- A small-sized mixing chamber ensures the controlled direct emission of light rays.
- The optical performance of its mechanical surfaces is a direct result of the production process, which includes the optional finishing of surfaces either with subsequent processing finish or with white paint.
- The white version, with wide-aperture beams, is suited for soft downlighting. The diffusing power of the white surfaces ensures minimal leakage of light emission from within the mesh to give a luminous footprint to the body.

XF = Extra flood
(>45°)

- Suspension appliance with sound-absorbing properties ensured by an unusual sinusoidal cross-section design of the lower surface and the use of a sound-absorbing material.
- Acoustic efficiency is ensured within a limited space by positioning at approximately one metre above the head of the speaker and listener.
- Direct emission: a board with a high number of low-voltage LEDs ensures maximum lighting comfort.
- Reflectors can be rotated for use on single or counterposed double desk.
- Complies with the norms on office activities that involve the use of video-terminals (UGR<19).
- Available in 3 colours (white, grey, green) and 2 different sizes (1600X800mm - 800X800mm).

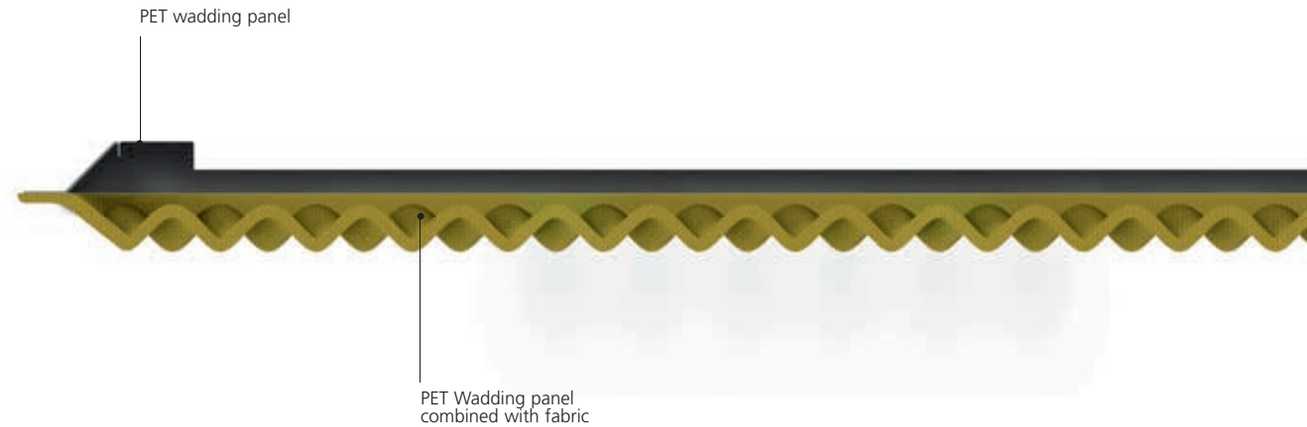

Eggboard acoustic panel

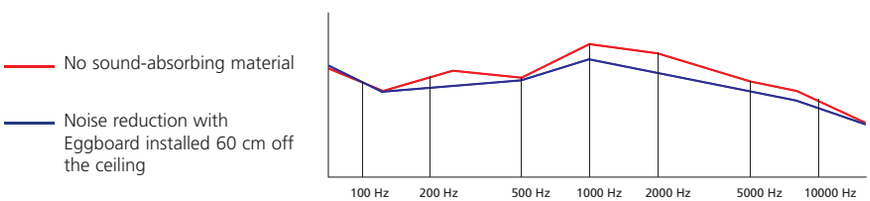

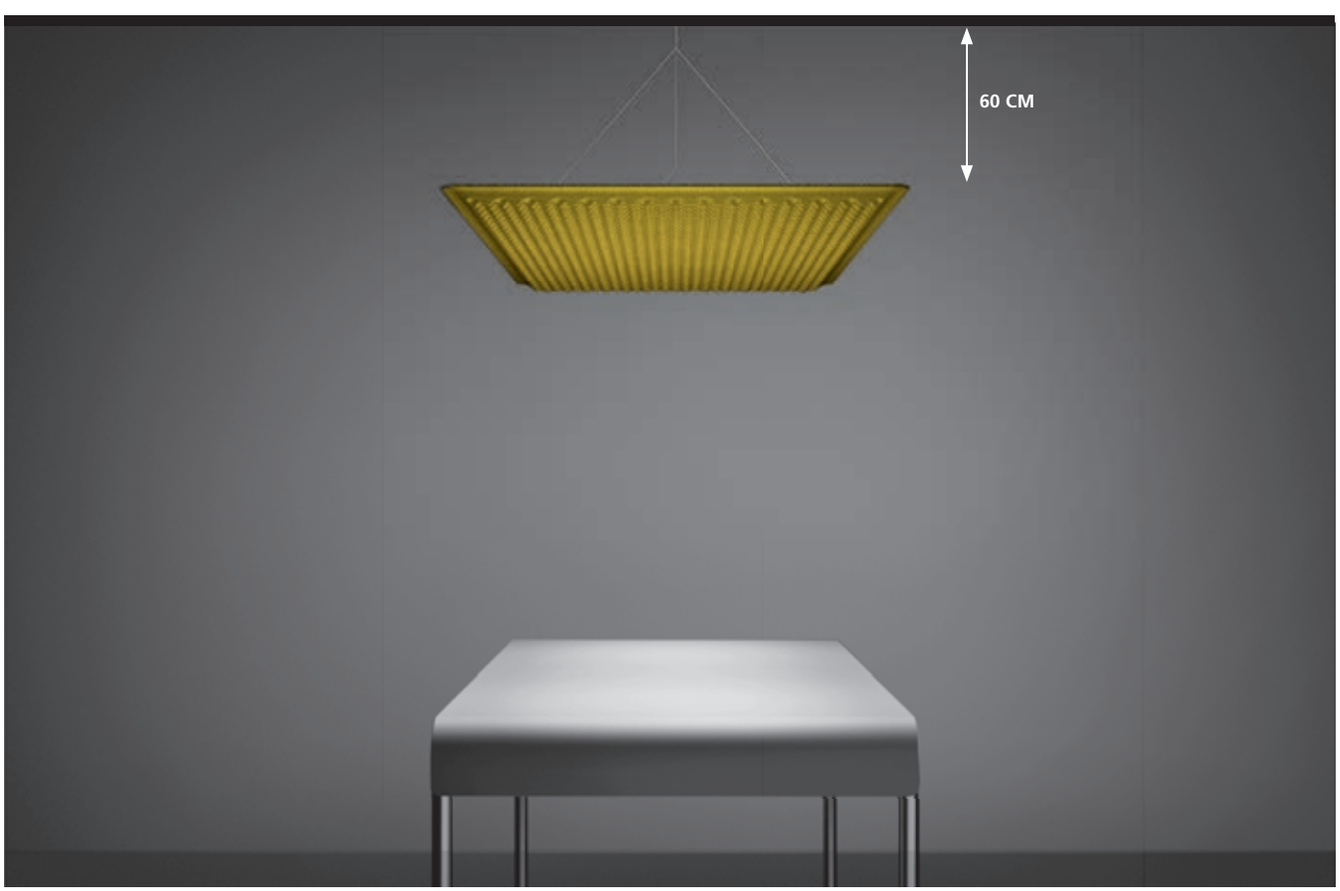

The sound-absorbing material acts by reducing the reverberation time (i.e. the time required to reduce any noise inside the room by 60 db, so as to ensure that any echoes due to reflections on the walls are inaudible).

The frequency of human voice typically ranges from 1 to 4 kHz.

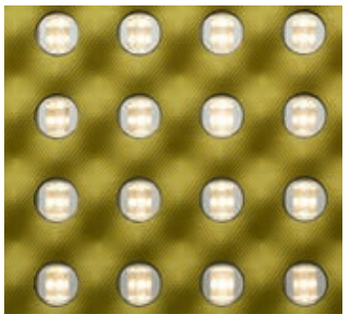

The use of materials capable to reduce these frequencies allows better understanding of speech and prevents the need to talk loudly to cover the background noise.

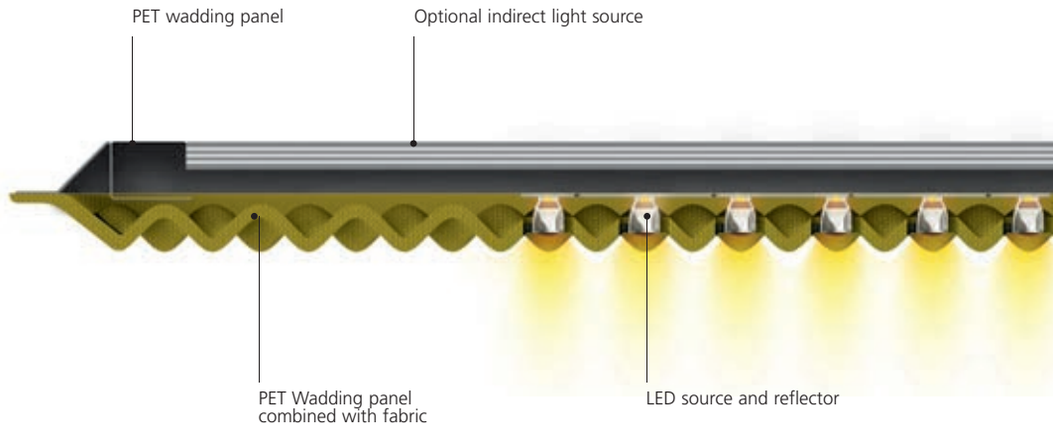

The sound-absorbing appliance should be located 400-600 mm off the ceiling to ensure optimal operation.

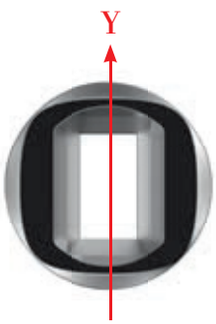

Eggboard Matrix 1 desk

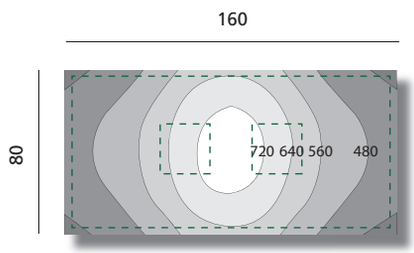

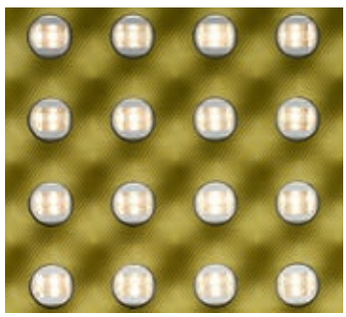

Rotating the elliptic-beam reflector along the Y axis allows to use the product to illuminate one workstation.

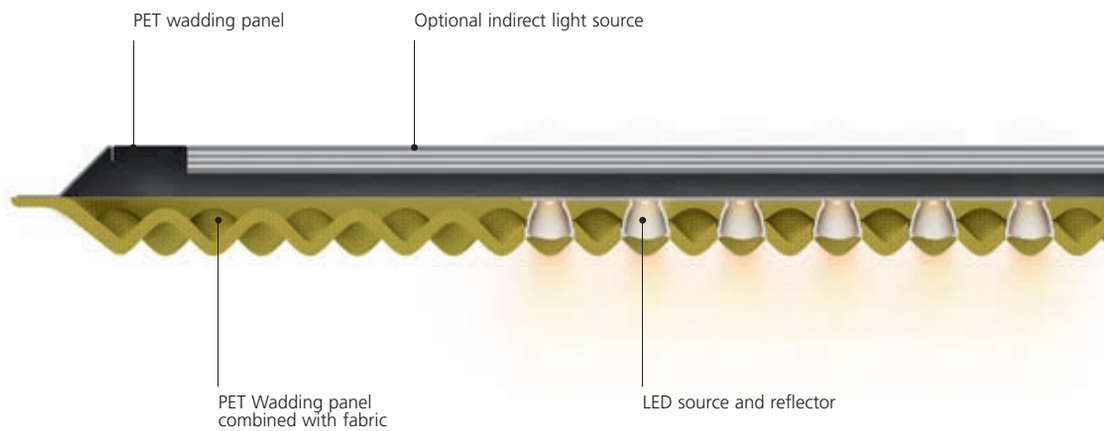

UGR < 12

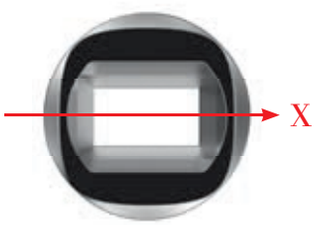

Eggboard Matrix 2 desk

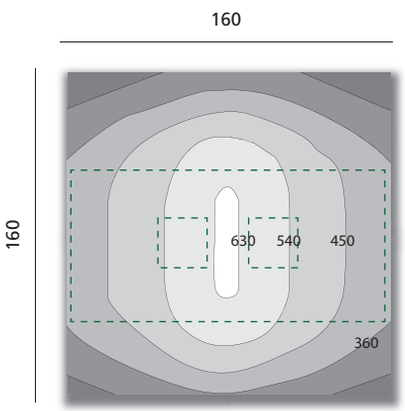

Rotating the elliptic-beam reflector along the X axis allows to use the product to illuminate two workstations.

UGR < 17

- Suspension appliance with sound absorption properties: the material's characteristics and the appliance's geometry ensure a reduced reverberation time.
- The sound absorption effect is optimized for the frequencies of human voice.
- The varying densities of the material used for the lower panel promote the absorption of different frequencies.
- Both the upper and the lower surface of the appliance feature sound-absorbing properties. Appropriate positioning of the appliance in space is crucial to optimize sound absorption.
- Each unit is equipped with 12 30°-adjustable LED spotlights based on a patented system.
- Available in five colour combinations.

- Suspension appliance with sound-absorbing properties: the material's characteristics and the geometry of the dome that captures soundwaves reduce the reverberation time.
- The sound-absorption effect is optimized for the frequencies of human voice.
- Direct and indirect emission.
- Two-colour: the white inside optimizes light diffusion.

Chocolate terra LED

- Luminous flux distribution: Version 1 desk – 800x1600mm: Total flux produced consists of 35% direct emission and 65% indirect emission.
- Version 2 desk – 1600x1600mm: Total flux produced consists of 50% direct emission and 50% indirect emission.
- Two options of light management: dimmable with manual independent control of direct and indirect emission, or Interactive DALI system offering automatic control of illumination on the working plane. A single button allows you to set the desired light with Interactive DALI option.
- 2 colours: brown and white.
- Materials: head and stem in polished aluminium, base in polished aluminium, optics in metallized plastic, diffuser in clear polycarbonate.
- Compliant with standard EN60598-1 and other specific regulations.

Chocolate terra Fluo

- Floor lamp with direct-indirect lighting using 4x24 W or 6x24 W T16 and 2x55w TC-LEL light source.
- Light output ratio: 77% (TC-LEL version) and 67% (T16).
- Light distribution: 32% direct and 68% indirect (TC-LEL version), 34% direct and 66% indirect (T16).
- 4 levels of electronic light management depending on the version: electronic ballast with power switch, dimming control with manual light intensity adjustment, simple motion sensor with automatic on/off switching based on presence and light level, and interactive-DALI system combining a movement detector and a daylight sensor for auto-regulation in relation to people presence and variations in daylight.
- Optical unit and pole made of painted aluminum. Painted steel base.
- 2 colours: brown and white.
- Optics made of transparent polycarbonate fitted with a prismoptic type diffuser.
- Polycarbonate dust protection screen to be ordered separately.
- Complies with standard EN60598-1 and other specific standards.

Chocolate terra LED 1-desk

Chocolate terra LED 2-desks

The innovative optic system,
specifically made with
108 micro-reflectors, allows
a dazzle-free, controlled
and concentrated light emission
for single workspaces
(800x1600mm, 1-desk version)
or double workspaces
(1600x1600mm,
2-desks version).

The aluminium profile works
as heat sink to dissipate heat.

Driver and components
are located in the central
compartment.

The 4 LEDs located
in each corner are protected
by an integral anti-dust screen.

Alphabet of Light

- BIG starts from an abacus of plain elements to design a new font that turns into light and gives life to 29 upper-case letters, 29 lower case letters, and 10 numbers.
- The luminous elements and the joints are made of injection-moulded opaline PMMA.
- The inner elements supporting the LED strips are made of white injection-moulded PC.
- The supporting pins are made of polished aluminium.
- The patented optical principle allows to obtain uniform 360° emission, thus ensuring high system efficiency.

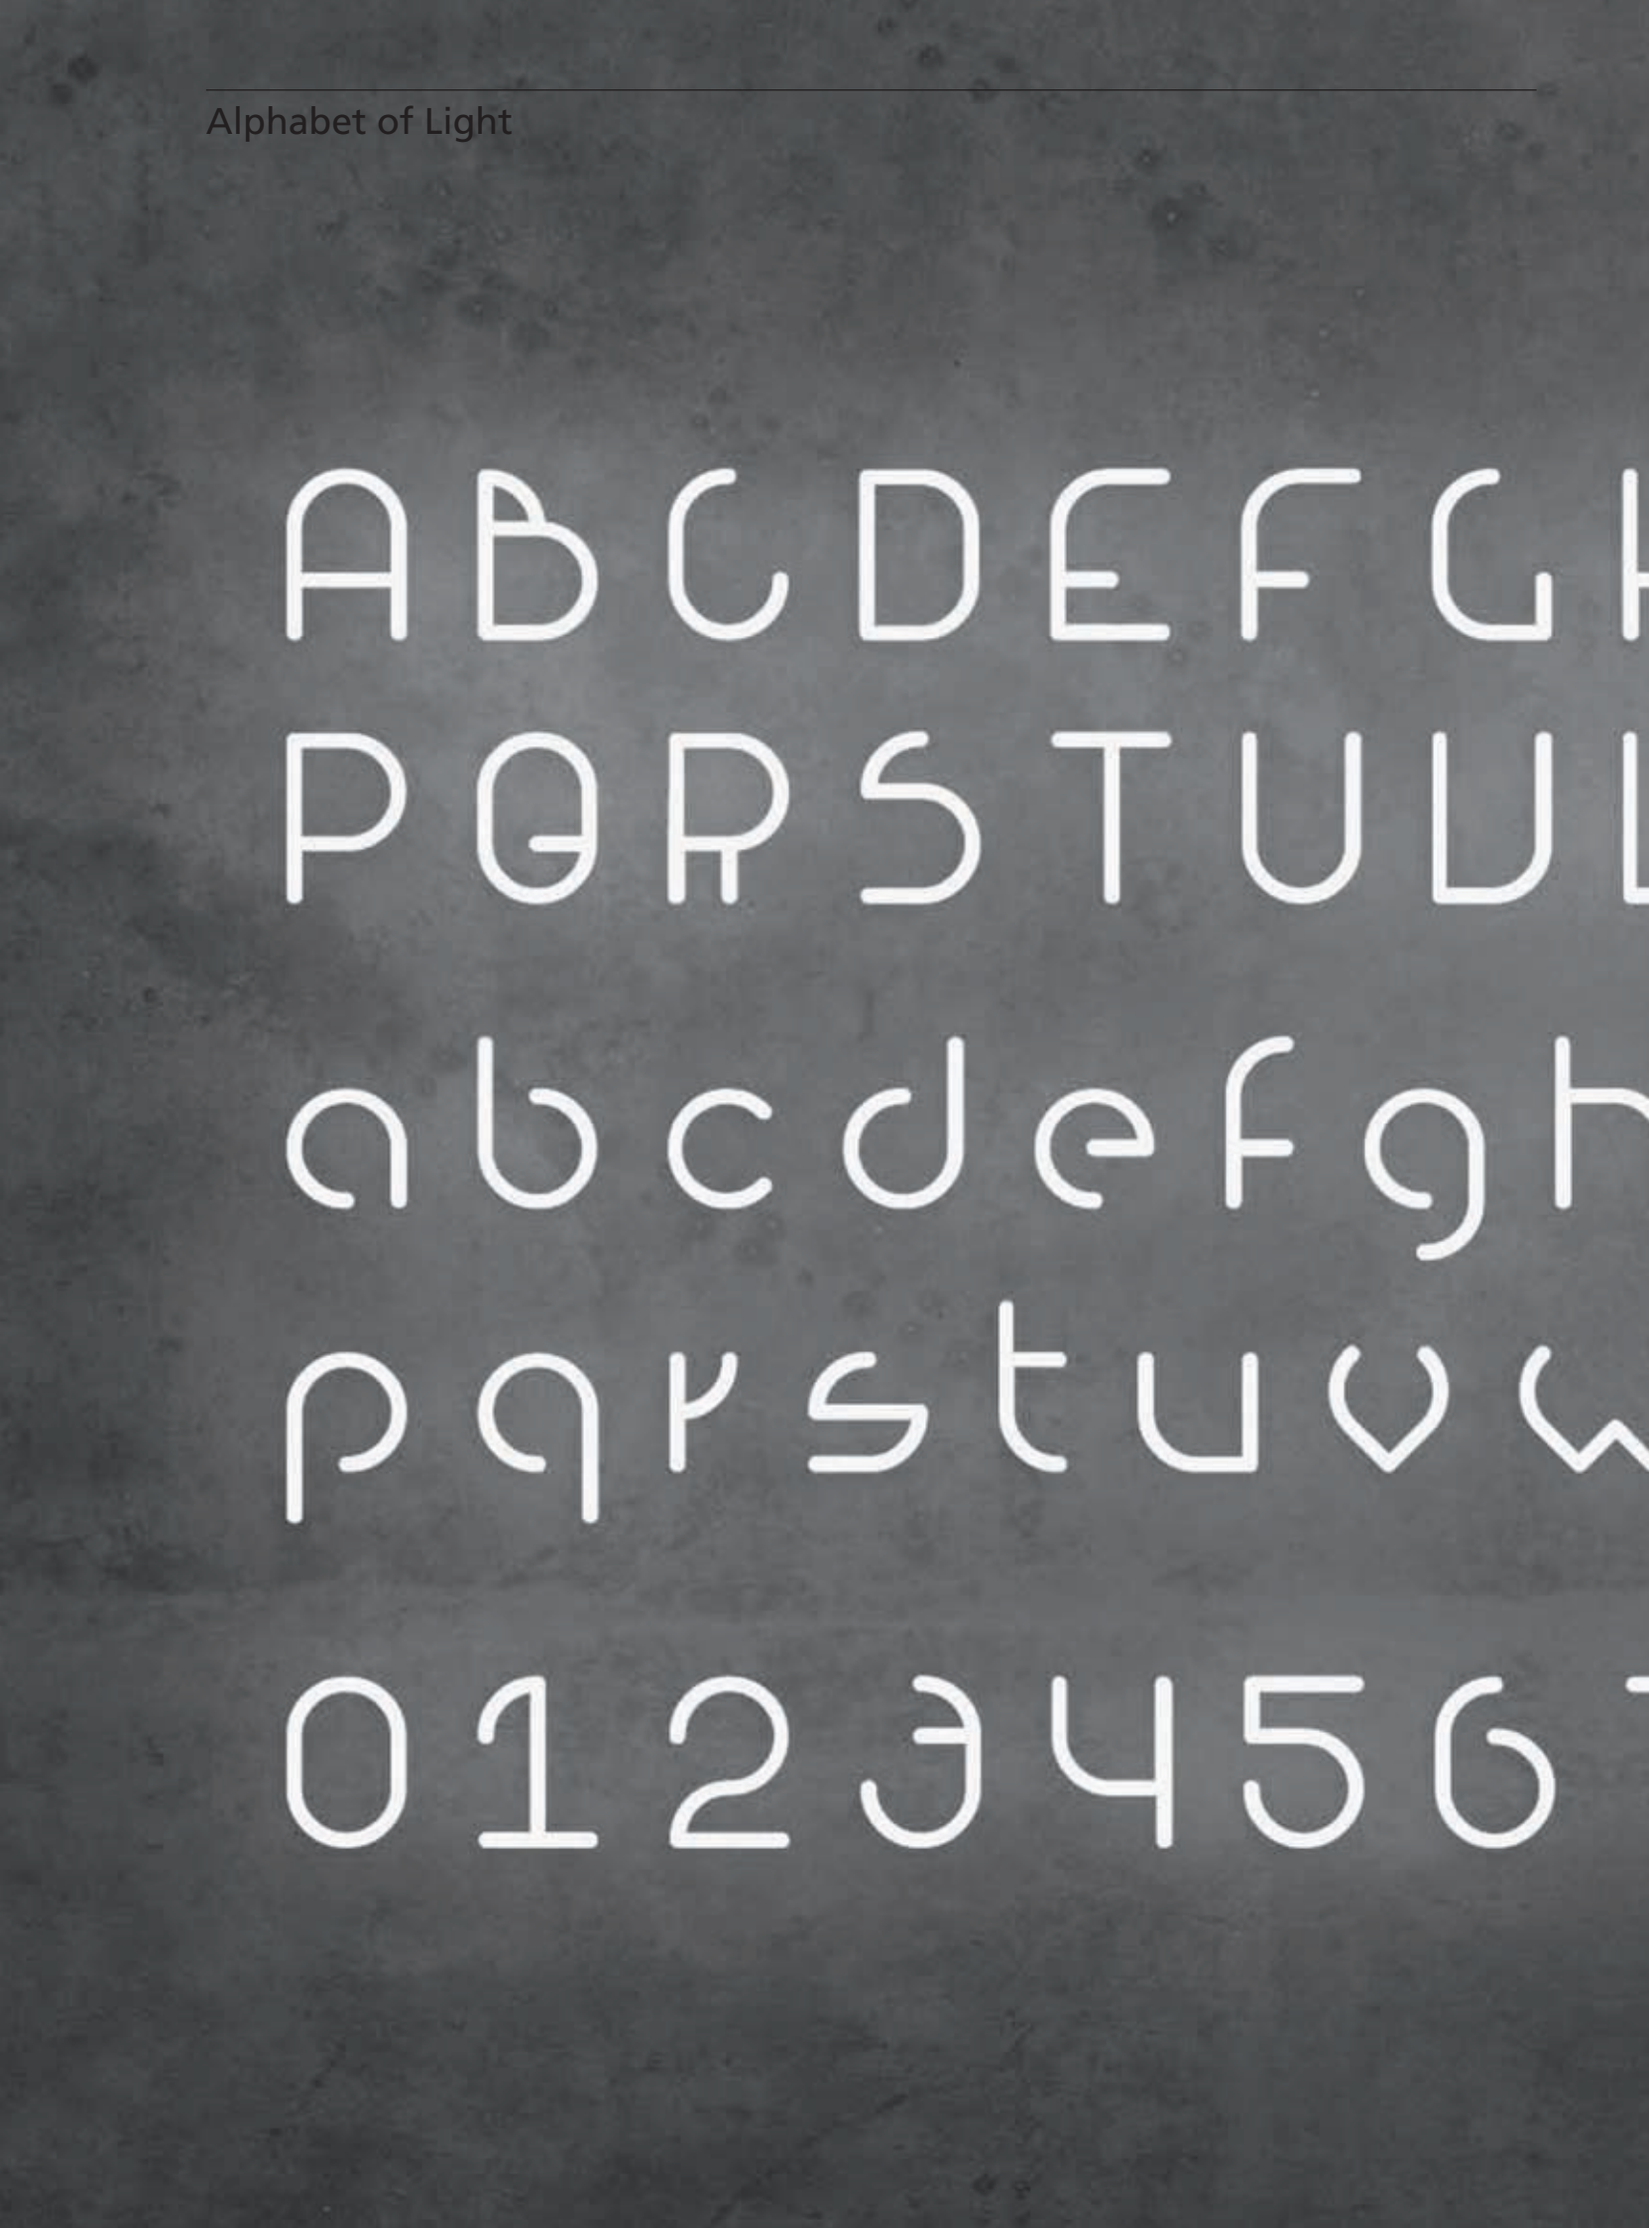

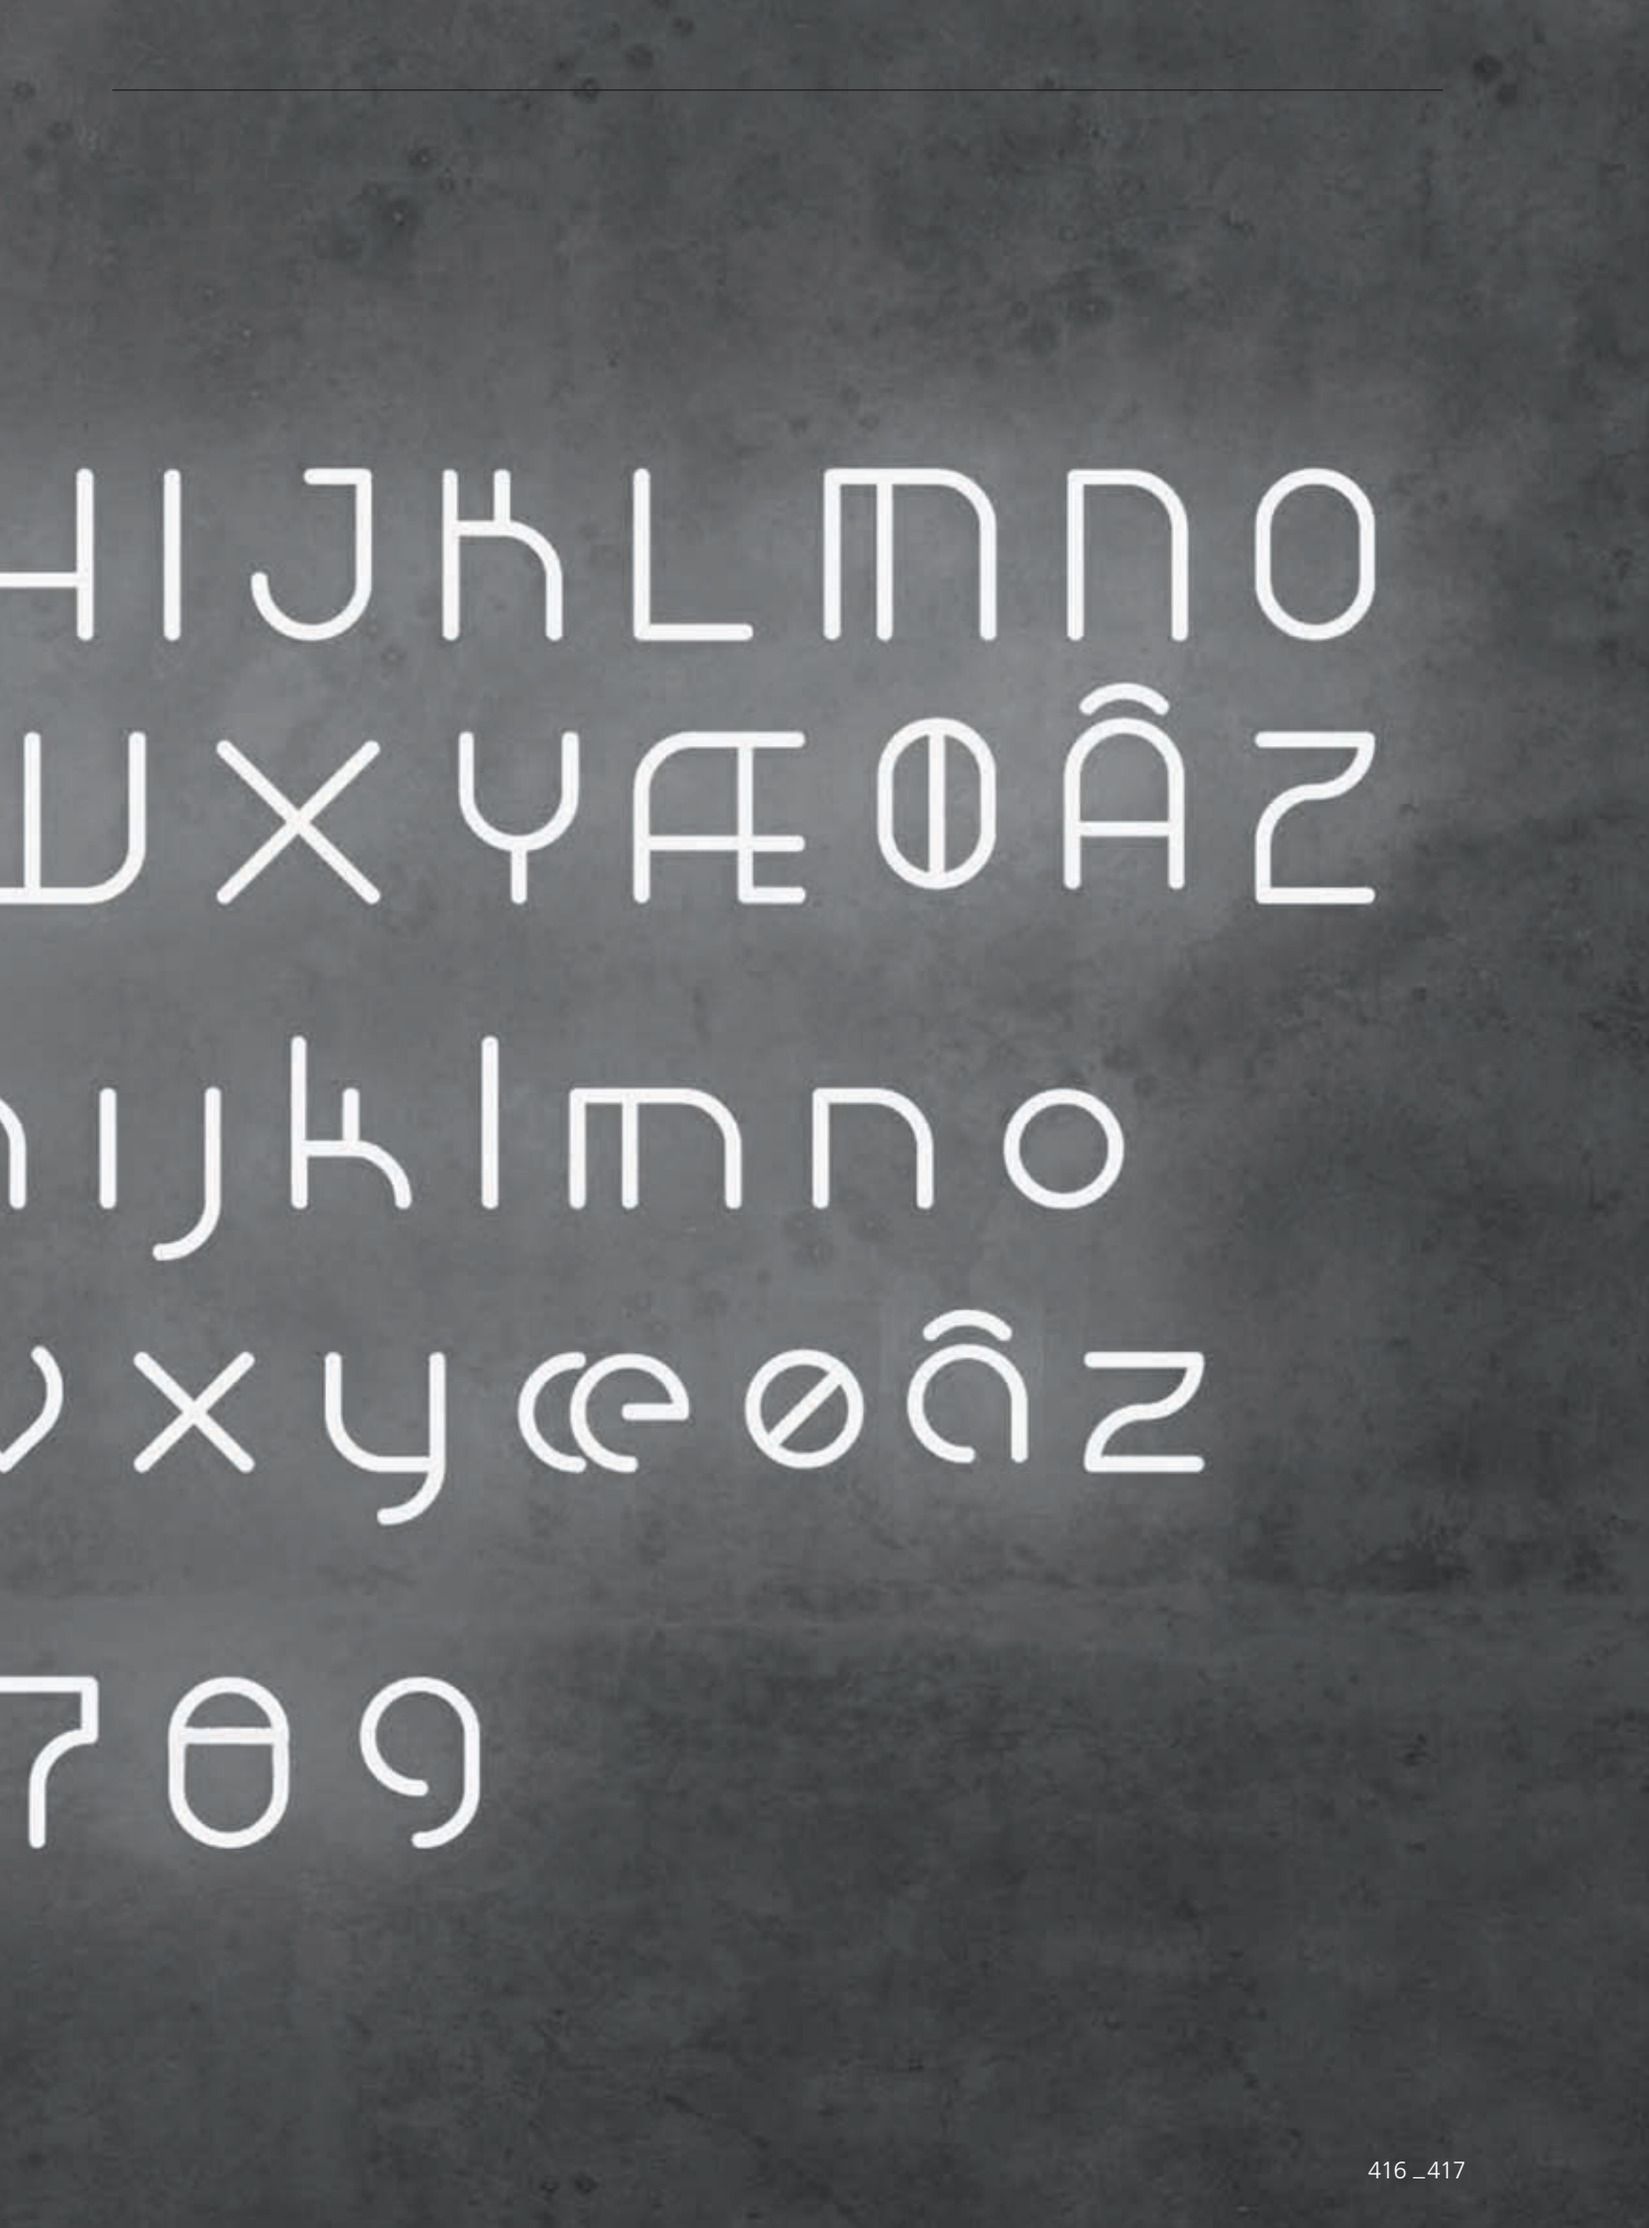

Uppercase
- LED 9 / 39 W
- 750 / 3200 lumen
- CCT 3000K
- CRI=80

Lowercase
- LED 6 / 28 W
- 500 / 2250 lumen
- CCT 3000K
- CRI=80

Numbers
- LED 17 / 32 W
- 1400 / 2600 lumen
- CCT 3000K
- CRI=80

Alphabet of Light Components

1. Create the supporting frame and provide for power connections for the individual letters.

2. Connect panel b to power source.

3. Fix panel b and connect panel ı to power source.

4. Fix panel ı and connect panel g to power source.

5. Fix panel g and close using the supplied panels.

6. Complete closing using the supplied panels.

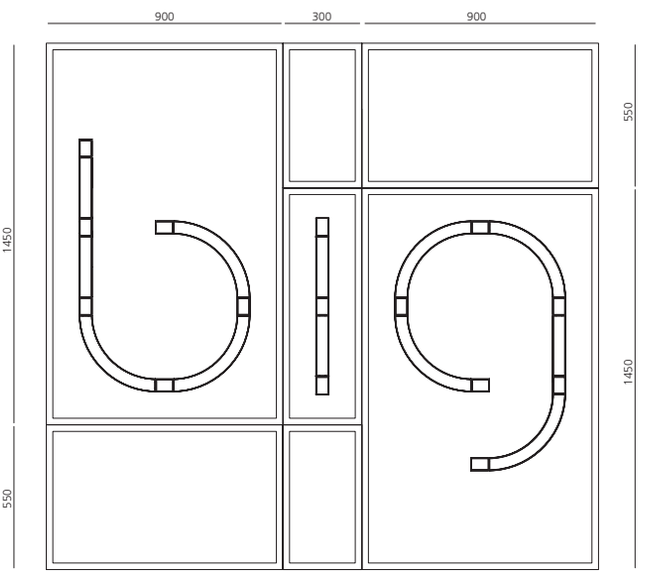

7. Frame ready for finishing.

8. Apply the gauze and plaster flush with the gaps between panels.

9. Final painting.

The letters are provided mounted on MDF panels to allow installation on any kind of wall. Installation requires creating a counter-frame to accommodate the drivers, supplied separately, and the power cables.

A configuration software is available to calculate the necessary usable surface, as well as to identify the codes required to implement the desired project.

Ameluna

Mercedes-Benz Style
2016

Patent pending (IT) n° MI102016000025996

"Mercedes-Benz" and the styling of Ameluna
are intellectual property of Daimler AG.
They are used by Artemide S.p.A under license.

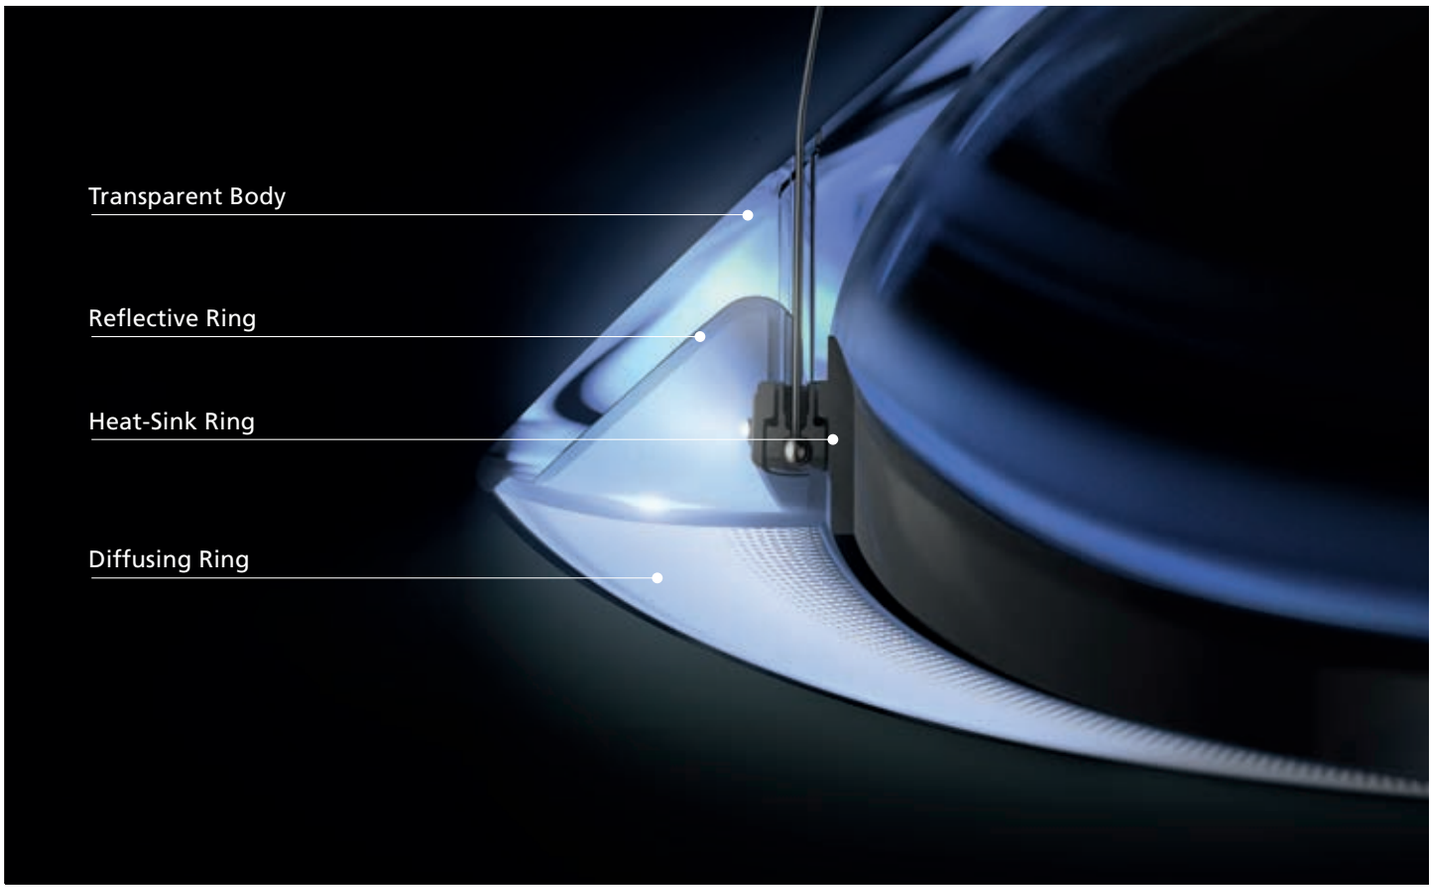

Ameluna

- 41W
- 3394 lumen
- MacAdam 3SDC
- Beam: XF
- CCT 3000K
- CRI= 80 (typ.)
- Life=L70 (9K)=50000

IP20

Ameluna discloses an innovative optoelectronic system integrated in the transparent frame. An aluminium band, a patent of innovation, which is welded with the optics, supports the led strip.The latter is also hidden behind the lower profi le, in order to maintain the purity of the form. The transparent body allows the light to be both direct and partially refracted.

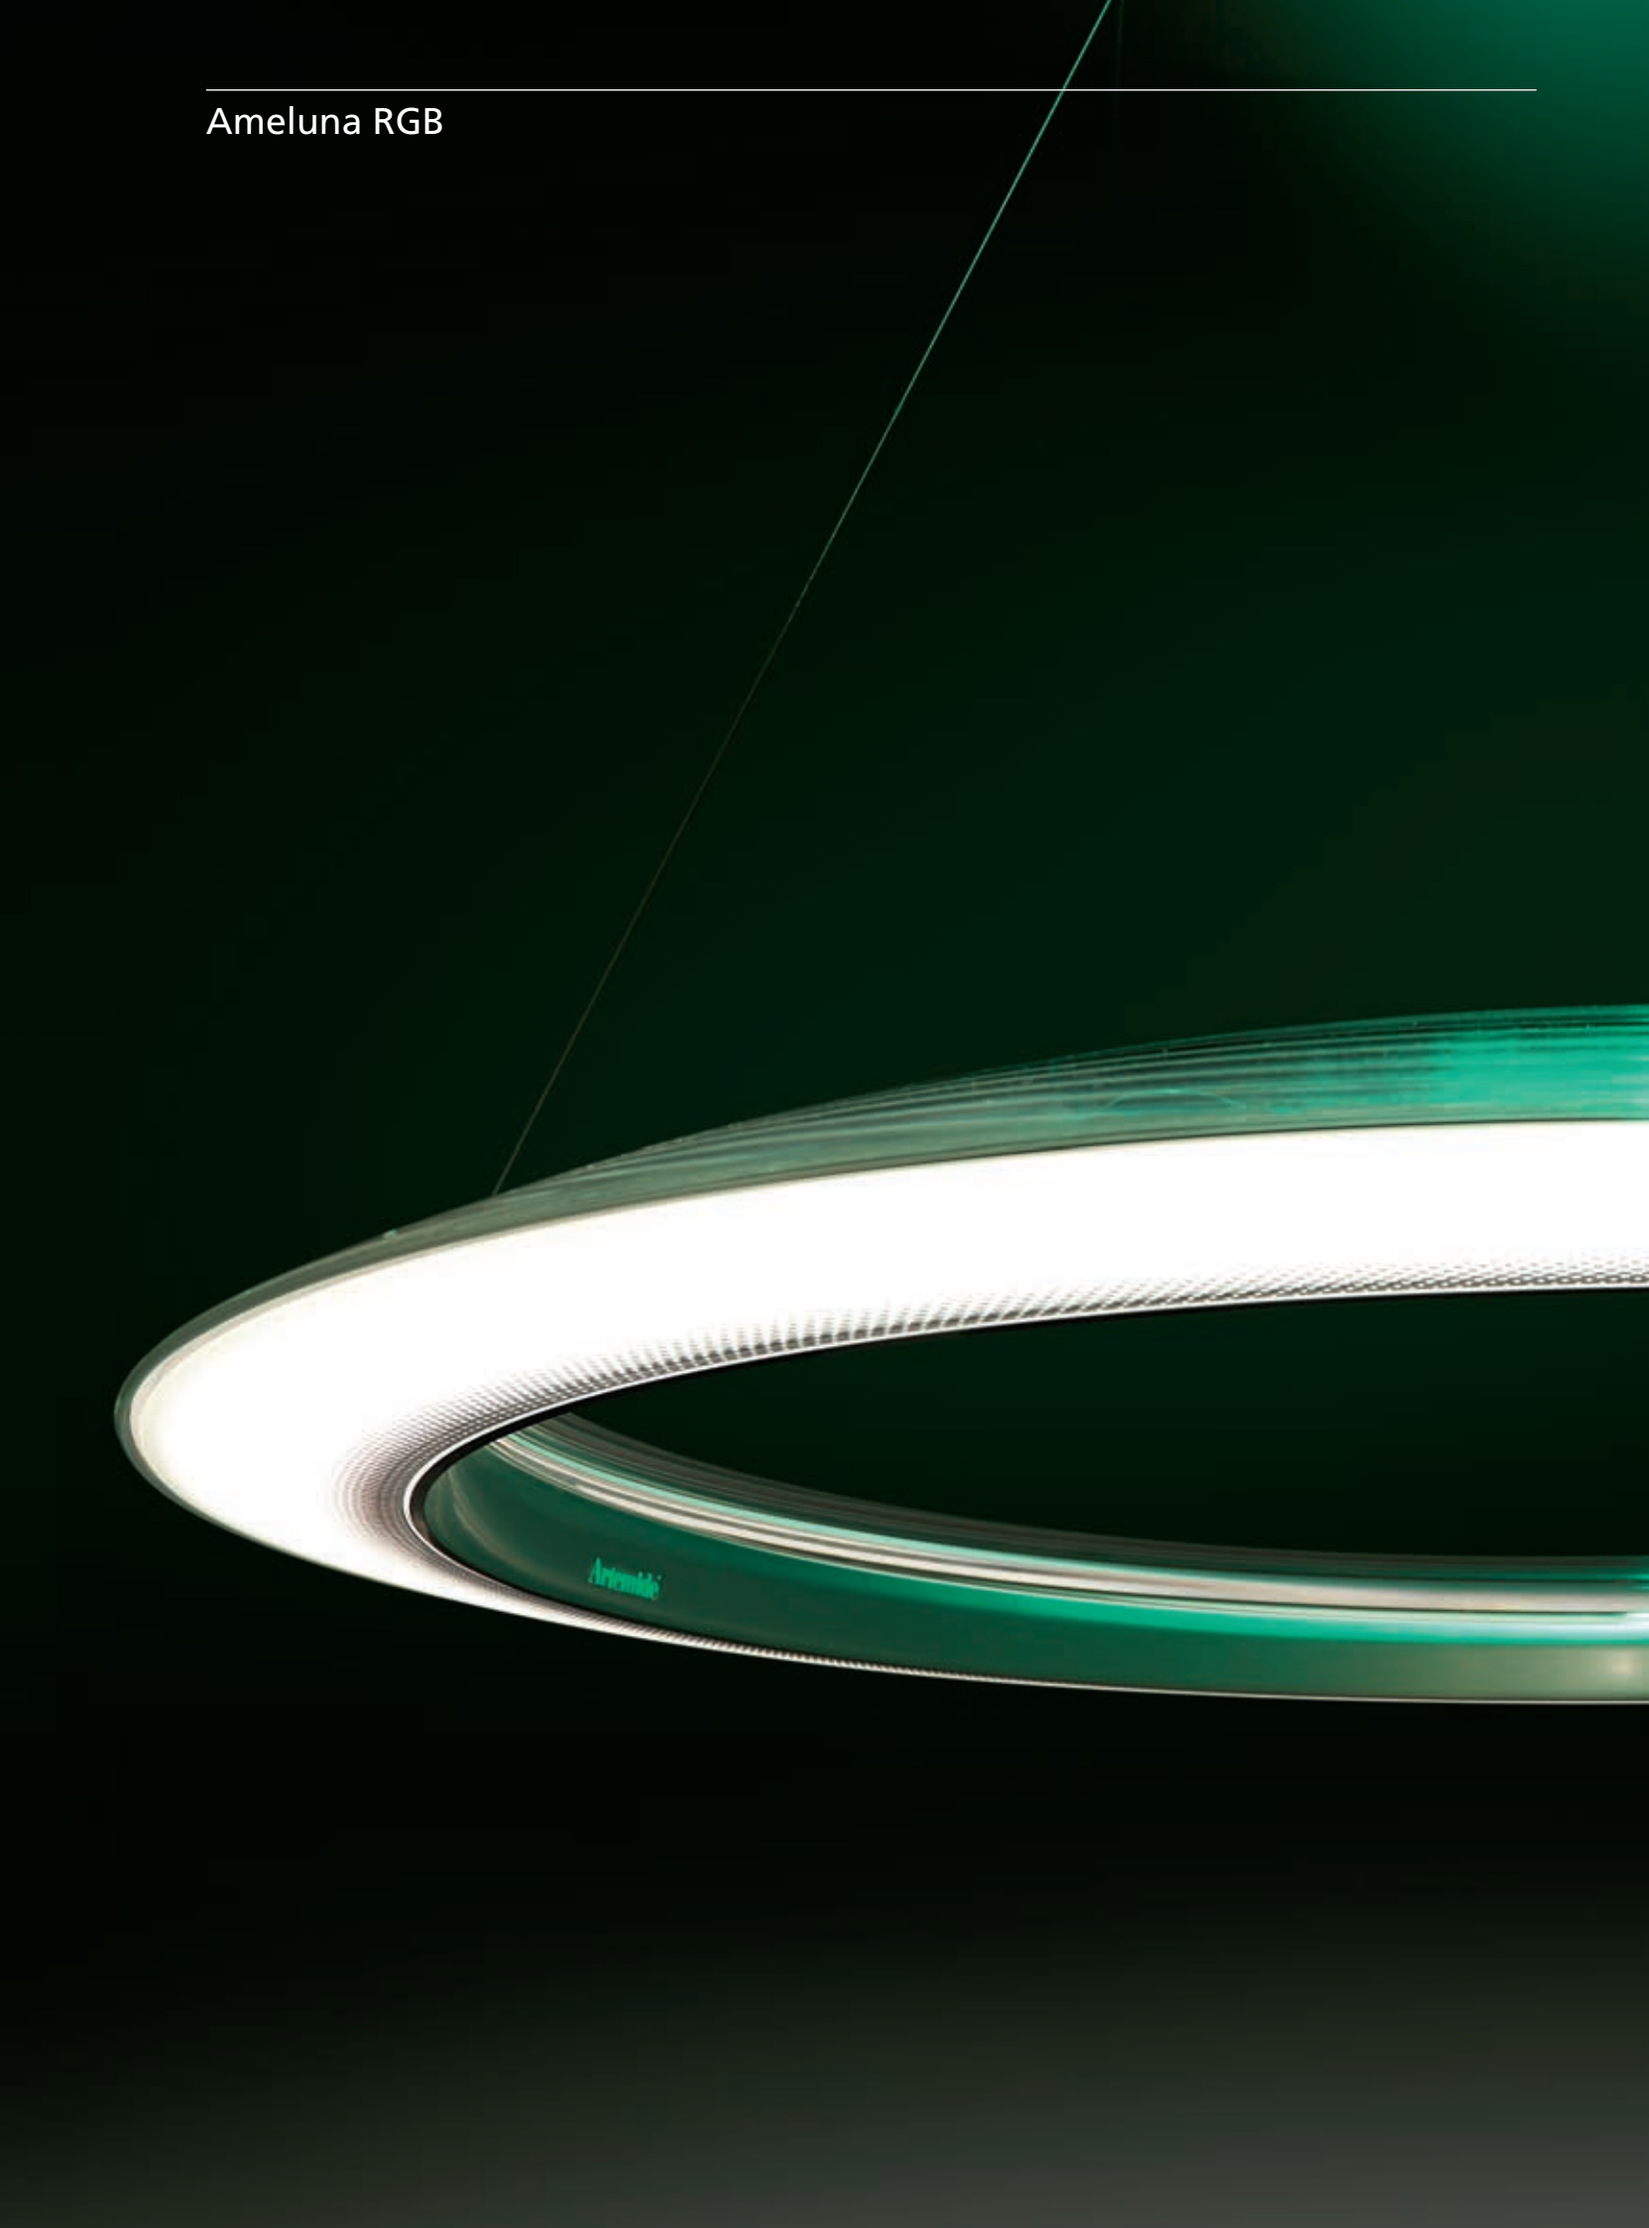

- The geometric section and the optical features of the materials give life to a “light box” that ensures perfect control of the emission, despite transparency.
- A set of LED sources is installed along the lower profile, on a ring made of a thermo-conductive polymer, an innovative material that allows excellent heat dissipation.
- Emission is perfectly designed through careful selection of the materials constituting the “light box”. The special reflectance and transmittance properties, combined with a very low absorption coefficient, ensure that the light reflected from the inner surfaces of the section is scattered across the environment in a controlled and mostly direct way.
- Ameluna can be controlled with an On/Off switch or using a Push to adjusts its luminous intensity.
- Ameluna RGB can be controlled using 2 different Push (one for white light and one for the RGB spotlight) and the Ameluna App. Control via push button has always priority over control with the App (when the Push are operated, the commands sent via bluethooth from the smartphone or tablet are ignored).

Ameluna white

Ameluna RGB

Ameluna RGB

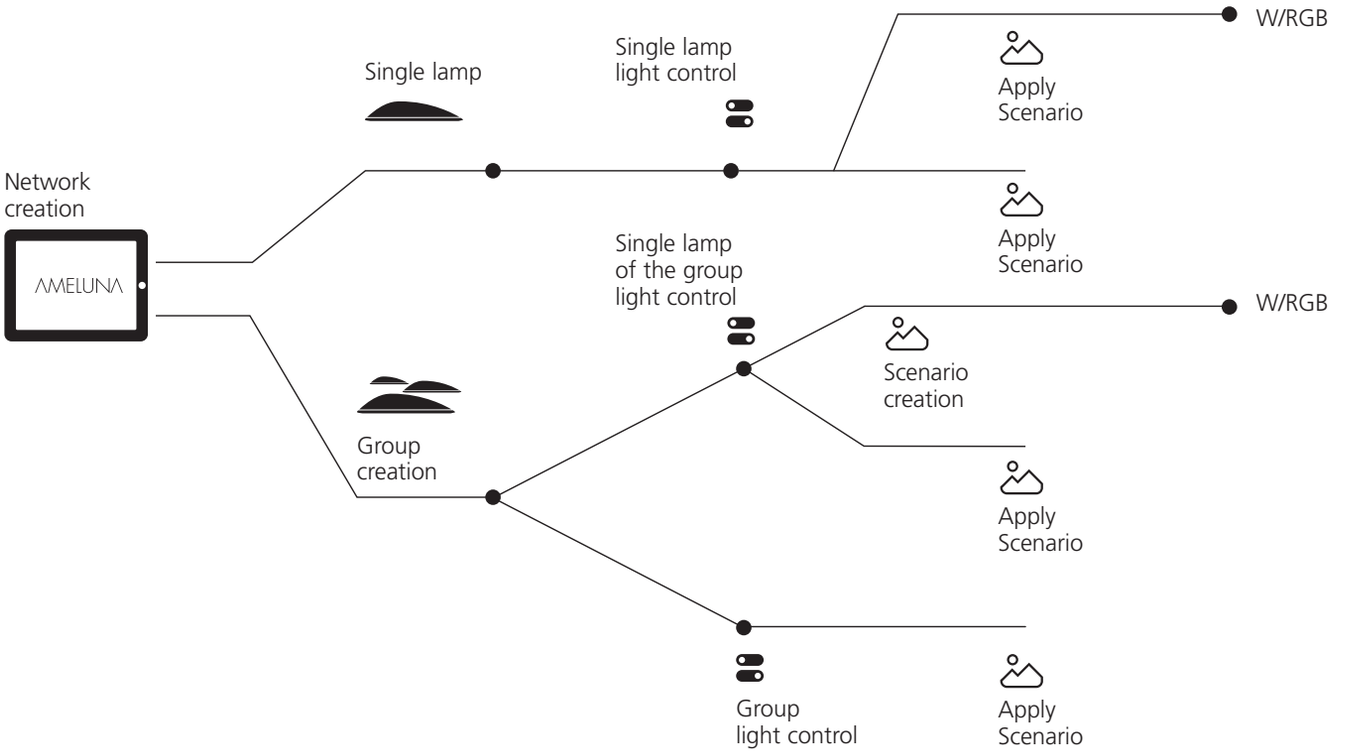

Ameluna APP

The high-tech competence of Ameluna RGB, is conveyed both by optoelectronic innovation and by the IoT interaction. Light in every interior, be it a car or a personal or public space, can be part of the Internet of Things and follow human perception and experience as scenarios change. A new design frontier where light creates both experience and interaction. The Ameluna App enables an utterly new experience with ligh through a surprising, simple, and intuitive approach. A BLE mesh protocol based on high safety standards allows to connect with Ameluna using a variety of mobile devices, as well as to create, change, or set up different lighting scenarios matching every occasion and to choose the intensity of white light and colour.

NETWORK CREATION AND MODIFICATION

Network naming

Password creation

Auto Scanning phase

Find physical lamp phase
The lamp will signal itself by blinking

Assigning a lamp to the network

Lamp naming

Tap on the "Bin" Logo to remove a lamp(s) from the network

Choose the lamp(s) you want to remove from the network

The lamp has been removed from the Network. Tap on the cirlce arrow to go back to the network screen and scan the area again.

GROUP CREATION AND MODIFICATION

Complete network screen

Create a new group pop up (triggered by tapping on the "+" next to the Ameluna icon).

Complete new group lamps association

LIGHT CONTROL

Choose the group or lamp to control

Control the white and rgb emission by using the lateral bars on the screen

Trigger the Options Menu

Tap the "Control a single lamp of the Group" to create a different setting on a single lamp of the group

Choose the single lamp of the group to control

Control the white and RGB emission by using the lateral bars on the screen, confirm settings and turn back complete network screen tapping "DONE"

Trigger the Options Menu to apply existing scenarios or save a new one with the configurations just set

Saving a scenario with the settings applied on the single lamp

Choose the scenario to overwrite with the new settings

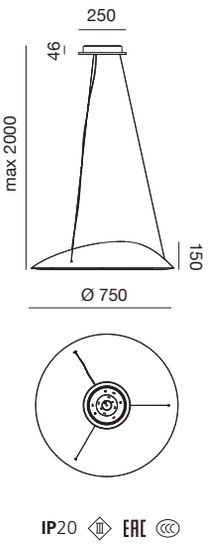

Exit the single lamp settings by tapping on "DONE"

The single lamp within the group is now saved with different settings. Tap "Back" to go to the Network screen

Tagora recessed

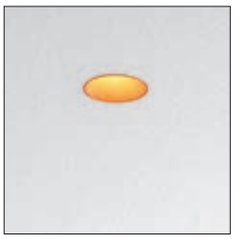

- Series of ceiling mounted luminaires available in 4 diameters (80 mm, 270 mm, 570 mm, 970 mm), using high-output LEDs, Retrofit LEDs and fluorescent sources.
- Consists of a trimless recessed frame fitted into the ceiling and an optical unit with an aluminium body painted in a range of colours.
- Tagora 80 and 270 offer high-output spot light with aluminium optics.
- Tagora 270 LED uses a proprietary system based on a hybrid combined lens and reflector optic. This system helps to create defined narrow beams using high-powered LED modules of large dimensions.
- Tagora 570 and 970 cone with a PMMA diffuser, offering a comfortable diffused light. LED versions use high-output sources.
- Integrated electronic power supply, dimmable or non-dimmable options, depending on the version.
- Emergency lighting available on Tagora 570 fluorescent option.
- Only ceiling recessed installation allowed.
- Compliant with standard EN60598-1 and other specific standards.

Tagora suspension

- Series of suspended luminaires available in 4 diameters (80 mm, 270 mm, 570 mm, 970 mm), using high-output LEDs, Retrofit LEDs, and fluorescent sources.
- Aluminium body available in different two-coloured versions: beige/white, grey/white, black/orange, black/vert and black/blue.
- Steel suspension cables allowing quick adjustment, 2 metre length.
- Tagora 80 and 270 offer a high-output spot light with aluminium optics.
- Tagora 270 LED uses a proprietary system based on a hybrid combined lens and reflector optic. This system helps to create defined narrow beams using high-powered LED modules of large dimensions.
- Tagora 570 and 970 come with a PMMA diffuser, offering a comfortable diffused light. LED versions use high-output sources.
- Integrated electronic power supply, dimmable or non-dimmable options, depending on the version.
- Emergency lighting available on Tagora 570 fluorescent option.
- Option of double light emission available on Tagora 570 and 970 fluorescent modules.
- Compliant with standard EN60598-1 and other specific standards.

Una Pro Putrella

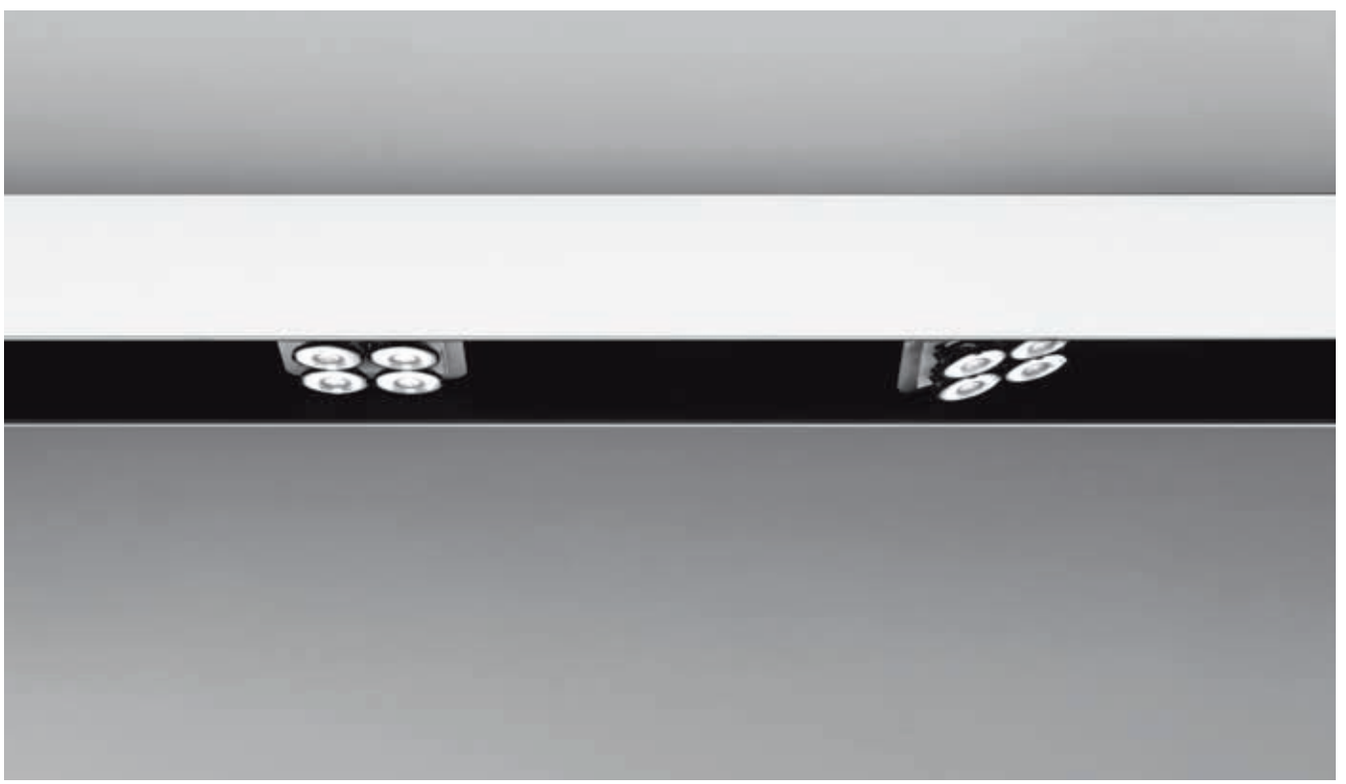

Carlotta de Bevilacqua
2010 - 2011

- 6x4 LED 36 W
- 1782 / 2040 lumen
- MacAdam 4SDCM
- Beam: XS - F - WF
- CCT 3000K / 3700K
- CRI = 80 / 85
- Life = L70(10K)=50000h
- IP20

⏚

- High-power LED lighting appliance mounted on a thin (3 mm) flat aluminium sheet with improved heat dissipation.
- Its geometric shape reproduces a building element called joist, accommodating 6 adjustable spotlights of Una Pro 75.
- The frame is painted in a single colour – texturized white – or in two colours – texturized white outside and texturized black inside.
- Available with three different emissions: 6°, 20°, 38°.
- The junction of each head allows 360° rotation and 30° tilting in all directions.

XF = Extra flood (>45°)

- Series of suspended and wall- or ceiling-mounted lighting structures with indirect lighting, intended to illuminate of spaces such as entrance halls, reception areas, corridors, meeting rooms, etc.
- Luminaires are made from aluminum with white paint finish.
- 40x40mm square section modules.
- Distance to wall or ceiling: 160mm.
- Each structure consists of pre-assembled and pre-wired sub-units.
- Electrical connection is made via quick connectors.
- Electronic control gear.
- Dust protection screen in transparent polycarbonate.
- The kits are delivered with a drilling stencil for placing the fixing points.
- Complies with standard EN60598-1 and other specific standards.

XF = Extra flood
(>45°)

- Twist is a pendant light using T16-Seamless fluorescent tubes.
- The luminaire consists of a one-piece rotomoulded opaline diffuser in polyethylene and ballast-holder in extruded aluminium.
- Lamp maintenance is particularly easy: lamps are accessed individually from above each side without the need to remove the diffuser.
- Electronic and dimmable electronic control gear (DALI).
- Quick adjustment 6m-long steel suspension cables.
- Thanks to the use of a specific mechanical connector that can be attached to one or more corners of the luminaire, various light shapes can be created: in line, clusters or in a random pattern.
- Light sources to be ordered separately.
- Complies with standard EN60598-1 and other specific standards.

- Single pendant luminaire with diffused lighting using T16-Seamless fluorescent lamps.
- 2 length options: 2400 mm (2x28 W) and 4800 mm (4x28 W).
- Continuous solid diffuser in opaline polycarbonate.
- Structure made from extruded aluminium.
- T16-seamless equipment gives a uniform light emission without shadows.
- A simple locking/unlocking system with smart hinge allows for easy lamp maintenance.
- Electronic ballast or DALI-switchdim dimmable multiwatt electronic ballast.
- Luminaire comes complete with 6m-long quick-adjustment steel suspension cables, ceiling plate and power cable.
- Complies with standard EN60598-1 and other specific standards.

Pixel Mesh

2013

Motel One, Köln - DE

- The Pixel Mesh is a matrix of RGB LED that can be controlled to create any kind of signage, image, or scenario according to the request of the client.
- The Pixel Mesh can be used indoors and outdoors, and several basic modules can be combined to extend the system to the desired area.
- The basic modle has a density of 1024 LED/sqm (pitch 30mm), with a total power of 280W/sqm.
- The control system is integrated in the product and can be re-programmed even after installation.
- Transparency factor 55%.
- Flexible module.
- Plug-&-play installation.

Single module

	W LED	Weight		Area
LED 3 in 1 SMD	120W max	2,85 kg	RGB	0,36 m²

Resolution 31,25
Transaprency 55%
Refresh rate 2000Hz
Input frequency 50-60Hz
Data connection RJ45
Tested in evironments
with temperature from
-20°C to +50°C
IP63

220/240Vac 50/60Hz main voltage

Pixel mesh needs to be permanently connected to a PC with DVI output to play video and images of any given digital format.

The product can be customized to respond to different project needs. For dedicated quotation and further enquiries, please contact Artemide sales office.

- Light fixture with adjustable direct emission, with high-performance LED light sources.
- Floor, wall and eaves installation.
- 2 sizes: Epulo 13 and Epulo 18.
- Available in two finishes: grey-white painted (RAL 9002) and anthracite grey painted.
- Consists of lighting unit, terminal board and fixing bracket. Rotation on the base +/-180°, side body tilt +/-45° and front body tilt +0/-90 by means of a spherical joint allowing an accurate adjustment.
- Body and terminal board in EN AB-47100 aluminium, fixing bracket in stainless steel, silicone gaskets. Electronic ballast integrated in the body.
- Silkscreened tempered glass siliconed flush with the body to avoid backwater.
- The device is provided with a safety cable with hook to allow easy wiring during its installation in any position.
- IP67 connector for electric connection to the mains, it can be housed in the terminal board compartment and is suitable for cables with a diameter of 5-13.5mm.
- PMMA lenses in 3 different versions of beams.
- Screws in AISI 316 stainless steel.
- The components in die-cast aluminium and the steel bracket are painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-5.

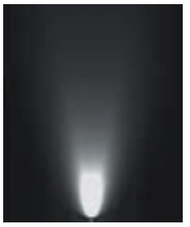

Extra Spot optic

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

6° optic

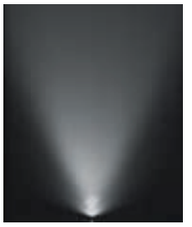

Wide Flood optic

Wide luminous flow suitable for lighting large areas.

2012

- LED 1 W / 17 W
- 76 / 797 lumen
- MacAdam 4SDC
- Beam: N - WFL - E (elliptical), WW (Wall Washer)
- CCT 3000K
- CRI = 80
- Life = L70(6K)>39300
- IP65 / IP67
- Ego 55-90 WO / DO, Ego Flat WO / Ego WO / DO

- Light fixture with high-performance LED light sources.
- Recessed ground installation.
- Walk-over and drive-over versions.
- Depth of recess box:
  Ego WO/DO: 110-120 mm
  Ego Flat WO: 60 mm
- WO/DO round and square version, each one in 5 different sizes.
- Fixture consisting of body, frame, glass diffuser, housing.
- Aluminium body EN AB-44100 with silicone gaskets.
- All versions are available with stainless steel frames.
  Ego 55-90 / Ego flat 55-90 also available with polished aluminium frame.
  Ego 150-220 / Ego flat 150-220 also available with 8mm-thick glass flush with the floor.
- Housing in composite techno polymer, to be ordered separately.
- Ego Flat WO H05RN-F feeding cable length: 300 cm.
  Ego WO/DO feeding cable:
  H05RNF 2x1 for Ego 55 - 90,
  H05RNF 3x1 for Ego 150,
  H07RNF 3x1 for Ego 220 - 320,
  cable length 30 cm.
- All Ego versions (excluding Flat version) are supplied with electronic power supply inside the luminaire body. For 55 and 90 versions 24 V power supply and remote power supply to be ordered separately.
- All Ego Flat can be operated by a remote power supply to be ordered separately. Connection cable includes a IP68 electrical terminal board.
- Housing locked by anti-vandal TORX screws in AISI 316 stainless steel.
- Glass surface temperature below 40°C.
- Fixed and adjustable lenses in PMMA in 3 versions with different beam angles.
- Die-cast painted aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.

Ego

Recessed depth:

Ego 55	100mm
Ego 90	100mm
Ego 150	120mm
Ego 220	117mm

Spot

Concentrated luminous flow to highlight details avoiding unwanted light dispersion.

Flood

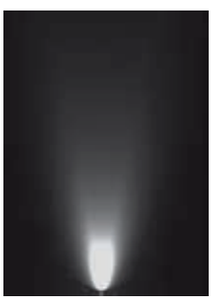

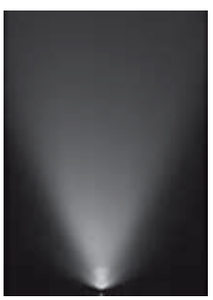

Wide luminous flow suitable for lighting large areas.

Wall Washer

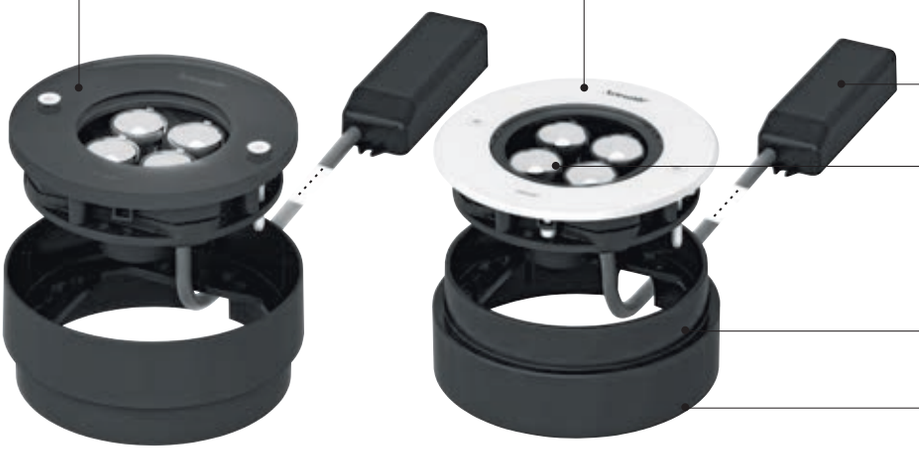

Elliptical distribution of the luminous flow suitable for wall washer effect.

Ego Flat

Silkscreened tempered glass thickness 8mm
T glass 30°C.
Static load 5000Kg

Round or square frame with painted aluminium (3mm) or stainless steel AISI 316 (3mm) ring.
Silkscreened tempered glass thickness 8mm
T glass 30°C.
Static load 5000Kg

Electronic ballast supplied separately

Megara

Michele De Lucchi
2011

- LED 2.5 W / 4 W / 8.5 W
- 6,5 / 26 lumen
- MacAdam 4SDC
- Beam: AS (asymmetrical)
- CCT 3000K
- CRI = 80
- Life = L70(6K)>39300 (Megara 90 / 150)
- Life = L70(6K)>20900 (Megara 220)
- IP65 / IP67

- Light fixture with high-performance LED light sources.
- Drive-over recessed floor installation with floor-protruding cap. All the versions are drive-over up to 5000Kg. Due to the low height of the cap, Megara 90 is also suitable for installation in walk-over areas, being careful to avoid areas of direct transit (near walls, buildings, etc.). Cap's temperature 35° C.
- 3 sizes (90, 150, 220 mm).
- Composed by body, cap, diffuser, recessing box.
- Body and cap in painted EN AB44100 aluminium, silicone gaskets; provided with 30 cm-long pre-resined three-pole connection cable (H07RN-F for versions 90 qnd 150, H05RN-F for version 220).
- Electronic ballast integrated in the body.
- Diffuser in UV resistant polycarbonate.
- Power connection to the mains by means of the IP68 connector supplied with the light fixture, which can be housed in the recessing box and is suitable for cables with a diameter from 5 to13.3 mm.
- Fixing to the recessing box is ensured by means of anti-vandal screws TORX.
- Recessing box for laying in reinforced polymer to be ordered separately.
- Radial emission beam optic.
- 1, 2, 4 beam and full configurations.
- Screws in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1 and part 2-13.

Microled

2013

- LED 0.5 W / 1.5 W
- 5,6 lumen
- Beam: XF
- CCT 3000K
- CRI = 75 min
- IP65 / IP67

- Light fixture with high-performances LED light sources.
- Floor installation.
- Consists of diffuser, body, ring, housing.
- Diffuser in glass, 3mm-thick.
- Body in technopolymer, with or without frame.
- Ring in stainless steel AISI 316L.

- Housing in plastic material (available separately).
- Remote driver.
- Electrical connection to the ballast by means of a two-pole H05RN-F cable and appropriate IP68 terminal board.

XF = Extra flood

Aria

Massimo Sacconi
2012

- LED COB (Aria Micro)
- LED 2.5W / 3W / 6W
- 102 / 215 lumen
- MacAdam 2SDCM / 3SDCM / 4SDCM
- Beam: AS (asymmetrical)
- CCT 3000K
- CRI = 85
- Life = L70(6K)>36000 (Aria Mini)
- Life = L70(10K)>60500 (Aria Micro)
- IP40 / IP65

AS = Asymmetrical

- Light fixture with high-performance LED light sources.
- Wall or ceiling installation.
- Composed by: frame (aluminium), body (injection mould of aluminium), asymmetrical reflector, fixing springs or housing (bend metal - to be ordered separately).
- Body and frame are painted with outdoor treatment three stages: nanotechnologies, antioxidant primer, polyester paint.
- Metalized polycarbonate reflector.
- Silicone gasket.
- Protection screen in tempered glass, 3mm-thick.
- Electrical connection to the ballast by means of a cable with appropriate terminal board supplied with the fixture.
- Technical features of light fixtures in compliance with EN60598-1.

Body in nylon reinforced with fibre glass

Reflector in optic aluminium with high coefficient of reflection + strip LED

Tempered glass and cromed zamak frame

- LED 3 W / 7 W / 9 W
- 62 / 265 lumen
- Beam: AS (asymmetrical)
- CCT 3000K
- IP65 ⧈

AS = Asymmetrical

- Light fixture with high-performance LED light sources.
- Recessed wall installation.
- 3 sizes (120, 240 and 360 mm length).
- Consist of by lamp body and recessing box.
- Body in high-resistance reinforced polymer. The lamp body is snap-fitted into the recessing box, then it is fixed by means of two anti-vandal screws Torx. This product is suitable for areas at risk of vandalism.
- Aluminium reflector conveying and diffusing the light flow downwards to ensure an even floor lighting and visual comfort without glare.
- Diffuser in 8mm-thick silkscreened tempered glass to ensure higher vandal-proof resistance.
- Front frame in chromed zamac.
- Recessing box for laying in reinforced polymer, with low depth, can be ordered separately.
- Wiring inside the lamp body with IP65 grommet suitable for cables with a diameter of 8-12 mm for the connection to the mains.
- AISI 316 setscrews and silicone seal gaskets.
- Technical features of light fixtures in compliance with EN60598-1.
- Installation must be carried out by specialized personnel. Carefully follow the instructions.

- Light fixture with 1, 2 or 4 light beams using monochromatic LED light sources together with light-diffusing lenses which optimize the optical performance of the beams and establish their width. Designed to create geometric lights of scenic effect, it is available with beams of the same spread or with combined beams.
- Beam spread 2,6° / 38° (Effetto Round) and 3,6° / 46° (Effetto Square).
- Wall installation.
- Available in two shapes: square and round and in two finishes: grey-white painted and rust painted.
- Consists of lighting cap unit and terminal board fixed together by means of locking dowels.
- Cap in die-cast EN AB-47100 aluminium.
- Terminal board in reinforced polymer.
- Watertight gasket in silicone rubber.
- Electronic ballast integrated in the fixture.
- PMMA lenses siliconed flush with the cap to obtain two different beam angle opening (narrow and wide).
- Wiring to be carried out inside the terminal board by piercing an IP65 membrane grommet suitable for cables with a diameter of 6-13 mm.
- Locking dowels used outside the fixture in AISI 316 stainless steel.
- Painted die-cast aluminium with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.

Double emission

- Lighting system with single or double emission, with high-performance LED light sources combined with lenses which optimize the light emitting efficiency of the beams and determine their spread.
- Available in two sizes: ø 8 e ø 13 cm.
- Ceiling and wall installation.
- Available in two finishes: light grey and anthracite grey painted.
- Wall version with single or double emission.
- Consist of lighting body, lighting cap and wall fixing bracket / ceiling fixing flange (in EN AW-6060 aluminium)
- Cylindrical body in EN AW-6060 aluminium containing the electronic power supply components.
- Optical lighting body in EN AW-6060 aluminium.
- Led and collimator lenses which swing by means of an aluminium bracket.
- Diffuser in toughened glass.
- Wall fixing bracket in bent steel.
- Water tight silicone gaskets.
- Electronic ballast integrated in the body.
- PMMA lenses with narrow (wall-version) or wide (ceiling-version) beam
- Wall version: IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm and allowing the electrical interfacing with the external mains without need of opening the fixture.
- Ceiling version: wiring to be made inside the fixture, by piercing a membrane fairlead IP65 suitable for of 6-13mm diameter cables.
- All fixing dowels used outside the fixture are in AISI 304 stainless steel.
- The components in die-cast aluminium and the steel bracket for wall fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.

- Light fixture with 2 combined light beams: the large one with lighting function and the narrow one with decorative function.
- Wall installation. The fixture can be installed with the main beam pointed either downwards or upwards according to the kind of lighting desired (direct or indirect).
- The large beam is obtained by the combination of a monochromatic LED light source with a reflector. The narrow beam is obtained by the combination of a monochromatic LED light source with a high-performance projector.
- Available in two finishes: light grey and anthracite grey painted.
- Consists of lighting cap unit and terminal board fixed together by means of locking screws.
- Cap and terminal board in die-cast EN AB-47100 aluminium.
- Watertight gasket in silicone rubber.
- Electronic ballast integrated in the fixture.

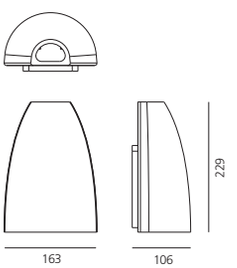

- Projector consists of a body in reinforced polymer and PMMA lenses.
- Tempered and silkscreened light-diffusing glasses, siliconed flush with the lighting cap.
- Power connection to the mains to be carried out outside the fixture, without the need to open it, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.
- Wall fixing by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.
- Locking screws used outside the fixture in AISI 316 stainless steel.
- Die-cast aluminium and bracket painted with 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.

The elliptical light emission and the flat shape of the fixture make it particularly suitable for floors or spacious areas in gardens to provide a side lighting.

- Light fixture with direct side emission, with high-performance LED light sources. Monochromatic LEDs are used together with collimators and a light-diffusing prismatic screen to obtain an optimum lighting beam.
- Floor or wall installation. In the wall installation, the light can be pointed either upwards or downwards.
- Available in 3 finishes: light grey, dark grey and rust painted.
- Consists of lighting cap and terminal board fixed together by means of locking screws.
- Cap and terminal board in die-cast EN AB-47100 aluminium, gaskets in silicone rubber. Electronic ballast integrated in the fixture.
- Cuneo: PMMA collimators installed on the LED light sources. Light-diffusing prismatic screen in PMMA siliconed flush with the lighting cap.
- Cuneo Mini: High-yield COB LED source with high-reflection anodized aluminium body. Etched tempered glass screen glued flush to the lighting body with silicon.
- Power connection to the mains to be carried out outside the fixture, without the need to open, by means of a pre-installed IP65 connection device suitable for cables with a diameter between 6 and 13 mm.
- Wall installation by means of a bracket in folded steel sheet to which the fixture is fastened with two screws.
- Screws in AISI 316 stainless steel.
- All the components in die-cast aluminium and the steel bracket for wall or floor fixing are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- Technical features of light fixtures in compliance with EN60598-1.
- ENEC approved.

- 6,5W / 13W
- 284 / 568 lumen
- MacAdam 3SDCM
- Beam: AS (asymmetrical)
- CCT 3000K
- CRI = 80
- IP65 ⧈

- Lighting system with diffuse unilateral or bilateral emission, with high-performance LED light sources.
- Light emission is obtained by the combination of six monochromatic LED light sources, a reflector and an opaline diffuser.
- Floor in unilateral and bilateral emission, wall or recessed installation.
- Available in 3 finishes: light grey (RAL 9002), anthracite grey and rust painted.
- Technical features of light fixtures in compliance with EN60598-1.
- ENEC approved.
- Lighting unit consists of: frame in reinforced polymer; diffuser in light-diffusing polycarbonate; plate in pickled, machined and galvanised steel; watertight gasket in silicone rubber; LED circuit; electronic ballast; reflector in painted spun aluminium; PG13.5 cable gland, H05RN-F cable and IP65 electrical connection device suitable for cables with a diameter between 6 and 13 mm to allow electrical interfacing with the external mains without the need to open the fixture.

- The lighting unit houses the electrical components and sources.
- Aesthetic cover in die-cast EN AB-47100 aluminium. The components in die-cast, extruded aluminium and steel are painted by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- The elements are fixed together by means of screws. All the locking screws used outside the fixture and inside the stem are in AISI 304 stainless steel.
- Ciclope floor: available in two heights (h 50cm and h 90cm), stem in extruded EN AW-6060 aluminium. Ground mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.
- Ciclope recessed: recessing box in reinforced polymer, can be ordered separately.
- Ciclope wall: box in extruded EN AW-6060 aluminium.

- Series of light fixtures with direct emission, with high-performance LED light sources.
- Floor, pole or wall installation.
- Available in 3 finishes: light grey painted (RAL 9002), anthracite grey and rust painted.
- Painting is obtained by means of 3-stage outdoor treatment: nanotechnologies, antioxidant primer, polyester paint.
- AISI 316 stainless steel screws and silicone seal gasket.
- Provided with IP67 cable and connector for the mains connection.
- Technical features of light fixtures in compliance with EN60598-1.
- ENEC approved.
- Consists of lamp, lamp support and: wall support (Chilone wall), ground fixing pole (Chilone pole), ground mounting plate (Chilone floor).

- Lamp unit in die-cast EN-AB 47100 aluminium.
- UV resistant diffuser in shock resistant polycarbonate with satiny finish.
- Lamp support in extruded EN-AW-6060 aluminium.
- Chilone wall: it can be installed with the light pointed either downwards or upwards. Wall support in steel included.
- Chilone pole: height 250 cm, ground fixing pole in painted extruded EN-AW-6060 aluminium. It must be installed by means of a proper foundation plinth.
- Chilone floor: available with downward emission in two heights (h45cm and h 90cm) and with upward emission (Chilone Up). Support pole in extruded EN-AW-6060 aluminium, chromate treated and painted. Mounting plate in folded, welded and painted steel, with holes for ground fixing by means of log bolts or dowels.

The colour of Cor-ten steel may change in time depending on weather conditions. Before stabilization, Cor-ten steel may release rust powder that may stain the surface where it is placed.

Artemide recommends not to position it on sensitive surfaces, such as clear stones, marbles, etc.

- Floor light fixture with diffuse emission, with monochromatic LED light sources.
- Available with IP20 protection rating for indoors, IP67 and IP68 for outdoors. IP67 and IP68 versions are available in Single or Triple shape.
- Light is diffused through 7 PMMA rods with different heights to give the impression of a reed bed and which can be screwed to the base by means of AISI 316 stainless steel bushes. Part of the light is also diffused on the floor around the base.
- The base has an irregular shape, which has been designed to allow a «mosaic» connection with other light fixtures so as to create an elaborate composition as needed.
- Technical features in compliance with EN60598-1 (IP20, IP67) and section 2-18 (IP68).

Reeds IP20

- Consists of a base made up of a transparent polycarbonate casing.
- Installed between 2 aluminium plates and anti-scratch support feet.
- Technopolymer aesthetic cover.
- Complete with integrated ballast and plug with transparent cable. Switching on and off are performed by means of the pedal push button located on the cable.

Reeds IP67

- Consists of a base made up of a transparent polycarbonate casing installed between 2 AISI316 stainless steel plates fixed by means of AISI316 stainless steel screws. Water sealing is assured by a silicone gasket. The light fixture can be fastened to the floor by means of the holes in the lower plate. Technopolymer aesthetic cover.
- Complete with integrated ballast and supplied with a 1.5 m-long H05RN-F 2x1 cable provided with IP67 connector for the electrical connection to the mains suitable for 5-13.5mm diameter cables.

Reeds IP68

- Consists of a base made up of a transparent polycarbonate casing installed between 2 AISI316 stainless steel plates fixed by means of AISI316 stainless steel screws. Water sealing is assured by a silicone gasket. The light fixture can be fastened to the floor by means of the holes in the lower plate. Technopolymer aesthetic cover.
- The light fixture is supplied with 24V DC power and is provided with a 5 m-long H05RN-F 2x1 cable with IP68 connector for the electrical connection to the mains suitable for 5-13.5mm diameter cables.

- Light fixture with direct emission, with fluorescent or metal halide sources.
- Available with base or fixed support (pivot) made of mass-coloured concrete.
- Diffuser in mass-pigmented polypropylene, screen in light-diffusing silkscreened methacrylate, reflector in painted aluminium.
- Mobile-arm structure in extruded EN-AW-6060 aluminium with bright anodizing treatment.
- Polished-painted articulations in die-cast EN-AB 46100 aluminium.
- Adjustment system in AISI 316 stainless steel.
- Silicone seal gaskets.
- Suitable for watertight connection.
- Electronic ballast.
- Technical features of light fixtures in compliance with EN60598-1.
- ENEC approved.

- An adjustable direct lighting appliance that consists of a pole joint and an adjustable lighting body. Fixed into position with 6 grub screws.
- The pole, not included, should have a 60mm spigot to allow appropriate fixing of the pole head. The pole should be 4m high to ensure appropriate surface illumination. Under these conditions, poles can be installed 15m apart to illuminate a 4m lane, in order to ensure compliance with class S3 for cycling lanes.
- Cabling should be accommodated within the pole head, accessible through a lid, using an IP67 sealed connector fit for cables with 5 to 13.5mm diameters.
- The lighting body is powered through a H05RN-F 2x1 cable.
- Aluminium EN AB47100 head, pole joint, and sealing caps; aluminium EN AW6060 body and glass-holding ring, silicon gaskets. Electronic power unit inside the body.
- Suited for public use, protected for 4kV surges, both in the common and in the differential mode.
- Moulded silicon road lighting appliance. The tempered glass diffuser glued flush to the lighting body ensures the absence of lighting pollution.
- INOX AISI 316 steel screws.
- Die-cast aluminium elements painted with 3-stage outdoor treatment: nanotechnologies, anti-oxidizing primer, polyester paint.
- The technical features of the appliances comply with the EN60598-2-3 norm.

Solar Tree

Ross Lovegrove
2007

Solar Tree is conceived as a lighting appliance combining the LED-based lighting technique with the solar photovoltaic technology in a very peculiar and innovative design.

The project is aimed, on one hand, at minimizing the environmental impact of the product's use (deriving, in particular, from reduced consumption of energy obtained from fossil fuels), while ensuring that the appliance can provide service continuity and, therefore, the expected luminous performance, without being vulnerable to random weather agents or suffer design imbalance (number of panels, accumulator size) calculated for winter months. Such imbalance implies significant dimensions, weights, and costs and would not ensure continuous operation in off-average weather conditions.

The same logical principles implemented in the automotive sector on electric cars, with hybrid versions taking the lead over pure electric battery-based ones for a number of reasons, such as costs, performance, and state of the art of certain technologies, were used to develop the Solar Tree project by Artemide. With its mixed accumulator/solar and network configuration, it provides the best possible energy saving and functionality combination.

- The structure consists of curved steel poles of different diameters and heights, reaching a maximum total 5.5m height above road level. The system includes 10 "grass blades" with 3mm-thick poles with a 40mm diameter, fitted with 1 1W terminal LED protected by a PMMA diffuser screen, and 10 4mm-thick poles with a 76mm diameter supporting the PETG heads with the solar panels. Emission is diffused.
- The poles are coated with pale green outdoor epoxy paint fading to white, and finished with a transparent layer.
- Four of the ten heads (all with photovoltaic cells on the top) are fitted with a LED unit (20 LEDs with a neutral white colour temperature, powered with up to 500mA) at the bottom for direct downward emission, sealed with a plastic screen to ensure protection from water and dust.
- The base is made of hot-zinc coated sheet steel designed for enclosure in a plinth of the appropriate size, not provided with the appliance, to be sunk into the ground. Alternatively a base is available, also made of zinc-coated steel with reinforced concrete stabilizing units forming a round seat. In this case the base can simply rest on the ground, even if ground fixing is always recommended.
- The connection/cabling elements, as well as the control and charging boards, are contained in multiple water-tight boxes with plug-and-socket connectors with protection rating IP65 or higher, and located either in appropriate spots at the foot of the base for easy inspection and maintenance, or inside the concrete stabilizing unit, as specified in detail for the Solar Tree version constituting the object of the supply.
- The airtight accumulators are contained in specific boxes that allow, on one hand, to protect the battery mechanically and from outer agents and, on the other to release any gas discharges, to be provided for by the law.

Configuration

The light fitting configuration includes an analysis of the potential incoming energy (geographical location of the light fitting) and a detailed analysis of the physical location of the light fitting (proximity of buildings or trees). Lastly, an analysis of the level of requested service and performance will be implemented (luminance levels, operation hours, potential discontinuity in the service, if any).

Technical data

- Total number of heads with solar panels: 10
- Number of heads with LEDs: 4
- Installed power for each light head: about 23.1 W at 350mA (base current drive), max current drive 500mA.
- 20 power LEDs for each head in neutral light tonality 4300K.
- Maximum luminous flux for each head: minimum 1250 Lm.
- Solar panel voltage in open circuit: about 10 V.
- Peak power for each panel: about 63 W.
- Total number of "stems": 10.
- LED power for each "stem": about 1 W with a power supply of 350mA.
- 2 Batteries
- Battery voltage: 12 V
- Single battery capacity: 240 Ah
- Box with USB connection for diagnostics/setting/servicing access.
- Technical features of the light fixture in compliance with EN60598-1.
- IP Rating IP65.
- Insulation class II.

$$E_{in} = \sum P_{peak\ power} \cdot h_{equivalent} \cdot \eta_{system} \cdot \eta_{noct} \cdot \eta_{tilt\ angle}$$

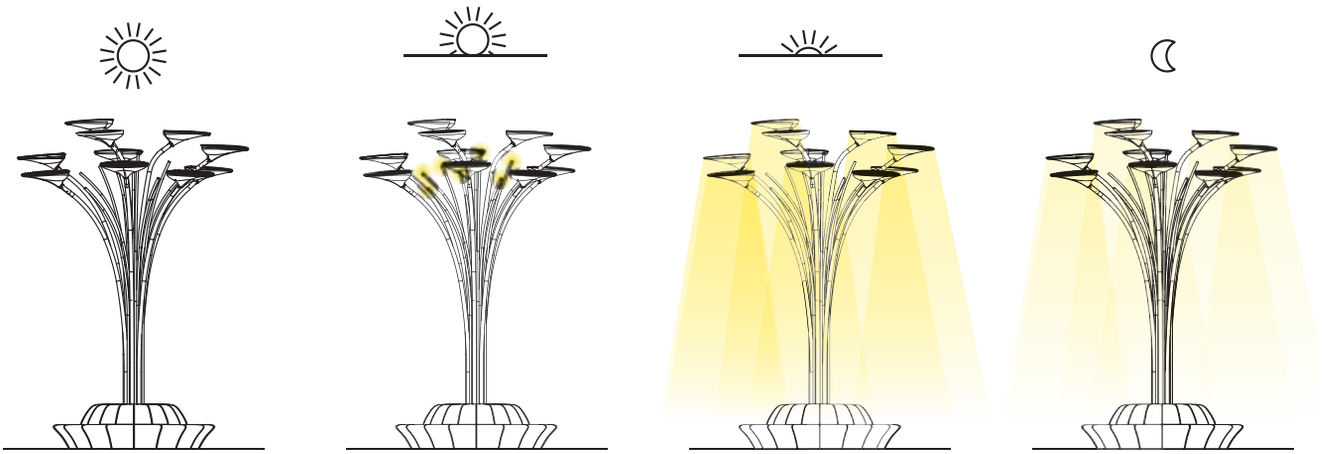

$P_{peak\ power}$ = Maximum power input

$h_{equivalen}$ = Average received solar radiation in hours

η_{system} = System conversion efficiency

η_{noct} = Nominal operating temperature

$\eta_{tilt\ angl}$ = Exposure factor

Working

Solar Tree was designed for operation in the HYBRID configuration: in addition to the batteries, generally of the appropriate capacity to contain energy for autonomous operation for up to 7-10 days (with an energy-saving operation cycle, better specified below) with full charge, connection with the mains is provided for energy supply to the appliances (via an appropriate DC power unit connected with the mains) when the batteries are depleted. This is to ensure full service availability even in case of persistent bad weather and/or reduced sun irradiation or 100% use of the luminous performance of the appliance, or anyway when the energy balance is negative.

At dusk (recognized by determination of the dawn and sunset time entered into the calculation routine of the management programme or otherwise), the LED sources are turned on until dawn according to the pre-set duty-cycle.

In "HYBRID" appliances, the system draws energy from the batteries until these fall to the lower charge limit, then switches automatically to the mains.

For appliances based on this configuration, if mains connections coincided with the desired switching time of the public lighting appliances to which the Solar Tree functionally refers, appropriate settings would ensure that the voltage available upon powering is interpreted as a start signal for the Solar Tree, and vice versa in case of disconnection from the mains.

Working programs

Two operating modes are available to satisfy individual needs – Manual and Automatic. The Automatic mode can, in turn, be configured in three different ways, according to the desired performance and energy saving attitude. More specifically: AUTO ECO: 100% operation at times of maximum attendance of the venue, limited operation of the LED heads only in the middle of the night (to ensure average 8 lux ground illumination, the LED sources are turned on and adjusted to approximately 25% of their nominal operating power from sunset to dawn. This mode is recommended to tend to full operation coverage even during the fall/winter in view of energy balance).

AUTO 100%: an operation mode that tends to ensure maximum operating performance of the appliance adjusting to the increased input of solar energy (if any).

CUSTOMIZED: the user can select the desired operating times and profiles.

The above-described profiles can be associated with deadlines and, therefore, be selected alternatively.

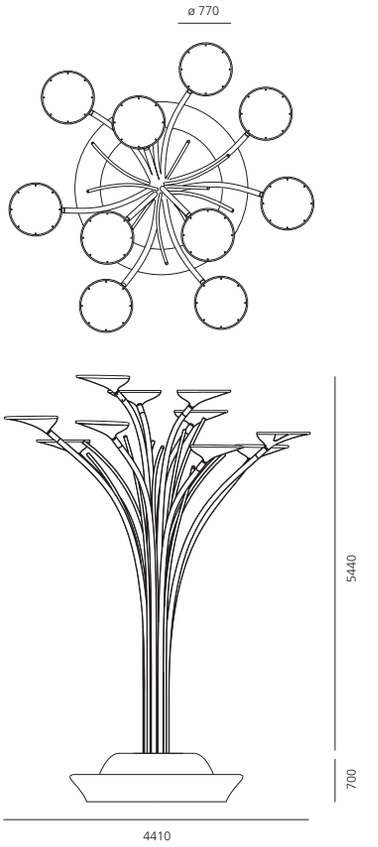

MANUAL: can be enabled by the user in case of special events and/or needs. The user can access the "fine" adjustment menu for selection on a 0-100% scale of the flow emitted by the individual LED heads and by the bunch of stems. The sources then remain switched on and adjusted according to the user's settings until switching off or returning to the automatic mode under the user's control.

Piazza Gae Aulenti, Milan - IT, Project: Pelli Clarke Pelli Architects

Diamante

Charles Keller, Daniel Marques,
Adrian Schiess
2009

- The Diamante is a light element that can create light scenes of great visual impact, due to the availability of "diamonds" of different colors or by means of the use of prismatic filters.
- The vertical drop can be realized with different configurations of the number of "diamonds" and heights. The (optional) dynamic light control gives the installation a magical and moving character.
- Each Diamante consists of a double-faced LED circuit board and a prism in injection mould of ABS, connected by means of a special electrical cable with high resistance and lightness which allows the flow of data control and electrical current.
- Specific mounting and connection devices give appropriate ease for mounting and maintenance of the system.

Key

Classifications

Class I
Device in which electrical safety is provided by an additional protective conductor (earth) connected to the metal frame of the lamp.

Class II
Device in which protection against electric shocks is not provided solely by the basic insulation, but which has additional safety measures such as double or reinforced insulation.
These measures do not involve earthing devices and do not depend on the installation conditions.

Class III
Device in which protection against electric shocks is based on a safety extra-low voltage power source and in which no voltages greater than this can be generated.
A class III device does not need earth protection.

Approvals

ENEC certification of European conformity.

Feeding tension

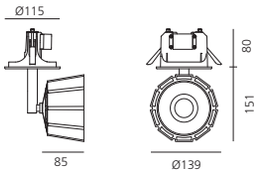

LV

Low Voltage
Components (electrified plates, optional extensions, cables and feeding kits) with 3-wire cables (+, -, signal) and 48VDC feeding tension. Feeding unit and control interfaces are needed in addition. Generally used for RGB LEDs, with the exception of Stand Alone versions.

MV

Medium Voltage
Components (electrified plates, optional extensions, cables and feeding kits) with 7-wire cables (Neutral, Direct Line, Indirect Line, Auxiliary Line, Earth, DALI 1 and DALI 2) and 230 VAC feeding tension. If dimming is required, an external DALI circuit complete with DALI power supply, group controller and scene controller is needed. Used for feeding and dimming fluorescent lamps, white LEDs, spot groups and RGB Stand Alone LED versions.

Rates

The diagrams shown in this catalogue are expressed in millimetres.

IP degree of protection

Electrical fittings are designed to prevent the intrusion and contact of solids and liquids with live parts.
Resistance to the penetration of solids and liquids is expressed by the acronym IP, followed by two digits that show the degree of protection: the first digit refers to solid bodies, the second to liquids.

First digit
0 No protection.
1 Protected against the penetration of solid bodies larger than 50 mm.
2 Protected against the penetration of solid bodies larger than 12 mm.
3 Protected against the penetration of solid bodies larger than 2.5 mm.
4 Protected against the penetration of solid bodies larger than 1 mm.
5 Protected against dust.
6 Totally dust-tight.

Second digit
0 No protection.
1 Protected against dripping water.
2 Protected against dripping water up to 15° from the vertical.
3 Protected against rain.
4 Protected against splashing water.
5 Protected against water jets.
6 Protected against waves.
7 Water-tight on immersion.
8 Water-tight on submersion.

Characteristics of LED and components

Artemide always develops its products with special attention to the flexibility of using all possible innovations in the field of LEDs. Many are, in fact, a variety of components available on the market, each with its own special features and suitable for different purposes.

Artemide designs and manufactures all the LED circuits required to turn on the product and operate it correctly over time, in order to prevent any problems and quickly repair any possible defects.

Among the most important types of LED used are:
- 5mm LED, which offers the highest average life span with intermediate light levels;
- SMD-LED, which enables the size to be minimised while maintaining good values of luminous flux;
- Power LED, characterised by a wide choice of power and luminous flux and high life expectancy;
- multi-chip LED, characterised by high power, up to over 20W per module, with high luminous flux.

Artemide offers the possibility of using dimmable systems (1-10V, PUSH button, DALI) or home automation control and lighting management systems by means of specific drivers or ad-hoc solutions. The dimming of the LED allows you to create user-controlled lighting scenarios and adjust the brightness for better viewing comfort.

Artemide is able to c customise and tailor their products to meet the various design requirements, thanks to the electronic control and the flexibility in the choice of LED. To request any type of specific or special project, you can contact our technical department.

Artemide manufactures its circuits with power signals in constant current or constant voltage, equivalent to a connection in series or in parallel to the products, respectively. For the correct selection of the transformer or power supply required to operate the lighting, we recommend you follow these guidelines:

Power calculation for electronic driver with constant current:
To properly select the driver necessary for electrical installation, it is sufficient to sum up the power values of each fixture, expressed in W (Watt), as indicated in the catalogue, and to select a ballast with a rated power 20% higher than the resulting total power value.
7 x Linea LED 8W - 24Vdc
7 x 8W = 56W + 20% = 67,2W -> Power supply T409999

Power calculation for electronic driver with constant current
To properly select the driver with constant current (350/500/700mA), choose the driver following the indication “N° LED max” in the relevant driver table.
3 x Zeno Up 3 - 500mA
3 x 3 = 9 LED x 2W -> Power supply NL19034

- Max surge supported by the ballasts: 2kV.
- Working temperature of the ballasts: -35°C + 50°C.
- The ballasts must not be directly exposed to UV-rays.
- When calculating sections/lengths, all the fixtures should supplied with power at the line end.
- The IP67 connector supplied with the fixtures is suitable for sections from 1.5 to 4 mm2.
- Insulation class II. Earthing is not required.

RGB control systems

Artemide Drivers and controller allow a flexible and fully programmable dynamic lighting System. The LED Drivers are compatible with the USITT DMX 512 Standard which is a simple, reliable and economic light management and can be easily interfaced with modern domotic Systems. The DMX data lines are electrically opto-isolated to ensure the maximal reliability and to avoid disturbances.

Wiring diagram for RGB LED systems RGB

Controllers DMX

NL19030	DSC30 USB interface - DMX stand alone						
Data In	Data Out	DMX ch.	Scenes	Driver	Data cable	L x W x H (mm)	Weight (kg)
USB	DMX	2x512 stand alone	255	5-5,5Vdc - 300mA excl.	DMX 2m/XLR + USB	80x40x90	0,7
USB	DMX	2x512 live	255	5-5,5Vdc - 300mA excl.	DMX 2m/XLR + USB	80x40x90	0,7
NL19031	5Vdc 300mA plug-in power supply Mini-USB						
NL7833	50cm cable with HE10 connector for keyboard (optional)						

Standard USB-DMX "Stand Alone" interface (512 channels, real-time clock, Local use), software, USB cable.Live mode with a computer; Stand Alone mode. Scenes can be triggered in sequential or using external push-buttons to trigger for instance 8 Scenes. Upon request: connection to external keyboard or to domotics Systems. Needs an external power supply for the Stand Alone mode. Upon request: connection to external keyboard or to domotics Systems.

NL19081	DSC60 USB/Ethernet Interface						
Data In	Data Out	DMX ch.	Scenes	Driver	Data cable	L x W x H (mm)	Weight (kg)
Ethernet	DMX	2x512	250	5-5,5Vdc - 300mA excl.	DMX 2m/XLR + Ethernet	80x40x90	0,7
NL19031	5Vdc 300mA plug-in power supply Mini-USB						

Standard USB and Ethernet DMX "Stand Alone" Interface (2x512 channels), with software, USB cable, 3 DMX 512 universes in live mode with a computer (not included); 2 DMX512 universes in stand-alone mode. Micro sd-card memory for stand-alone use, 8 dry contact trigger ports via HE10 connector (upon request). Clock & calendar function. Stand-alone mode with 5 areas and 250 scenes. WIFI remote control option with smart phone/tablet (IOS, ANDROID, Windows, Linux) to trigger scene. Simply connect to your wireless local network, the WIFI remote control app will automatically find the interface and allow you to control it. A second application, compatible with any IOS and ANDROID smart phones or tablets, allows you to easily create or change the lighting surroundings in each area. In just a few steps, you'll be able to take control of all your DMX fixtures in live, or Stand Alone mode. The simple application can be used by just about everyone in any situation. The interface needs an external power supply for the Stand Alone mode.

NL19080	DSC70 USB Glass Touch Sensitive Control Keypad						
Data In	Data Out	DMX ch.	Scenes	Driver	Data cable	L x W x H (mm)	Weight (kg)
USB	DMX	512	99	5-12Vdc - 300mA excl.	RJ45 + USB	110x86x10	0,2
NL19083	5Vdc 300mA plug-in power supply						

Thanks to the "All-in-One" technology, the DSC70 includes a high-tech keypad, stand-alone memory storage and a powerful DMX512 lighting software package. It offers the best solution for projects requiring a large amount of scenes along with an uncluttered and intuitive interface. The computer programmable, flat wall mounted lighting controller is ideal for LED, RGB & DMX lighting and capable of playing up to 99 scenes, each of which can be modified by touching the mode button to change the dimmer and color. The LED display makes it easy to tell which scene number is playing. The wall panel allows it to be mounted on any single gang wall socket around the world. Large memory capacity, 4 touch sensitive buttons, glass wall-mounted DMX controller. Micro-USB for programming. For PC, Mac & Tablet with USB. 32bit RM technology, software included. Stand alone operation. Ready to use (pre-loaded). The interface needs an external power supply which can be placed in the gang wall socket.

NL11054	DSC50 USB interface - DMX stand alone						
Data In	Data Out	DMX ch.	Scenes	Driver	Data cable	L x W x H (mm)	Weight (kg)
USB	DMX	512	512	USB	2m/XLR	78x48x28	1,0

The DSC50 permits synchronisation of light scenario with audio signal by means of the specific interface. This feature makes it ideal for all installations where light must act together with the soundtrack. Up to 60 DMX512 interfaces can be connected to a single USB host controller without having any frame rate loss, for a maximum of 30720 DMX channels. Available with advanced Light Control Software, can be fully synchronised per DMX-IN, Art-Net Remote, Remote HTTP, MIDI and Touch Screen.

Example of Wi-Fi control of the RGB system

App/Android
iPod touch / iPhone

Wi-Fi Network with DSC60 and DCS70
Art-Net to DMX converter directly wired
via ethernet to a Wi-Fi Router

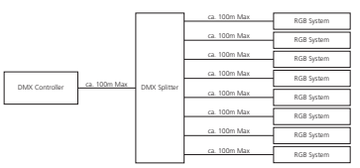

LED-Driver DMX compatible equipment

Special devices for projects

Code	Description
NL78070	Splitter DMX 1 in to 8 out

Device in order to realize star wiring between Systems driver RGB and controller DMX. 1 cable 250cm/XLR female + 8 cables 250cm/XLR male incl. Standard Rack 482 x 44 x 128mm 90-240Vac.

Lighting management

Dimmer DALI

Code	Description	Signal	V (Vdc)	I (A)	P (W)	L (mm)	W (mm)	H (mm)	
NL19090	Dimmer DALI	DALI, Push	10-24	5	120 max	172	42	20	IP20
NL19096	Dimmer Master	DALI, 1-10V; 0-10; Push	12-24	12	288 max	156	52	26	IP20
NL19097	Dimmer SLAVE + NL19096	DALI, 1-10V; 0-10; Push	12-24	12	288 max	156	52	26	IP20

Presence and brightness sensors

Room in use.
Operation with movement detector and daylight control.

To complement the standard versions with or without a dimmer, Artemide Architectural is showcasing the Interactive-Dali, a system that combines personalised control of lighting, ensuring optimum convenience of use, and automatic management of the switching on and off cycles for a rational use of energy.

Multiple operating situations can be set due to the integration of interactive and adjustable electronic components, such as a movement detector, ambient light sensor and infrared receiver.
With Interactive-Dali, lighting is activated automatically when the room is in use and there is not enough natural light.

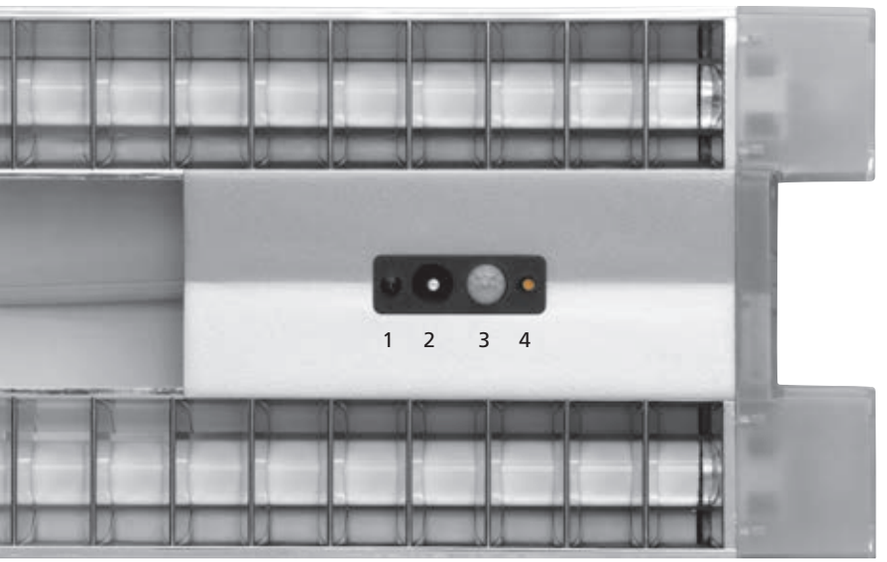

Empty room.
Timed lowering of light intensity.

Depending on personal characteristics (clearness of vision, required concentration, possible tiredness, etc.), or the nature of the activities being carried out (personal work, meeting, video projection, etc.), the user can optimise the comfort level by regulating the amount of light,< simply by using a switch or an optional remote control. After this simple setting, the system will automatically manage the operation of the device to keep the amount of light constant according to the daylight.

When the room is not being used, the light is automatically lowered and then switched off by a programmable timer.

Empty room.
Complete switch off.

1 Infrared detector.
2 Daylight sensor.
3 Movement detector.
4 Service button
(for programme selection).

Interactive-Dali technology is used in stand-alone devices, in some devices belonging to the same family connected to each other or to external Interactive-Dali components (such as a supplementary movement detector).No interconnection is therefore required to a Dali system already in the room.

Main advantages
High level of personalised operation."Plug and play" connection without the need to change the existing electrical system.Option to manage up to ten devices, which may be divided into two groups.Energy savings will bring a return on the investment.

Interactive Dali Devices

The master module (fitted with the Interactive-Dali system) can be connected to up to 10 other dimmable Dali devices. It is operated by an Interactive-Dali remote control or an external or integrated button.

Dali Devices

For products with a Dimmable-Dali power supply unit, an external Interactive-Dali kit can be used, which can be fitted into the ceiling. This kit can control up to 11 Dali devices (slave modules). It is operated by an Interactive-Dali remote control or button.

Interactive-Dali components

		Code
	**Interactive-Dali kit, Ø86mm, white, recessed.** Can be connected to up to 11 dimmable Dali units. It is operated by an Interactive-Dali remote control or button. ⌀72 mm	M074030
	**Supplementary movement detector white, recessed.** For use when the area to be covered is greater than 6.00 x 5.00m x h 2.5m. To be connected to one of the outputs of the Interactive-Dali control module. No further connections are needed. ⌀64 mm	M074130
	**Interactive-Dali remote control.**	M104900
